**SUBSCRIPTION DATA**  
**ARMY AVIATION** (ISSN 0004-248X) is published monthly, except April and July by Army Aviation Publications, 1 Crestwood Road, Westport, CT. 06880. Phone: (203) 226-8184 and (203) 226-8185.

Subscription rates for non-AAAA members: \$13, one year; \$25, two years; add \$7.50 per year for foreign addresses other than military APO's.

The receipt of change of addresses is verified by the publication of the residence change in the PCS or "Takeoffs" column of the magazine.

Second Class Postage paid at Westport, Conn.

# The Nominations Are Open

Be a participant in the selection of the "Aviator of the Year" and the "Aviation Soldier of the Year." Write to the AAAA National Office and request nomination forms to put your nominees into the hopper for national recognition at the forthcoming AAAA Convention.

Many deserving people are never cited because they are never nominated.

AAA's "Outstanding Aviation Unit Award", along with its "Outstanding Reserve Component Aviation Unit Award", recognize the finest unit performances during the 1984 calendar year. How does your unit measure up?

The "James H. McClellan Aviation Safety Award" and the "Outstanding DAC Award" single out unique people. Tell us about them. The nominations close January 15.

**Nomination Form for All AAAA National and Regional Awards, Criteria, Data, Suspense Dates**

**"OUTSTANDING AVIATION UNIT AWARD"**  
This Award is presented to the unit which has performed the most outstanding service during the calendar year. It is presented to a unit which has performed the most outstanding service during the calendar year.

## 1985 AAAA National Awards

Submit your nominations to AAAA, 1 Crestwood Road, Westport CT 06880 by Jan. 15

# Avco Lycoming is winning the battles of tomorrow in the field today.

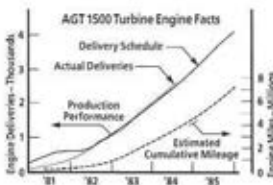

The battles of the future will be won with equipment that stands up in the real world. That's the kind of reliability we build into the turbine engines from Avco Lycoming.

We prove it again and again; with the T53 turboshafts, which are powering thousands of Hueys, Cobras, and the advanced AH-1S; with the T55 turboshafts aboard hundreds of Chinooks; with the RAM-D improved T55-L-712, which gives the CH-47D the power to carry a 25,000-pound payload; and with the AGT 1500, power plant for what is being called "the best tank ever built."

Like all Avco Lycoming military turbine engines, the AGT 1500 is proving its mettle every day. On the Aberdeen Proving Ground, it's shown it can meet tough Army durability requirements. In REFORGER exercises in West Germany, the AGT 1500 has proved its performance for two years running. To date, we have delivered over 2,500 AGT 1500 turbines built to the toughest standards in the industry, because combat demands it.

## The next forty years.

Now, we're working to help build a new generation of engines to power a new generation of Army aircraft, the LHX. Developed to answer an Army requirement

Two promises kept: turbine engine deliveries on target and now ahead of schedule; millions of miles of reliable vehicle operations.

for an Advanced Technology Demonstrator Engine (ATDE), the PLT34 represents the highest level of performance yet achieved in the 800-1200 shp size and class. The ATDE/PLT34 has met all performance objectives with more than 1000 hours of successful testing and six years of development behind it, more than any other advanced engine in this class.

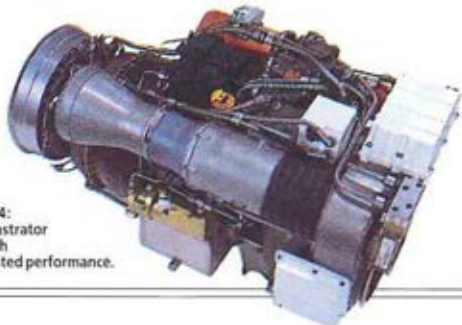

In its production version, the ATDE/PLT34 turboshaft, designated the AL34, produces even

more power, with greater thermal efficiency in a compact, light-weight package. From day one, it was designed to meet the unique requirements of U.S. Army rotary wing aircraft, using proven and improving technologies to build in U.S. Army standards of reliability and maintainability. The AL34, the prime candidate for LHX.

## In for the duration.

With engine deliveries running consistently on target or ahead of commitments, to the highest quality standards, with technology second to none, Avco Lycoming is clearly the company to provide Army Aviation the equipment and support needed for the LHX and other aircraft of the future: the very best.

## Avco Lycoming. Power for LHX.

ATDE/PLT34:  
The demonstrator engine with demonstrated performance.

# Applicants for 1985 Scholarship Assistance sought by the AAAA

## \$7,000 Available for 1985 College-Entry Applicants

The AAAA Scholarship Foundation, a separate non-profit educational activity created to provide scholarship aid the sons and daughters of AAAA members and deceased

members, announces the availability of \$7,000 in assistance funds for the 1985 college-entry year.

### Award Philosophy

Operating on the premise that ample scholarship assistance is available to those in need, the AAAA National Scholarships are awarded primarily on the basis of

academic merit and personal achievement. The AAAA seeks to honor those outstanding students whose well-rounded secondary school activities indicate solid career potential.

### Application Procedure

Student-applicants are asked to request the appropriate application forms by writing to the AAAA Scholarship Foundation at 1 Crestwood Road, Westport, CT 06880. Requests for applications must be received on or before December 15. All forms, together with other supporting data, must be

returned to the Foundation on or before January 21 to receive Awards Committee consideration. The student-prepared application should state the full name of the applicant's parent-member and address of student if different.

### Eligibility Criteria

The AAAA applicant must also be: (1) unmarried and a citizen of the United States; (2) a high school senior who has applied to an accredited college or university for Fall, 1985

entry as a freshman; (3) program participation is limited to the children of members with an effective date of membership on or before March 31.

### Selection and Notification

Selection of winners will be made by the 20-member AAAA National Awards Committee during the 15-28

February period with each applicant to receive a list of the winners not later than 1 April.

### Overall Supervision

The 15-member AAAA Scholarship Foundation, Inc. Board of Governors includes Bryce Wilson, Glenbrook, NV; MG John L. Klingshagen, Ret., Alexandria, VA; COL Rudolph D. Descoteau, Ret., Alexandria, VA; Mrs. Dorothy Kesten, Westport, CT; Donald F. Luce, Bridgeton, MO; Mrs. William B. Bunker, McLean, VA; CW4 Elmer M. Cook, Ret.,

Alexandria, VA; Paul L. Hendrickson, Ferguson, MO; MAJ Linda M. Horan, Leavenworth, KS; CSM Harmon Kennedy, Ret., Waynesville, MO; COL Nelson A. Mahone, Jr., Ret., Panama City, FL; COL John W. Marr, Ret., Arlington, VA; COL Wayne N. Phillips, Ret., Santa Rosa, CA; Frank N. Plasecki, Philadelphia, PA; Richard S. Steele, Freehold, NJ.

## Application Form

\*\* Applicant's Name (Please Print)

Street

City

State

ZIP

\* Parent's Name

Rank / Grade (if applicable)

Residence Phone Number

\* Program participation is limited to the children of those members who have an effective date of membership on or before 31 March.

\*\* Return application on or before 15 December to: AAAA Scholarship Foundation, Inc., 1 Crestwood Road, Westport, Conn. 06880

\*\* SAT, test scores, senior year mid-term grades, and all other data must be received not later than 21 January.

## ARMY AVIATION ASSOCIATION

1 CRESTWOOD ROAD, WESTPORT, CT 06880  
(203) 226-8184

Within the National Executive Board structure, I currently serve as a National Vice President without title . . . but "with portfolio." I say this because, as the Board's senior Active Army Vice President, I'm involved in the follow-on implementation of almost every program that's developed at the national level for our Army members. Please understand that this is a broad "team" effort — there are 25 other Army members working on the Board with me, and they include several General Officers, field grade officers, aviation warrant officers, and DAC's.

To give you a brief glimpse of some of the "Army action items" in which the National Board has a current interest, let me cite just a few of the agenda items covered at some recent Board meetings:

—A new National Award, the "Trainer of the Year Award," has been approved, staffed, and sponsored, and will be presented at a 4 December Ft. Rucker ceremony to an Awardee for his or her CY 1984 accomplishment.

—The Board has taken the position that it will fully support a **United States Helicopter Team** effort at a possible World Helicopter Championship to be held in England in Fall, 1985.

—Acting on the wishes of a 10% sample of the membership, the Board approved the conduct of the 1987 AAAA National Convention in **Nashville, Tenn.**, and the 1988 National Convention in **Ft. Worth, Tex.** The respondents were randomly-selected, i.e., every 10th member on the entire ZIP Code Roster received a questionnaire; and they covered every category of AAAA membership — Army, Reserve Components, Industry, etc.

—Also, in regard to the National Convention, the Board **upped** the Chapter Delegate authorizations substantially, both in number and in the dollar refund to be provided to each authorized Chapter Delegate. This action has great impact on our Chapters, the greatest number of which represent Active Army members.

