# Shorts aircraft and missiles. Multi-mission, single source.

**The answer to today's increasing demand  
for higher quality, lower cost defense.**

Shorts aircraft and missile systems offer such reliability and cost-effectiveness, you might think we saw the world's politics changing, and defense budgets shrinking.

Actually, what we saw was a need for aircraft and missiles that could handle a variety of missions and offered outstanding operating economics—backed by the best in contractor logistical support.

## Here's what we offer:

**SHORTS STARSTREAK**—Whether on Apache or Avenger, vehicular mounted or shoulder-launched, Starstreak has no challengers as a fast, accurate, lethal weapon system.

**SHORTS C-23 SHERPA**—The ideal multi-purpose light military transport. Entered USAF inventory in 1985 at Zweibrucken, West Germany. Recently procured by the Army National Guard and now moving into a third generation.

**SHORTS TUCANO**—The advanced turboprop trainer that combines outstanding aerobatic capabilities, stepped tandem seating and a jet-like "feel" with unmatched life-cycle economics. It is the equivalent of the RAF Primary Aircraft Trainer Systems.

For more information about our aircraft, missiles, and support programs, contact Short Brothers (USA), Inc., 2011 Crystal Drive, Suite 713, Arlington, VA 22202-3719. Or call us at (703) 769-8700.

# SHORTS

## HOW DO YOU MAKE THE STANDARD IN TACTICAL HF EVEN BETTER?

From Operation Just Cause to Operation Desert Storm, the U.S. Army has used our off-the-shelf HF radio to meet its long-distance and NOE communications needs:

The Bendix/King AN/ARC-199.

In fact, the AN/ARC-199 has seen action in a number of installations, ranging from front-line tactical helicopters and CINC Hawk airborne command centers, to flight following and air traffic control operations.

And combat enhancements to the AN/ARC-199 continue, including easy-to-use menu-driven software and a one-button-operation control display unit to minimize head-down input. In recent combat evaluations at Lakehurst, NJ, and Fort Rucker, AL, the AN/ARC-199 demonstrated its Automatic Link Establishment (ALE), digital burst modem and frequency-hopping ECCM capabilities—an unprecedented level of performance to bring to battlefield communications.

Engineered to operate through the standard 1553 military avionics bus and designed to interface with all Army-specified modems and communications equipment, the AN/ARC-199 is easy to install

and easy to use. Available at a fraction of the cost of other units, the AN/ARC-199 is an established interservice standard for off-the-shelf HF. And an Engineering Change Proposal has already been submitted to upgrade production radios with the new combat enhancements.

Currently in service with the U.S. Army and Navy on seven different rotary and fixed-wing aircraft types, including EA-6Bs and VIP VH-3s, the AN/ARC-199 has also been selected for the USMC OV-10 and follow-on vertical lift requirements. And a variant of the AN/ARC-199, the ARC-200, is flying in the USAF F-16 ADF, as well as in export versions of the F/A-18.

So, for tactical HF performance that's on the mark, start with the off-the-shelf leader from Bendix/King.

Our answer to  
mission management.

Let us show you the way.

We're SEXTANT Avionique, the world leader in flight control systems and man-machine interface. And we already have a head start in putting our technological lead into tomorrow's onboard systems.

For both civil and military pilots, we're developing higher technology navigation systems to ensure mission success under all conditions. Modern helicopters can perform wonders. But they need a high-tech hand to perform in rain, hail, sleet, snow, the glare of day or the dark of night. Over 700 helicopters worldwide carry the SEXTANT Avionique Nadir fuel management and navigation system, with its unique hybrid radar and inertial data configuration. And our Sextan primary reference sys-

tem is already in production for the Tiger combat helicopter under development by France and Germany.

Performance is the key to military applications. Thanks to our high precision navigation and air data measurement systems, aircraft from the Transall transport to the Rafale multirole fighter are expanding their mission capability envelopes.

In the civil transport field, reducing direct operating costs is a top priority. Our radio navigation systems are designed to help today's cost-conscious operators keep airliners on the most efficient flight path.

Whatever your mission, whenever you fly, SEXTANT Avionique is by your side to show you the way.