There are many, many other "Army" programs in which your National Board has a sustaining interest, but space does not permit my reciting them here. I've endeavored to capsule but a few and trust you'll agree with me that your Association and this National Board member are working for your interest.

Richard D. Kenyon  
Major General, USA  
Vice President, AAAA

OCTOBER 31, 1984

ARMY AVIATION 7

# New capabilities for

There are times when less can mean more as in the case of King Radio Corporation's U-21 avionics update/retrofit program for the U.S. Army. While saving 268 pounds, the panel on the right clearly illustrates King's understanding of pilot workload and King's ability to plan, engineer, install and flight test complete avionics systems.

The U-21 avionics update/retrofit program offers the flight crew dual comms with displayed active and standby frequencies for easy access to four frequencies; dual navs with 10-waypoint, TACAN based RNAV and displayed active/standby nav frequencies. The fully integrated flight control system features pilot's 4<sup>th</sup> flight director and Horizontal Situation Indicator with separate and independent artificial horizon and HSI for the co-pilot. In addition to standard operating modes the KFC 250 flight director and autopilot

includes yaw damper and altitude preselect and alerting along with a servoed, encoding altimeter.

King uses the latest in state-of-the-art in microprocessors and LSI technology so you're assured of avionics with increased reliability. And that boils down to a higher mission completion rate, more flexible mission capability, less time for crew qualification, higher payload, and greater dispatch ability. And, if problems should arise, King has over 850 dealers worldwide in addition to factory personnel, who can solve your problems quickly and cost effectively.

The same design, installation and flight testing capabilities that have given new life to the U-21, can be applied to such other veteran performers as the U-8, T-34, T-37, T-39, T-41, T-42, C-12, OH-58, UH-1 and O-2, to mention just a few.

King Radio manufactures in

# a veteran performer.

excess of 100 million dollars worth of avionics systems yearly and has the capability to take a project from concept through design, development, testing, manufacture and installation (classified, if necessary)

as we've done with the NASA DAAS program, or the AN/DRN-13 Tacan Program for the U.S. Navy. Over 200 King design engineers, technicians and 2800 other employees stand ready to apply truly innovative design techniques to avionics and

flight control systems applications just as they've done for over 20 years in general aviation. King has the ability to handle those programs as a prime contractor.

So whether you have a requirement to update a distinguished veteran like the U-21 or deliver a totally new avionics or flight control system be sure to contact King Radio Corporation's Special Projects Department at 1-800-255-6243. Your pilots, mission commanders and even your finance officers will like the new life King can give your projects.

King Radio Corporation, 400 North Rogers Road,

# How can we be more effective?

BY BRIGADIER GENERAL WAYNE KNUDSON  
AVIATION OFFICER, ODCSOPS, DA

**T**HIS month I have deviated from the normal scope of my remarks and will provide some thoughts for discussion within Army Aviation and our branch. As we reconfigure to a new aviation structure, field new equipment with increased capabilities, and re-field existing equipment, we should all be seeking an answer to a basic, but complex, question:

**What new concepts of helicopter employment can we devise that will lead to a qualitative improvement in effectiveness?**

The burden of this question should not be placed only on those charged with doctrine, but should be fundamental in the thought process of all concerned with Army Aviation. The proposition seems simple, and immediate responses are sprinkled with terms such as "overwatch," "lateral reinforcement," and "support." Be careful in considering your answer in order not to get caught in these traps. We must concern ourselves with innovative concepts that will lead to a quantum improvement in the effectiveness of helicopter employment.

## A revolution in warfare

An analogy may provide a better understanding of the question. In the 1930's all major powers had tanks, but most used them to do traditional tasks, particularly providing improved fire support for the ground forces. The Germans, however, did much more. By putting tanks into combined arms formations (Panzer Divisions) and using them to lead the operational attack, they brought about a revolution in warfare. This upset the superiority of the defensive, not because of the guns or armor on the tanks, but because they could maneuver faster than the defender could reinforce.

How do we conceptualize a similar change based on the modern helicopter? The time is right to demand revolutionary thought in pondering the question. I challenge all of you to think the problem through and be "innovative" in formulating practical and competitive answers to this critical question.

## Moving up

Congratulations are in order for nine officers selected for promotion to Brigadier General who are affiliated with Army Aviation. They are: **COL (P) Paul C. Hurley**, Executive to the Deputy Chief of Staff for Logistics, HQDA; **COL (P) Michael J. Pepe**, Deputy Commander for Procurement and Readiness, US Army Aviation Systems Command; **COL (P) Thomas H. Harvey, Jr.**, Chief, War Plans Division, Strategy, Plans and Policy Directorate, Office of the Deputy Chief of Staff for Operations and Plans, HQDA; **COL (P) Donald R. Williamson**, Project Manager, Cobra Attack Helicopter, US Army Aviation Systems Command; **COL (P) Rodney D. Wolfe**, Chief, Aviation Division, Office of the Deputy Chief of Staff for Operations, US Army Forces Command; **COL (P) Merle Freitag**, Commander, Division Support Command, 101st Airborne Division (Air Assault); **COL (P) Patrick H. Brady**, Inspector General, I Corps and Ft. Lewis; **COL (P) Roger K. Bean**, Chief of Staff, 3d Infantry Division (Mechanized); and **COL (P) Rudolph Ostovich III**, Commander, 11th Aviation Group.

## A training opportunity

In September, 1982, the Army assigned an officer to the **Marine Aviation Weapons and Tactics Squadron One (MAWTS-1)**, Marine

Corps Air Station, Yuma, Arizona. This exchange assignment was made to reinforce a link between Army and Marine Corps Rotary Wing Operations. Reciprocally, a USMC officer was assigned to the 7th Squadron, 17th Cavalry, 6th Cavalry Brigade, Ft. Hood, Texas.

MAWTS-1 was commissioned on 1 June 1978. Although it is just over five years old, its involvement in graduate level Marine Aviation Weapons and Tactics training can be traced to the days just after World War II when the acquisition of special weapons caused the need for special training for handling and delivery of these weapons. In the aftermath of the Vietnam conflict **Marine Aviation Weapons Training Units (MAWTUs)** expanded their instruction to include air-to-air tactics but the need for graduate level weapons and tactics training for all Marine Corps Aviation was becoming more apparent. In July, 1976, the Marine Corps Weapons and Tactics Training Program was established.

### A top level course

One key element in this effort was the development of a **Weapons and Tactics (WTI) Course** at MCAS Yuma. The WTI course is a comprehensive, post-graduate course of instruction for highly experienced, fully qualified officers from all aviation communities. Officers from infantry, armor and ground supporting arms units also attend. The course includes academic instruction in threat analysis, weapons and systems capabilities, and training management and stresses integrated operations planning. The flight syllabus is designed to perfect briefing skills and debriefing skills and airborne instructional and evaluation techniques. The course culminates in a large scale, combined arms exercise encompassing all facets of the Marine Air Ground team, planned and executed by the students.

Since 1978, MAWTS-1 has provided academic and/or flight instruction to the 101st Airborne Division (Air Assault), Ft. Campbell, KY; 9th Infantry Division, Ft. Lewis, WA; 6th Cavalry Brigade, Ft. Hood, TX; USA Engineering Flight Activity, Edwards AFB, CA; Operations Group, Ft. Irwin, CA; 82nd Airborne Division, Ft. Bragg, NC; 163rd Cavalry, Utah National Guard; 3rd Armored Cavalry Regiment, Ft. Bliss, TX; 3rd Combat Aviation Bn, Wurtzburg

FRG; 1st Infantry Division, Ft. Riley, KS; 7th Combat Aviation Bn, Ft. Ord, CA; 1st SOCOM, Ft. Bragg, NC; and 160th Aviation Bn, Ft. Campbell, KY. Numerous Army pilots have graduated from the seven week, WTI course composed of three weeks of academics and four weeks of flight training. The course provides excellent insight into command and control of large unit operations. An element of the course, air-to-air combat training, has been popular with Army units and is available separately.

Because the Army and Marines have historically participated in joint operations and may expect to do so again, I encourage unit commanders to consider this excellent training opportunity. An understanding of Marine Air Operations could be significant. The Army officer now assigned to MAWTS-1 is CPT John F. Finan, Jr., autovon 951-2967 or commercial (602) 726-2967. He will be pleased to answer your questions and assist in your training needs.

### 1985 WHC

The **Federation Aeronautique Internationale (FAI)** Helicopter Committee met on September 4, 1984 at Farnborough, England, to discuss the site selection for the next **World Helicopter Championships (WHC)**. As you know, the United States Helicopter Team won the championship in 1981. As the reigning World Champions, the USA received the first opportunity to be the next host. The USA offered to host the proposed 1984 WHC at Ft. Rucker, the "Home of Army Aviation" but because of the financial burden of transporting teams from Europe to the USA, the majority of FAI countries declined the USA 1984 WHC invitation.

The USA, in conjunction with the **Helicopter Club of America (HCA)**, has relinquished the right to host the next WHC to the United Kingdom. This was done to financially accommodate members of the FAI and promote a proposed 1985 WHC in Europe. United States participation in the proposed 1985 WHC is being considered at this time.

### All in one place

This inaugural issue of Army Aviation's "Blue Book" provides a handy single source reference guide to key personnel and units within the U.S. Army Aviation branch worldwide.

Be all you can be!

IIII

# BG O. Glenn Goodhand dies at 75; Was three-time AAAA President

**Brigadier General O. Glenn Goodhand, Ret.**, a member of the U.S. Army Aviation Hall of Fame, and a founder and past President of the Army Aviation Association of America, died on September 11 at his home in McLean, VA, after a long illness.

**General Goodhand** was born in Brooklyn, NY, in 1909 and was educated at the Phillips Exeter Academy and the Massachusetts Institute of Technology. Following his graduation from MIT with a Bachelor's degree in Engineering Administration in 1931, he received a Reserve Commission as a Second Lieutenant in the Army. He was employed by the Eastman Kodak Company in a managerial capacity and earned a private pilot's license prior to going on active duty with the Army in 1942 as an artillery liaison pilot.

## Army Aviation pioneer

**Glenn Goodhand** was inducted into the Army Aviation Hall of Fame in 1975 for his contributions during the 1942 - 49 period. During the Second World War, he accumulated more than 500 combat flying hours, and improvised unique and effective aerial tactics still utilized to this day.

In Italy, he conducted pioneer experimental work in night flying on the Cassino Front with light observation aircraft, on his own initiative as a Captain, and devised feasible methods for adjusting artillery fire at night far beyond normal daytime observation ranges. In doing so, he personally flew 16 night missions deep behind enemy lines.

Subsequently, at the Anzio Beachhead, he developed a control system for Corps Artillery aircraft which assured continuous observation of target areas, provided for engagement by the

most appropriate artillery units, and gave our spotter pilots timely warning of the approach of enemy fighter aircraft.

During the invasion of Southern France, as a Major and VI Corps Aviation Officer, he organized a unit of light aircraft for reconnaissance ahead of advancing ground units in addition to his normal artillery observation duties. This unit developed and employed unprecedented techniques for the direction of P-47 fighter-bomber attacks on targets beyond normal artillery range.

**Glenn Goodhand** retired from the Army in 1964 as a Brigadier General and Master Army Aviator, the highest level of pilot achievement within the U.S. Army. He subsequently worked for many years as the Washington Representative of the Boeing Vertol Company and served three terms as AAAA President during 1965 - 68. He is survived by his wife, Jo, his sons Robert and Oscar, and 7 grandchildren.

The high esteem which he is held is illustrated by the fact that, prior to knowing of **Glenn's** serious illness, the Commandant of the U.S. Army Aviation Center at Fort Rucker, AL, had proposed that the new flight simulation training facility on post be named in his honor.

The Board of the AAAA Scholarship Foundation has voted to establish a permanent \$1,000 annual scholarship in **General Goodhand's** memory. Donations may be sent to the AAAA Scholarship Foundation, One Crestwood Road, Westport, CT 06880. ■■■■

---

## COL Gordon J. Wolf, '44-45 School Commandant, dies

**Colonel Gordon J. Wolf, USAR (Ret.)**, another pioneer from the era when the "Grasshoppers" founded modern Army Aviation, died in Austin, TX, on September 7th. A member of the "Class Before One," he served as the Director of the Department of Flight Training at Ft. Sill, OK, during 1944 - 45. He was buried in the Fort Sam Houston National Cemetery on September 10, and is survived by his widow, Eve. ■■■■

# Helicopter or Airplane. The Difference Is Your Choice.

Visit Bell at  
AUSA Booth C-437

## The Bell LHX.

Bell's Advanced TiltRotor — The BAT — lifts off and hovers with helicopter precision. Then, in response to your single command, the rotors begin tilting forward, you accelerate, and in nine seconds you're in command of a fixed-wing type aircraft. And you're off like a bat at 270 knots per hour.

This extraordinary capability, combined with the BAT's unparalleled nap-of-the-earth agility, means the Army pilot of tomorrow will maneuver as never before, employing advanced tactical concepts that meet the

Army's LHX requirements for aircraft that can move fast, strike deep and keep the enemy off balance.

Through the teamwork of Bell Helicopter Textron, Texas Instruments, Sperry Flight Systems and Honeywell, the BAT will employ the most sophisticated technologies of the future. Composite construction to reduce cost and weight. Sensor fusion for the most efficient mission equipment package. Digital/optical flight controls to optimize man-machine interface. All this only from the Bell LHX team.

**Special Message  
to Army and Air Force National  
Guard and Reserve Officers:**  
You are now eligible to join Army Mutual while on Active Duty of any  
duration. For details, call 800/336-4538.

# What will their life look like when you're out of the picture?

Without you, your family's life will change instantly in countless ways. Because no one can give them what you yourself can. That's why the Army Mutual Aid Association is uniquely valuable. We have an intimate understanding of your needs and those of your family.

We know the importance of prompt response. For over 100 years we've stepped in during the hour of need — not days or weeks later.

We also understand your desire to prepare for the future as quickly and efficiently as possible. So we've streamlined the

procedure for your joining the Army Mutual Aid Association and obtaining the services you need.

Simply call us toll-free at 800/336-4538 (703/522-3060 in Virginia).

Or drop us a line today at our address. We'll be happy to fill you in on the details.

## Army Mutual Aid Association

\*\*\*

**Mission:** The mission of the Directorate of Combat Developments is to develop concepts, organization and materiel for Army-wide aviation use. The Directorate is divided into four operational divisions:

The Studies Division is responsible for all aviation related studies, including concepts, threat, wargaming and cost and operational analyses.

The Materiel Developments Division develops requirements for aircraft and aviation-related materiel, research and development (R & D), acquisition and equipment modification.

The Test and Evaluation Division is responsible to perform independent evaluations — acting as the operational user representative — for aviation equipment, organizations, systems and innovative concepts for which the Aviation Branch is proponent.

The Organization and Force Development Division develops, reviews and

**Mission:** Conduct total system management for Utility Helicopters and LHX within TRADOC. Insure that the user total system efforts are developed and fully integrated early and throughout the development, production, and deployment of the assigned systems. Act for the Commander, USAAVNC, and the Commander, TRADOC, to discharge the user's responsibilities in the development testing, training, and, in coordination with the gaining commands, fielding of the assigned systems. Has tasking authority, in coordination with HQ TRADOC (DCSCD), to all TRADOC organizations.

\*\*\*

**Mission:** The mission of the U.S. Army Safety Center is to support the Army in the conservation of manpower and materiel resources to enhance combat effectiveness. This is accomplished through the following process: Acquisition and storage of Aviation and Ground mishap/accident data; accident data analysis; countermeasure development, including systems safety engineering; safety publications; professional and technical educational programs; specialized prevention programs; consultative services and evaluations; safety regulations and directive development; and, centralized accident investigation of both aviation and ground accidents.

## Advancing RPV Technology

# It's almost as indestructible as it is indispensable.

Deep in hostile territory, the small Army/Lockheed Aquila RPV surveys the landscape. Its real-time television link relays the enemy's situation to observers behind the front lines, giving precise targeting data for air and artillery. Interfacing with TACFIRE, it directs volleys with first-round accuracy and illuminates targets for laser-guided munitions with its laser designator.

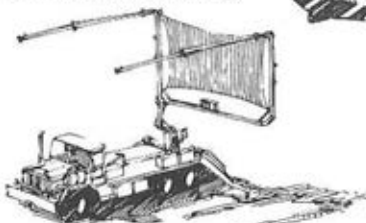

Even in the face of intense enemy fire, Aquila is one tough bird to knock down. Its wingspan is a mere 13 feet. Its miniscule infrared profile makes it an almost impossible target for infrared-seeking weapons. And its radar signature is a speck compared to that of a high-performance manned aircraft.

Aquila can loiter, jink, and beeline at 110 mph, and it can remain aloft for up to three hours. In a lengthy ordeal of tests, it successfully evaded a deadly mix of ground fire.

Because it can change payloads quickly, Aquila gives battle commanders a single affordable answer to a variety of vital missions. All for a

fraction of the cost of a manned aircraft and its irreplaceable crew. In addition to target acquisition, Aquila can be a meteorological sensor, an ELINT collector, a radio relay for friendly communications or a jammer of enemy signals. With FLIR, its mission capabilities will extend into the night. And after each flight it returns to its retrieval net to be readied for another sortie.

There's an alternative to exposing a multimillion dollar aircraft and its crew to the risks of many tactical missions: Aquila—the tough bird that gives flexibility to commanders and nothing but trouble to the enemy.