Redefining Avionics

# A Challenge For The Visionary

By Major General Rudolph Ostovich, III

**D**uring the course of an Army career, you see things that leave lasting images — things that are new, or different, or so amazing that you can vividly recall each minute detail of the scene after decades of service. As I turn over command of Fort Rucker and the duties as

your Chief of Branch to assume new responsibilities on the Joint Staff, I am reminded of two such scenes that will remain in my memory forever.

I was a young Infantry platoon leader at Ft. Lewis during a summertime FTX. We were hot, dirty and sweaty after walking for hours — the lot of the foot infantry. The objective was really not that far, as I recall, but the terrain was rugged, and the going was slow. An OH-13 appeared, suddenly out of nowhere, and flashed overhead at what seemed to be incredible speed — toward our objective! Nothing, absolutely

nothing, could have impressed me more at that particular place and time.

**MG Ostovich was Chief, Aviation Branch, CG, U.S. Army Aviation Center and Ft. Rucker, AL and Commandant, U.S. Army Aviation Logistics School at the time this article was written.**

If my platoon could only move like that, I thought, if we could only break friction with the ground it would take minutes instead of hours, and we would arrive fresh instead of dog tired on the objective. How much that meant. I remember it like yesterday.

On another occasion an O-1 Bird Dog pilot picked me up. I was a 4.2" mortar platoon leader. I had a radio, a map, and I could see for miles from the back end of that airplane. We flew just behind the mortars. I fired one round in adjustment. Then, it was fire for effect. It was easy, so quick. I could move. I could see. I was worth 20 ground observers. I imagined flying to any point, seeing, understanding, and firing whole battalions of artillery. Could it be this easy? Think of the power one soldier could control from the air. The mind reeled with possibilities. It seems like yesterday.

I had no way of knowing it at the time, but across the country, at Ft. Bragg, a

prestigious group of senior Army leaders were hard at work quantifying the advantages that had so impressed me. These were the days of the visionaries: Hamilton Howze, Jim Gavin, Harry Kinnard, and others. These men had a vision that would send the Army on a revolutionary course, and the units these men designed would prove themselves first against a mechanized enemy in the 'Carolina Trials'; then, against an elusive enemy in the jungles of Southeast Asia and through a series of smaller battles in the seventies and eighties. The original force and vision have taken us all the way to the Euphrates River and the nonlinear battlefield of DESERT STORM. Events of the last thirty years enable one to sense the intuitive correctness in the original designs of the Howze Board — the ability of helicopter forces to fight effectively in any kind of conflict.

You can look back and see the remarkable progress over the last thirty years — the swift, decisive victories of JUST CAUSE and DESERT STORM are the latest products of the concepts set in motion by the Howze Board. Yet, they provide only a glimpse of the full potential Army Aviation could achieve.

You can look forward into the coming era of reduced budgets and smaller forces and feel that we are just now at the starting point. From this point, the Army can travel down two paths; the first, where every piece of equipment, every organization, is put through the crucible of candid inspection to determine its real contribution to the fight (much as the Howze Board did) — or the second path, where the traditional views of the past preserve the status quo, with no regard to the tremendous technological changes sweeping the battlefield.

History has shown the traditional-minded military to be often unaware of the impact of technological change. The U.S. Navy of the thirties, for example, was centered around the heavily-armored battleship. Traditional wisdom held that the battleship was the centerpiece of the fleet, and would utterly dominate naval conflict well into the foreseeable future. Other ideas were ruthlessly suppressed. Then, in the space

of an hour, nearly every battleship in the Pacific fleet was sent to the bottom of Pearl Harbor by air attack.

Six months later, four Japanese carriers also found their way to the bottom of the Pacific — courtesy of air attack at the battle of Midway Island. Since then, the Navy defines the size of its forces by the number of carrier battlegroups it can put to sea. The airplane produced a revolutionary change in naval warfare.

We've recently experienced the same sort of phenomenon. Entire tank regiments — whole fleets of battlefield dreadnoughts — laid to waste in the blink of an eye by attack helicopters. Main battle air vehicles moved hundreds of kilometers at night and poor weather and killed moving tanks and stationary tanks in the open and behind revetments. It made no difference. Like the battleship sailors of Pearl Harbor, or the Japanese sailors at Midway, Iraqi tankers will never forget the feeling of utter helplessness against attack helicopters — the complete, debilitating terror as one tank after another exploded in the blackest of moonless nights — devastation wrought by an unseen, unheard enemy from distances measured in kilometers. How could they fight back?