 **Lockheed Aquila**

**Mission:** The mission of AEFA is to act as the primary engineering flight test activity for the Army. Execute perform-

ance, handling qualities, system/sub-system interface and integrated system tests on current, proposed, experimental and research air vehicles. Plan, manage and execute assigned flight test operations in support of AVSCOM's laboratories. Provide engineering flight test data and procedures for incorporation in operator's manuals. Monitor and verify contractor testing and data. Perform testing and data and testing under extreme environmental conditions with emphasis on icing. Conduct an Army pre-test pilot school orientation course.

\*\*\*  
**Mission:** The U.S. Army Research and Technology Laboratories - AVSCOM, is the Army's principal aviation R & D activity. It provides the technical base for the development of superior airmobile systems. Areas of emphasis are aeromechanics, propulsion, structures, and applying the resultant technologies. Among

the numerous benefits are improved RAM, safety and survivability, greater performance, signature reduction, and responsive support to field and PM problems. A unique feature of RTL is the inter-agency relationship of three of its four Laboratories with NASA, at the Ames, Langley and Lewis Research Centers.

\*\*\*

**Mission:** Develop, resource, and manage the Army Flying Hour Program. Provide policy and resources for aviation flight training conducted at the training bases and in field units.

**Ready for Training** The U.S. Army's first AH-1S Cobra Flight and Weapons Simulator for nap-of-the-earth tactical mission crew training with the world's first color laser visual system is on line . . . on time.

This spring at Fort Hood, Texas, the U.S. Army began simulation training of AH-1 Cobra pilots and gunners. A second laser-equipped Cobra simulator is being delivered later this year, with three more to follow in 1985.

Crews are perfecting tactical mission scenarios, including weapons effects, in integrated or independent mode, at a fraction of the cost of training in the actual aircraft.

Link's Synthetic Flight Training System (SFTS) meets all Army flight training requirements—on time and on target.

# LHX may still be in advanced design, but the engine is already showing its metal.

Twin Garrett TSE109's. Each in the 1200 SHP class, with low risk, fuel efficient punch. Battle survivability, from one of America's most successful gas turbine engine builders.

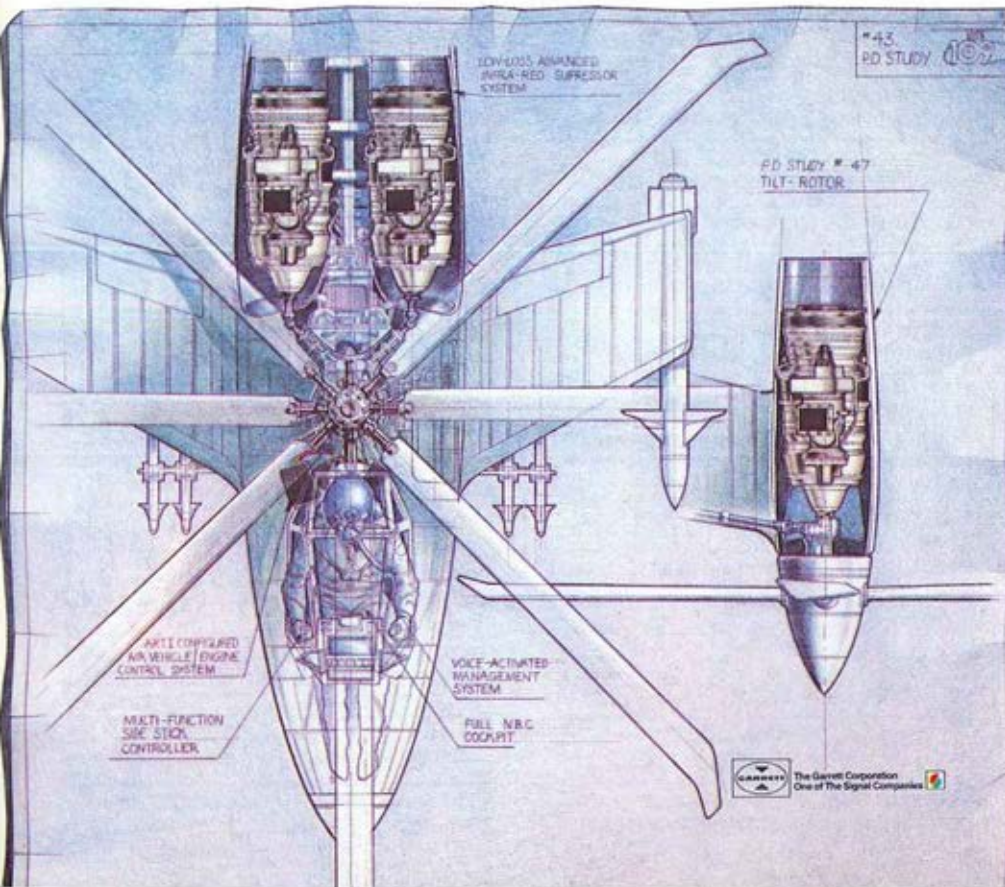

By IOC, the identical power section of this advanced turboshaft will have proven itself in over 1000 production engines. Logging nearly a million flight hours. And demonstrating, not boasting, more than 30% reduction in fuel consumption over engines currently in inventory.

Because the turbofan version of the TSE109 was built to unparalleled military design and test criteria, it will set a new standard for performance, durability and safety. And because experience teaches that needs do change, Garrett is building the TSE109 with power growth capability to over 1500 SHP.

The TSE109. Before it ever came off the drawing board, we proved our know-how in nearly 50,000 production units. Including over 15,000 propulsion engines,

like those aboard the OV-10A Close Support Aircraft. And we back up that technology with advanced production facilities, a nationwide vendor base, and an Integrated Logistics Support network. For detailed information, contact Propulsion Engine Sales, Garrett Turbine Engine Company, P.O. Box 5217, Phoenix, Arizona 85010, (602) 231-1037.

# GARRETT

**Mission:** The mission of the 24th CAB is to provide aviation support for the 24th Infantry Division, a Rapid Deployment Force unit. Anti-armor operations in multiple scenarios/environments; air assault; logistical resupply; command and control for the Division and USC headquarters; and aviation intermediate maintenance, are all performed by the 24th CAB, at short notice and on a worldwide basis.

# LHX and the new Hughes Helicopters.

*Hughes' 340,000-square-foot Advanced Development Center will be completed by mid-1986.*

*Artist's rendering of new Hughes facility at Mesa, Arizona.*

## Now the commitment is greater than ever

This is the *new* Hughes Helicopters at Mesa, Arizona, where work begins on a masterplan that calls for an additional 1.3 million square feet of factory, laboratory and office space.

Included is a giant 340,000-square-foot Advanced Development Center. It is to be completed by mid-1986 and consists of engineering laboratories, simulation facilities and prototype assembly.

As Hughes Helicopters' work in support of the U.S. Army's LHX Program moves toward full mission simulation, the company is more committed than ever to meeting the biggest challenge in the

history of rotorcraft. That challenge is the development of a new family of helicopters to support Army 21. A new and technologically advanced generation of rotorcraft that could help the Army fight and win on a battlefield of the 21st century.

The Hughes commitment is more than a matter of facilities. It is people. It is dedication. It is belief in the Hughes LHX Team effort. It is a commitment that is greater than ever.

**Hughes Helicopters, Inc.**  
Culver City, California 90230

We build visual systems. Vital™ Visual Simulation systems.

Which means that if you like the looks of our visuals, you can combine the reliability, low cost, and visual imagery of Vital with any simulator you choose.

That's exactly what 67 commercial and military customers did at more than 200 installations around the world. And when you see the realism of our day, twilight, and night imagery—when you're aware of the versatility we've built into the system—you'll know why they came to McDonnell Douglas.

Why don't you? Call us at (314) 925-4467.

# Cardion

Cardion's management and key personnel provide a broad spectrum of experience combining engineering and production talent with systems management. Since its inception in 1960, Cardion has demonstrated its competence through successful performance—evidenced by its steady growth in new business areas, sales, personnel, and plant facilities.

With its emphasis on original design, Cardion has a proven record of achievement in the areas of: **Air Traffic Control (IFF/SSR/DME/VOR/ILS), Communications, Display, Radar, Meteorological Systems.** The systems engineering design groups are supported by experienced engineering services and product support departments.

**Mission:** The U.S. Army Aviation Systems Command (AVSCOM) is a major subordinate command of the U.S. Army Materiel Command (AMC). AVSCOM employs approximately 5,500 civilian and 370 military personnel and serves as the AMC lead command for life cycle man-

agement of all Army aircraft and related items. This cradle-to-grave management process begins with research and development, production, maintenance, overhaul, and eventual disposal. Overall, the command provides logistics and insures readiness of aviation materiel for the Army worldwide.

GENERAL  ELECTRIC

port of ground forces. The AAH will be agile and highly maneuverable, superior to all other Army aircraft in survivability, capable of day or night operation under adverse weather conditions, and include a Target Acquisition/Designation System and Pilot Night Vision System (TADS/PNVS). Its primary armament system is the HELLFIRE missile and its secondary armament is composed of a 30mm cannon utilizing M788/789 ammunition and the 2.75 inch rocket system. Directly responsible for program management of the AAH and for integration of related mission equipment and subsystems into the overall AAH System.

**Aviation Life Support Equipment  
AMC Project Management Officer**  
ATTN: AMCP0-ALSE (Bldg 105-2nd Fl)  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

**Proj Management  
Officer:**  
Mr. A.B.C.  
Davis

Com'l: (314) 263-1218; AV: 693-1218

\*\*\*

**Mission:** Serves as the central focal point for AMC on all ALSE readiness matters and provides executive management and centralized coordination within AMC elements. Coordinates priorities and objectives of ALSE programs and serves as the AMC representative with other Army commands, services, and agencies.

**Aviation Officer**  
ATTN: AMSAV-A (Bldg 105-SLASC)  
US Army Aviation Systems Command  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

**Aviation  
Officer:**  
COL William  
B. Wilder

Com'l: (314) 263-4341; AV: 693-4341

\*\*\*

**Mission:** The mission of the Aviation Office is to serve as the focal point within the Army Materiel Command (AMC) and act as principal advisor to the AMC Commander for aviation matters. Exercise control over the management of all aircraft assigned within AMC except developmental or experimental aircraft, the administration of aviation programs pertaining to flight operations, standardization and aviator qualification, transaction training, flight minimums and examination requirements, and aviation medicine, as they relate to all military and DAC aviation personnel.

**BLACK HAWK Project Manager's  
Office**

ATTN: AMCPM-BH (Bldg 105-1st Fl)  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

**Project  
Manager:**  
COL Ralph H.  
Lauder

Com'l: (314) 263-1800; AV: 693-1800  
Dep Program Mgr: Mr. Conrad Busse  
Com'l: (314) 263-1802; AV: 693-1802

\*\*\*

**Mission:** The mission of the BLACK HAWK Project Manager's Office is planning, programming, budgeting and execution of all design, development, product improvement, testing, production, fielding and logistic support

of this weapon system and adapted mission equipment. Coordination of activities with other DOD services concerning their adaptation of this helicopter is also charged to this office.

#### CH-47 Modernization Program Project Manager's Office

ATTN: AMCPM-CH47M (Bldg 105-1st Fl)  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

Project  
Manager:  
COL Norbert  
I. Patla

Com'l: (314) 263-1411; AV: 693-1411  
Deputy Commander for Research and  
Development: Mr. John P. Clarke  
Com'l: (314) 263-1411; AV: 693-1411  
Sr NCO: CSM James K. Brock  
Com'l: (314) 263-1018; AV: 693-1018

\*\*\*

**Mission:** The CH-47 is a medium lift transport helicopter used for artillery movement, missile transport, personnel movement, aircraft recovery, medical evacuation and the transport of liquid (fuel) and dry bulk (ammunition). It has the capability of carrying cargo internally or externally depending on cargo configuration. The CH-47D is capable of carrying either 33 troops or 24 litter patients internally, has three hooks for external loads, and augments surface transportation systems to meet time-sensitive Army requirements.

# Commonality.. interoperability

SINCARS  
AIRBORNE  
TRANSCIVER  
AN/ARC-201

SINCARS  
MANPACK  
AN/PRC-119

ITT's SINCARS ground and airborne transceivers provide the total new VHF-FM combat net radio system for the U.S. Army. Common interior module family. Common logistics support. Assured interoperability when the secure and jam-resistant message must get through. From ITT...a world leader in communications technology.

For technical and program planning information, contact the SINCARS Product Line Manager, ITT Aerospace/Optical Division, ITT Corporation, 3700 East Pontiac Street, P.O. Box 3700, Fort Wayne, Indiana 46801. Telephone: 219-423-9636. TWX: 810-332-1413.

Aerospace/Optical Division **ITT**

Com'l: (314) 263-1376; AV: 693-1376

\*\*\*

**Mission:** Mission is to perform the National Inventory Control Point operations for integrated materiel management of assigned items and weapon systems to enhance materiel readiness. This includes requirements determination, budgeting, procurement/overhaul/disposal direction, distribution management and cataloging functions on 50,000 items with depot inventory of \$2.7 billion. Simply stated Directorate for Materiel Management must buy the right items in the right quantities at the right time and store them in the right place for issue.

#### Directorate for Plans and Analysis

ATTN: AMSAV-B (Bldg 105-2nd Fl)  
US Army Aviation Systems Command  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

Director for  
Plans and Analysis:  
Mr. Edward  
P. Laughlin

Com'l: (314) 263-1171; AV: 693-1171

\*\*\*

**Mission:** Mission is to manage the Command's operations research/systems analysis and cost analysis/estimating activities with primary concentration towards the acquisition of military hardware. The Directorate provides control, direction, guidance, and coordination for the Command's Life Cycle Costing and Systems Analysis activities that include analytical expertise in the fields of statistics, aeronautical and industrial engineering, economics and computer science. Such activities are in response to the results-oriented requirements associated with Army aviation weapon systems analysis, cost methodology, cost research, risk, sensitivity and survivability

analysis, and the cost estimating for both research and development of future helicopter systems as well as logistical support and data relating to operational aircraft.

#### Directorate for Procurement and Production

ATTN: AMSAV-P (Bldg 102-2nd Fl)  
US Army Aviation Systems Command  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

Director for  
Procurement and  
Production:  
Mr. John  
W. Schmitz

Com'l: (314) 263-3125; AV: 693-3125

\*\*\*

**Mission:** The Directorate for Procurement and Production is responsible for the overall management of the Command acquisition program which encompasses acquisition planning, contract execution and management, initial production planning, contract cost and price analysis, staff surveillance over the DOD Plant Representative Offices and the contracting elements within subordinate activities, and reporting on assigned programs.

#### Directorate for Product Assurance and Test

ATTN: AMSAV-Q (Bldg 105-1st Fl)  
US Army Aviation Systems Command  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

Director for  
Product Assurance  
and Test:  
Mr. Edward  
J. Hollman

Com'l: (314) 263-1500; AV: 693-1500

\*\*\*

**Mission:** The role of AVSCOM Product Assurance is to assure that aviation weapon systems do the job for the soldier. From development of the product to fielding and use by the soldier, Product Assurance is an independent evaluator. Reliability, Availability, and Maintainability requirements are defined early during design. Production is monitored and the product is warranted against defects. Data is collected in the field to measure user satisfaction. Whenever problems occur, Product Assurance tracks corrective actions. The result of these efforts is a reliable weapons system that will work for the soldier in the combat environment.

**Directorate for Systems Management**

ATTN: AMSAV-W (Bldg 105, 2nd Fl)  
US Army Aviation Systems Command  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

Director for  
Sys Management  
LTC (P) Leroy  
L. Horvath

Com'l: (314) 263-1211; AV: 693-1211

Dep Director: Mr. Lloyd Cornell, Jr.

Com'l: (314) 263-1211; AV: 693-1211

\*\*\*

**Mission:** The Directorate for Systems Management plans, programs, and budgets for assigned systems, subsystems and support equipment other than those managed by Program/Project/Product Managers; exercises executive authority in budget execution, procurement, and operational support actions relative to the assigned systems; and, as Command Control Point, coordinates special aviation related programs such as avionics and weaponization. The directorate is also the Com-

mand Control Point and POC for the US/Canadian Defense Development Sharing Program (DDSP).

**Weapon System Management Officer  
for Aviation Ground Support Equip-  
ment (AGSE) (ATTN: AMSAV-WS)**

WSMO for  
Ground Support  
Equipment:  
Mr. Valentin  
C. Berger

Com'l: (314) 263-1294; AV: 693-1294

\*\*\*

**Mission:** Provides for intensive life cycle management for all common primary items of AGSE. These include sets, kits, and outfits (SKO) and Test Maintenance and Diagnostic Equipment (TMDE), along with general support items such as maintenance work platforms, ground handling and servicing equipment, power supply and cleaning, delcing and decontamination equipment, and a growing variety of other essential gear.

**Weapon System Management Officer  
for Fixed Wing Weapon System  
Management (ATTN: AMSAV-WP)**

WSMO for  
Fixed Wing  
Aircraft:  
LTC Don R.  
Watson

Com'l: (314) 263-1233; AV: 693-1233

\*\*\*

**Mission:** Responsible for the centralized life cycle management of all Army utility fixed wing aircraft. This function includes procurement, configuration control, product improvement, and

materiel release of existing and new aircraft systems. Serves as the single worldwide point of contact for special mission requirements and technical and maintenance related problems for assigned aircraft. Function includes total management of the C-12 logistics support and flying hour program. Serves as chairman of the C-12 Joint Service Program Manager and is the Army point of contact for the confiscated aircraft program.

**Weapon System Management Officer  
for Multiapplication Items**  
(ATTN: AMSAV-WK)

Acting WSMO  
for Multiap-  
plication Items:  
Mr. Ivy  
A. Smith

Com'l: (314) 263-1231; AV: 693-1231

\*\*\*

**Mission:** Provides systems oriented intensive management of all aircraft subsystems and modifications required for first-to-fight and other high priority units (committable forces) to fight and survive in a specified theater of operations or environment. The hunter-killer concept is considered in filling force requirements through the programming, budgeting, procurement, and application of equipment and subsystems/modification resources to assure that system mixes (attack, cargo, observation, and utility) are considered in the readiness posture.

Molloy

Com'l: (314) 263-1229; AV: 693-1229

\*\*\*

**Mission:** Responsible for the overall readiness posture, systems and subsystem interface, product improvement programs, and system budgeting for all OH-58, OH-6, and TH-55 helicopters in the Army system.

**Weapon System Management Officer  
for Special Projects**  
(ATTN: AMSAV-WZ)

WSMO for  
Special  
Projects:  
LTC Richard  
H. Reed

Com'l: (314) 263-3093; AV: 693-3093

\*\*\*

**Mission:** Centrally manages the total logistics efforts in support of highly classified and sensitive JCS/DA directed special aviation program. Manages an extensive aircraft modification effort involving observation, attack, cargo, electronic, multi-mission, and utility helicopter systems. Modifications include cockpit enhancement, armament, avionics, night vision, internal cargo handling, and auxiliary fuel subsystems. Supervises a Logistics Task Force, providing responsive resolution to aircraft maintenance and support problems for special operational units.

# If it's Green, it's Clean

Increased pilot efficiency is a key reason for the success of Canadian Marconi Opto Electronic Vertical Scale Engine Instruments. The displays can be read at a glance and color changes get the pilot's attention, even at the edge of his field of view.

For the tandem seating in the Apache, Canadian Marconi kept the forward cockpit panel "clean" in another sense. Using a selectable parameter digital display saved the space and weight of four out of six dedicated displays.

If you are ready to go ahead with a clean, efficient cockpit, talk to CMC and get the green light.

Canadian Marconi Opto Electronic  
Vertical Scale Engine Instruments

Dep Program Mgr: Mr. George Singley  
Com'l: (314) 263-1004; AV: 693-1004

\*\*\*

**Mission:** The mission of the LHX PMO is to exercise executive authority for the centralized management of the LHX system and its related subsystems. The mission includes the responsibilities of developing and acquiring an LHX system which provides two basic configurations: a light attack version that performs armed reconnaissance and light attack missions, and also a light utility version. LHX attack and utility versions will have about 70% commonality. The LHX mission also includes planning, directing and controlling the allocation and utilization of resources; developing, testing, producing, deploying, and supporting the LHX throughout its life cycle; training its operational and support personnel; and, executing the program to insure that schedule and cost constraints are not violated.

**Spare Parts Program Manager's  
Office**

ATTN: AMSAV-3 (Bldg 105, 2nd Floor)  
4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

**Program  
Manager:  
Mr. James R.  
Brennan**

Com'l: (314) 263-1363; AV: 693-1363

**Mission:** This program has been established to orchestrate the Command efforts to achieve the competition and spare parts acquisition improvement goals and objectives of the SECDEF/DCSLOG and AMC. As a small management office with a big responsibility, the staff must transition Army Aviation's acquisition strategy from a dependence on buying from prime contractors and other non-competitive sources to buying more competitively while maintaining a positive readiness stock posture in the supply system. The mission of the organization is succinctly defined in its ABCs statement on aviation parts, Availability, Breakout and Competition.

**Special Electronic Mission Aircraft Product Manager**

ATTN: AMCPM-AE (Bldg 105, 2nd Floor)

4300 Goodfellow Boulevard  
St. Louis, MO 63120-1798

Project  
Manager:  
COL Robert  
Fairweather, Jr.

Com'l: (314) 263-1334; AV: 693-1334  
Dep Proj Mgr: Mr. Robert Hutson  
Com'l: (314) 263-1334; AV: 693-1334

\*\*\*

**Mission:** This program is chartered to develop a Remotely Piloted Vehicle (RPV) System to perform target acquisition, designation, aerial reconnaissance, artillery adjustment, and battlefield post-strike assessment. Laser designation will be provided for

all Army and Air Force laser-guided munitions. The RPV System will extend the attack capability of commanders beyond the forward line of troops to the full range of artillery and close air support weapons. It focuses on the area beyond the first 5km where forward observers and ground systems are ineffective and the risk to manned systems is high because of the enemy's sophisticated air defense systems. Future preplanned product improvement plans call for providing a night capability through use of a Forward Looking Infrared (FLIR) sensor package, multiple air vehicle control from a single ground control station, extended range and additional sensor payloads.

### **MISSOURI (Springfield)**

Missouri Army National Guard  
 Army Aviation Flight Activity  
 RFD 6, Box 385 - Regional Airport

# To build the world's most advanced short-range recovery aircraft,

## the Coast Guard started with the world's most advanced helicopter.

If your mission's worth doing, it's worth doing well.

At least, that's the attitude the Coast Guard took when they chose Aerospatiale's Dauphin 2 to form the foundation of their new SRR aircraft — the HH-65A Dolphin.

The Dauphin 2 represents a decade's worth of Aerospatiale ingenuity. It utilizes the industry's finest composite materials technology in the rotors and airframe. For significant gains in speed and range.

Along with the proven composite main rotor blades, it incorporates our Starflex fiberglass rotor head, made up of 70% fewer parts — and 60% less weight — than conventional rotor heads.

The all-composite fenestron, Aerospatiale's unique fan-in-fin tail rotor, gives the Dauphin 2 unmatched safety, excellent stability, high anti-torque thrust and low drag at high speeds.

The Coast Guard added Collins avionics to

integrate systems operation with consistent, simplified cockpit procedures. Routine communication, navigation, flight control and mission management tasks are automated, freeing the pilot to concentrate on visual search and radar interpretation.

Aerospatiale Helicopter Corporation is an approved government contractor. We can provide appropriately modified versions of the most advanced helicopters in the world today... the Dauphin 2, the TwinStar and the Super Puma.

Can *your* mission settle for anything less?

Call Paul Domanovsky, Vice President-Government Marketing, Aerospatiale Helicopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053-4005. (214) 641-0000.

*Aerospatiale is More... Aerospatiale Helicopter Corporation is a wholly-owned subsidiary of Aerospatiale of France.*

## SCIENCE / SCOPE

U.S. troops will be able to communicate reliably at extended ranges with a new family of high-frequency tactical radios. Three versions of the improved high frequency radios (IHFR) will operate beyond normal line-of-sight and over rough terrain, including desert, mountain, and jungle environments. The radios combine totally automatic tuning with high performance in a rugged lightweight package. Units are constructed in modules to permit rapid troubleshooting and repair and to allow for improvements as new technology is developed.

One radio is a 20-watt Manpack unit (AN/PRC-104) that is carried on a soldier's back. The second is a 20-watt radio (AN/GRC-213) deployed on vehicles. The third is a 400-watt high-power mobile command radio for use over longer ranges. Hughes Aircraft Company produces the radios for the Army.

A new kind of helicopter-mounted rocket launcher—which has proven to be less costly, more durable, and lighter than existing models—has been made possible by an advanced manufacturing technique developed by Hughes in producing TOW antitank guided missiles. The U.S. Army launcher is made in two versions, one for 19 rockets, the other for 7. Although inexpensive enough to be disposable, the launcher can be reused for as many as 32 firings.

Weight and cost savings stem from using an electromagnetic force to press the aluminum skin and tubes of the launcher into the three aluminum support structures. This process greatly cuts labor costs and lowers the weight associated with such conventional metalworking techniques as welding.

For more information write to: P.O. Box 11205, Marina del Rey, CA 90295

\*\*\*

**Mission:** To provide aviation support for the division headquarters, support command, and divisional units without organic aircraft. Provides attack aircraft to destroy enemy armored, mechanized, or other forces as an integral part of the Combined Arms Team. Additionally, provides a divisional aviation staff section. The Battalion is equipped with AH-1S (MC), UH-60, UH-1H, and OH-58 Aircraft. The Battalion's F Company provides AVIM-level maintenance for all divisional aircraft.

Yes, Litton Amecom's MicroCue performs the long range identification, and precision localization of enemy radars that expose the enemy and leave it nowhere to hide.

MicroCue increases mission effectiveness. It cues infrared imaging and television systems as well as infrared/RF missile seekers to selected enemy airborne and ground-based targets. It performs countermeasure-resistant, passive radar

detection for cueing narrow beam surveillance/fire control radars. It identifies and localizes primary or secondary targets for jammer set on.

Platform versatility.

That's what distinguishes our MicroCue system today. Unique modular architecture in both antenna and processor units enables the system to adapt to a virtual multitude

of helicopters and ground systems.

Whether installed in either a fixed or moving mount, MicroCue will deliver a highly precise—and vital—function, even in a severe multi-path environment.

The MicroCue Radio Frequency Interferometer System is a force multiplier you can't afford to be without. For a free copy of our detailed MicroCue brochure, write or call: Director of EW Marketing, Litton Amecom, 5115 Calvert Road, College Park, Maryland 20740. (301) 864-5600.

If your targeting mission requires detection, identification and location of enemy radars from helicopters and ground systems, take a cue from us.

Alexandria, VA 22333

Chief, Evaluation & Test Division:

**WHAT GOOD ARE ALL  
THE KING'S HORSES IF  
THEY'RE 300 MILES FROM  
ALL THE KING'S MEN?**

With our existing force of large transports, we're able to airlift sizable quantities of cargo from the U.S., but only to those airfields

with runways large enough to accommodate these big planes. Smaller aircraft must complete the movement into smaller, forward-area bases—where the troops are.

The new McDonnell Douglas C-17 can land on short, unimproved runways and can make direct deliveries of cargo—the

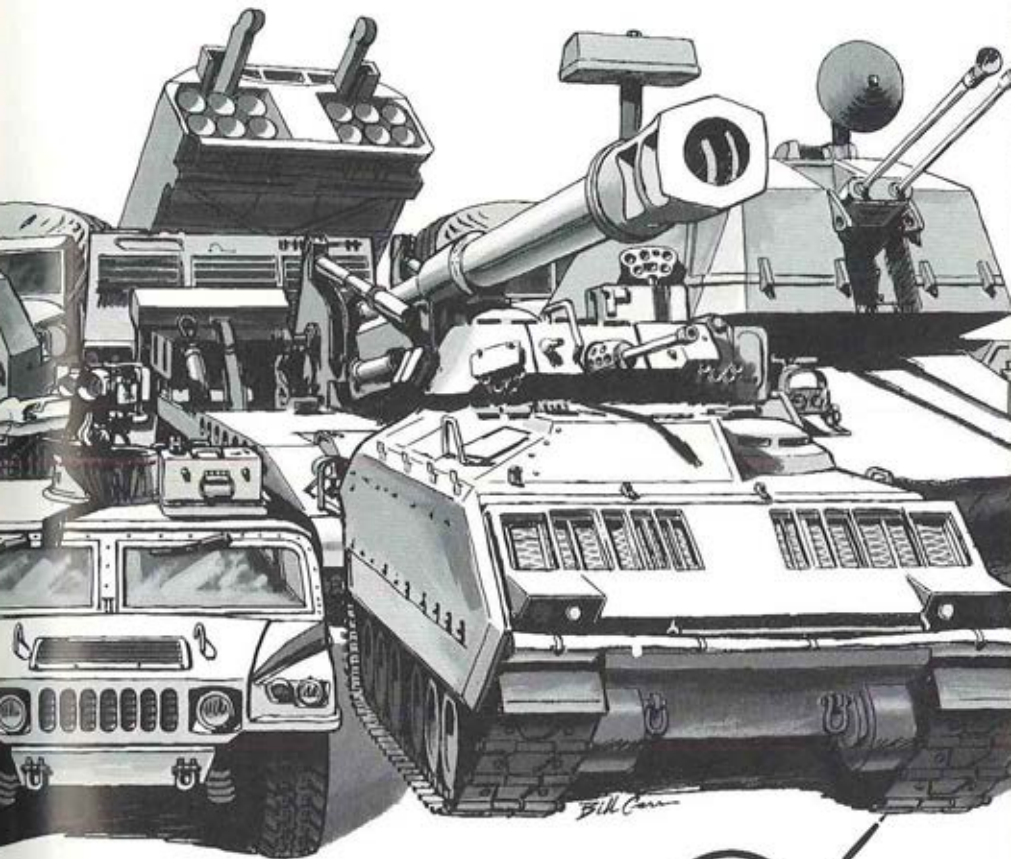

biggest tanks, artillery pieces, even helicopters—to forward areas.

On the ground, the C-17's exceptional maneuverability speeds delivery. This aircraft can be turned completely around in just 90 feet. It can back up. It can be maneuvered into small ramps

and even unloaded with the engines running without disrupting ground operations.

The result: a rapid, sustained flow of needed cargo right to the "king's men."

**The C-17. Brings the mission down to earth.**

**Mission:** To plan, manage and execute  
 exploratory and advanced development

programs assigned by the Director, RTL,  
 through contracts and independent in-  
 house research. Assigned research and  
 development plans are primarily related  
 to the application of technological  
 developments in aeronautics, struc-  
 tures, propulsion, aircraft subsystems  
 and equipment, weaponization, and  
 military operational considerations, and  
 the integration of these developments  
 into Army airmobile systems.

# The CIA depends on INDEPENDENT THINKERS

...so does  
our nation

- Economics or econometrics
- Operations research

You must have an interest in military

Few organizations can offer you a career that stimulates your intellectual curiosity by giving you the responsibility for interpreting and reporting information vital to our nation's security. You can find a professional challenge like this with the CIA.

The Central Intelligence Agency is seeking people to join us as Military and Politico-Military Analysts. In these positions, you will support national policymakers by preparing analyses of foreign military programs, activities, capabilities, and intentions. These positions require individuals who can perform in both a fast-paced and deep research environment . . . who don't have to rely on book answers to solve problems . . . who can think on their feet, gather information, and analyze and communicate this information concisely and accurately.

To qualify, you must have a graduate or undergraduate degree and a strong academic record. Background, training or experience in one or more of the following areas is of particular value:

- Security studies
- Foreign area studies
- Political science
- History
- International relations

affairs as well as history, and excellent writing and analytical skills. Military and overseas experience are desirable, but not necessary. There are also opportunities for foreign travel. Foreign language skills are useful, but not essential.

The CIA offers competitive compensation, complete training, and excellent advancement potential for skilled people who can meet the challenges these positions present. Starting salaries range from approximately \$18,000-\$40,000 per year, depending on academic background and work experience. We offer retired military opportunities on a one-year renewable contract basis. You also will enjoy living and working in the Washington, D.C. area, where you will have access to numerous cultural, athletic, and historic attractions.

If you would like to be considered for one of these positions, forward your resume to:

Personnel Representative  
Dept. S, Rm. 4N20 (A50)  
P.O. Box 1925  
Washington, D.C. 20013

## Central Intelligence Agency

The CIA is an Equal Opportunity Employer. U.S. citizenship is required.

SGM: Roy H. Barefoot

**Mission:** The 501st Aviation Battalion (Combat) is the Eastern-most forward deployed Aviation Battalion in USAREUR, consisting of 1200 personnel, 136 aircraft and located at 4 strategic locations in the Federal Republic of Germany. The Battalion supports the 1st Armored Division's mobile armored warfare concept with 1 General Support Aviation Company, 2 Attack Helicopter Companies, 1 Aviation Intermediate Maintenance Company, 1 Combat Support Aviation Company, and a SOTAS/QUICK FIX Company. The Battalion acts as a combat multiplier in the 1st Armored Division as a rapid, mobile maneuver element in the Division General Defense Plan.

## Ametek's new vertical scale displays reduce weight, power and cost.

Featuring all solid state design, these vertical scale instruments offer major advantages over incandescent lamp/optoelectronic systems. For example, weight is reduced by 50% (not including the reduced cabling requirements) and power consumption is about 1/8 that of an incandescent system. Plus, there's never a burned-out filament to reduce resolution and lower MTBF.

The liquid crystal display with electroluminescent backlighting improves visibility under a wide variety of ambient light conditions. This technology is compatible with GEN II/GEN III night vision goggles. And, with the reduced maintenance and spares requirements, there are significant cost advantages too. For additional information, contact Military Marketing Manager, AMETEK Aerospace Products, Sellersville, PA 18960. (215) 257-6531. Telex: 84-7445.

SERVING THE WIREGRASS FOR OVER A DECADE

# Planning underway for the 1985 AAAA Nat'l Convention in St. Louis

**P**LANNING is underway for the 1985 AAAA National Convention to be held March 28-31 in St. Louis, MO. The professional sessions tied to the Association's 28th national gathering will be held in the Cervantes Convention Center in downtown St. Louis with the Sheraton St. Louis Hotel — located just across the street from the Convention Center — serving as AAAA's headquarters hotel.

**Brigadier General Ronald K. Andreson**, the AAAA's Lindbergh Chapter President, will serve as the 1985 Chairman of the Presentations Subcommittee, and is currently drafting a two-day program of presentations that will open at 2 p.m. on Thursday, March 28, and conclude at noon on Saturday, March 30.

## Theme: "TEAMWORK"

In posting the theme for the 1985 Professional Program, **General Andreson** commented, "Successful advancements in Army Aviation depend upon the cooperative and cohesive efforts of the total Army team. Each member of this team — User, Developer, Industry/Trainer/Reserve Components — plays a key role. Our theme, "TEAMWORK: KEY TO SUCCESS," will provide an avenue for discussions highlighting the importance of this integrated effort."

Specific details as to the names of the presenters, and the subjects and times of their presentations will be provided at a later date.

Acting on the requests of many mili-

tary and industry members who, in the past, have been turned away by the various headquarters hotels, the AAAA National Office, in 1985, will handle the advance reservations and the assignments of all sleeping rooms and suites at the Sheraton St. Louis Hotel.

This Ass'n administration will pertain to the 1985 Convention blocks of rooms to be held through Monday, February 25 at both the Sheraton St. Louis and Radisson St. Louis Hotels. Reservations for rooms or suites received for either hotel after this date will be accepted at the AAAA Nat'l Office on a space-available basis.

An **Advance Registration Form** for the 1985 Convention, a **Hotel Room Reservation Form**, and additional details on the professional programming will appear in the November issue.

## Additional Chapter Delegates now authorized by the By-Laws

At its September 22 Quarterly Business Meeting, the AAAA National Board approved an action wherein the number of Chapter Delegates authorized by the AAAA By-Laws, and the amount of the refund provided to each Delegate, would be **increased by 25%**, effective with the 1985 National Convention.

The Board action was taken to encourage greater attendance by AAAA members at the annual National Convention and the General Business Meeting held at each Convention.

The final number of Delegates authorized to a Chapter will be based upon a Chapter's membership total at the end (January 31, 1985) of the 1984-1985 Membership Enrollment Competition.

Under the new Refund Program, Delegates will be asked to pay the full Convention Fee for Registration and all functions, and will be reimbursed the Delegate Refund after the Convention.

**BRIG. GENERAL  
RONALD K.  
ANDRESON,  
1985 CONVENTION  
PRESENTATIONS SUB-  
COMMITTEE CHAIRMAN**

**INDUSTRY WINNERS** — The AAAA Lindbergh Chapter held its 1984 "Industry Awards" dinner in September during the 11th Annual Joseph P. Cribbins Product Support Symposium in St. Louis, MO. Shown from left to right are: Chapter President BG Ronald K. Andreson; John R. Myers, VP & GM, Avco Lycoming, who received the "Individual Industry Member

Award;" Mr. Cribbins, Special Ass't for Aviation Logistics, ODCSLOG, DA; James Demo, Quality Control Manager, General Mechatronics, accepting the "Small Business Organization Award;" Hans Weichsel, VP for Customer Support Services, Bell Helicopter Textron, accepting the "Team Group, Special Unit Award;" and Richard F. Kaiser, Chapter VP for Industry Affairs.

**PRESIDENTIAL VISIT** — MG James C. Smith, Retired, AAAA Nat'l President, recently visited with the Morning Calm Chapter in Seoul, Korea, which enjoys outstanding sustaining membership support from Korean nationals. Shown standing (L to R): An Sang

AMERICAN ELECTRONIC LABORATORIES, INC.

# AERO DIVISION

**Integration, installation and testing of  
weapons systems and avionics**

The Aero Division of AEL provides system engineering to integrate and install these systems in production and QRC modes. This capability applies to both rotary and fixed wing aircraft. The Aero Division of AEL, located at Allaire Airport, Farmingdale, NJ and Reading Municipal Airport, Reading, PA, offers unmatched efficiency and economy in the retrofit of armament/protection systems such as the AIM-9L

Sidewinder missile system and the AN/ALE-39 chaff dispensing system and communications, navigation and identification equipment.

Whether your requirements entail assembly of kits and wiring harnesses, EMI/EMC/TEMPEST testing, or updating of aircraft with equipment manufactured by AEL and other leading organizations, the AEL Aero Division is ready to provide cost effective service.

AEL has immediate, long-term employment opportunities in many challenging advanced technology areas. For more information, contact: Director of Recruitment.

# Cash award prizes upped six-fold for Membership Enrollment Contest

AAAA is now in its THIRD month of the '84-'85 Membership Enrollment Competition, and the goalposts have been moved closer!

In an effort to spur both large and small Chapters, the National Executive Board approved a six-fold increase in the cash award prizes that will be presented to the winning Chapters at the 1985 National Convention.

Instead of one "Membership Gain" and "One Percentage Gain" Competition for all Chapters, the Board approved a plan wherein:

(1) It will open BOTH competitions — "Membership" and "Percentage" Gain —

to each of THREE categories of Chapter size — in effect, holding SIX separate Competitions, instead of just two.

(2) It will limit the number of "Competitor Chapters" to those within a Chapter's AAAA category — large, medium, or small, or as re-named, Master, Senior, and AAAA Chapters. The Chapter's category was determined by its 1 August membership standing.

The three separate Cash Awards are \$1,000, \$500, and \$350 for "Membership Gain" and the other three cash awards are \$500, \$250, and \$175 for "Percentage Gain."

Go for it!

## New selection and submission rules developed for AAAA nat'l awards

The selection and submission policies relating to CY 84 AAAA National Awards, as pursued by both Regions and Chapters, have been modified by the National Executive Board with its adoption of the following Putnam-Marr proposal:

"Normally, nominations for National Awards will be submitted directly to the National Awards Committee. However, an AAAA Region may elect to appoint its own Awards Committee to nominate candidates for the various awards. All nominations within a Region should then be considered by the Regional Awards Committee and only the winners of the Regional competition will be accepted for consideration by the National Awards Committee as candidates in the national selection process.

"Should a Chapter that is NOT within a Regional organization choose to organize its own selection process, then all nominations from within the Chapter area should be considered by that Chapter Awards Committee, and only the

winners of that Chapter selection process will be considered by the National Awards Committee.

"This policy, as it applies to Regional or Chapter Awards Committees, is permissive and should NOT be construed to mean that Regions or Chapters are required to have a nomination and selection process."

### Last Hurrah?

Amidst rumors that the AFRC will not permit AAAA's USAREUR Region to utilize the Garmisch facility beyond 1985 during ski season, the Regional Board is continuing with its plans to hold its 26th Regional Convention the week of March 16-23. The nine-chapter organization sponsored its 5th Aviation Ball on November 3.

### Next month

The next issue of *Army Aviation* will feature a special report from COL Willis Bunting, Chief, WO Division, MILPERCEN.

**CLASS PHOTO** — Army Aviators in the Class of 1985 at the Army War College gathered recently for a group photo. Front row (L to R): LTC Bud Beasley, LTC Ben Knisley, COL Willy Tempton, COL Billy Hall, LTC Mike

Chestain. Back row (L to R): LTC Dave Carothers, LTC Bill Gram, LTC Bill Turner, LTC Brian Mullady, LTC Lynn Handy. Not present: COL Bob Arrington, LTC John Bradley, LTC Jack Easton.

**MASTER AVIATOR** — LTC Ronald B. Carpenter, left, Heavy Lift Research Vehicle Program Manager, Applied Technology Laboratory, Ft. Eustis, VA, receives the Master Army Aviator Badge, the Army's highest level of pilot achievement, from ATL Director COL Patty E. Brown.

**AN EXPERIENCED CREW** — Shown at Ft. Rucker, AL, prior to departing for DC after LTG Jim Merryman's retirement ceremony last July are (L to R): MG Ben Doty, COL Ed Todd, BG Sam Cockerham, COL Les Gilbert, LTG Jim Merryman, MG Bobby Maddox (seeing them off), COL Walt Rundgren, COL John Todd, COL John Zuschwert. All are Master Aviators, fixed and rotary wing qualified, with one or more combat aviation tours. They represent over 36,000 combined flying hours in Army aircraft, and more than 200 years of Army Aviation service.

**MOVING AHEAD** — The first flight test for Boeing Vertol's Heavy Lift Research Vehicle (HLRV) is now expected in 1988 under a recent funding agreement between NASA, the Army, and the Defense Advanced Research Projects Agency (DARPA). The HLRV is designed to lift a payload of 35 tons — eight tons more than any other helicopter in the world.

**NOVOSEL RETIREMENT** — More than two dozen Medal of Honor winners are scheduled to attend retirement ceremonies on 30 November for CW4 Michael J. Novosel at the Center Parade Field, Ft. Rucker, AL. Novosel is a Medal of Honor winner, a member of the Army Aviation Hall of Fame, and the last World War II combat aircraft commander still on active duty.

**HEROISM!** — AAAA member CW2 Jerry W. Mobley has been awarded the Soldier's Medal, the Army's highest award for peacetime heroism, for his actions on 22 June '83 at Wheeler AFB, Hawaii. Mobley rushed to a burning OH-58 after it crashed, rescued one crew member, and made repeated attempts to save the pilot from the completely engulfed helicopter.

**Join AAAA in '85!**