It's really not a new revolution at all. Throughout history, the impact of technology has continually changed the face of war. An opportunity now exists. The time is right to structure the Army around those technologies and units that will be decisive on tomorrow's battlefield — and avoid a land force heavy with weapons of marginal utility. The Army must downsize to achieve an optimum balance, immaterial of proponent issues and traditional bias. The true future potential of the Army rests with well-trained, well-led soldiers, using the best equipment — an Army able to focus the most potent battlefield forces.

Army Aviation is such a force and, like the carrier-based strike aircraft of our naval forces, our attack helicopters must now become the centerpiece of our combined arms land forces. The challenge awaits the visionary — the one who is willing to take risk to bring about change. Air Attack! ■■■

## WE HELP KEEP THE INDIANS ON THE WARPATH.

Apache. Blackhawk. Chinook. Kiowa. Iroquois. They must be ready to fly and fight at a moment's notice.

That's why the Army turns to Lockheed for aviation unit maintenance, modification, and supply support. Lockheed knows what it takes to keep Army aviation units up and ready. We've been in the maintenance and modification business for decades. In fact, in 1989 AAAA recognized our sustained record of outstanding support by naming Lockheed Support Systems, Inc., as the recipient of the Material Readiness Award for an Industry Team. And in 1990, AAAA honored us with the Material Readiness Award for Contributions by a Major Contractor.

We contribute to the readiness of a variety of helicopters, including the AH-64, the UH-60, the CH-47, the OH-58, and the UH-1. With Lockheed, the Army has available the full range of the corporation's aerospace technologies and resources. Most importantly, though, we respond rapidly, whether it's to a stateside base or a forward combat zone like Panama or Saudi Arabia.

Lockheed, part of the Army team—anywhere, anytime.

 **Lockheed**

CPT Ludowese

# We Hear You!

by Company Grade Officer Affairs Committee,  
AAAA National Executive Board:

CPT Jill Ludowese, CPT Phil Martin and  
CPT Paul M. Steele, Chairman

CPT Martin

The good news is, we had a great response to our membership survey. The bad news is, the results confirmed our concerns about Company Grade Officer participation in AAAA.

For those of you who are not familiar with the Company Grade Officer survey, let us explain. In late 1989, BG James M. Hesson, Ret., then AAAA National President, began to form what would become the Company Grade Officer (CGO) Affairs Committee of the AAAA National Executive Board (NEB). Currently, the committee includes three officers of different aviation backgrounds: attack, fixed wing, and ATC. With the already established Warrant Officer and Enlisted committees, this committee would continue the trend towards complete representation on the NEB.

BG Hesson charged us with determining how CGO participation could be increased. Thus, we created the CGO Membership Survey. Its purpose: to solicit the attitudes, opinions and ideas to increase CGO participation in AAAA. It was a random survey of approximately half the CGO membership (Lieutenants and Captains). It consisted of 25 questions dealing with the officer's past, present, and future participation in AAAA and the reasons behind it. The survey also asked for written ideas on how to improve AAAA for CGOs. We received an overwhelming amount of these written comments which ended up being more enlightening than the multiple choice questions.

Probably the most important revelation was the individual reasons for joining AAAA. Although the number one reason given was to be a member of the Army Aviation professional organization, many cited command pressure to join as their first or second reason. This statistic seems to go hand-in-hand with the fact that more than half the officers said

CPT Steele

they do not participate in many of their chapter activities.

Although the reasons for not participating varied, the comments were very passionate. Many said that their chapter's activities did not interest them and/or were held at inconvenient times or places. So what we have, essentially, is a body of members that

comprise nearly seventeen percent of the total AAAA membership, some of whom joined due to command emphasis and/or do not participate because the local chapter is not responsive to their needs.

Surprisingly, we received more comments about the magazine than anything else. The comments ranged from wanting more articles of interest to CGOs to changing to a larger format. We have compiled and examined all the ideas and comments and, along with all the other issues, we will present them to the entire NEB with recommendations for action.

But we need your help. Many of the survey responses surprised and concerned us. Officers complained about things like the articles in the magazine and the lack of CGOs on their chapter boards. Yet these same officers said they would not write nor serve if asked.

The three of us on the NEB are trying our best to make AAAA an organization that is responsive to the needs and desires of the CGOs, just as the other representatives are for their membership groups. But much of this change must come from an active and vocal CGO membership. Volunteer to serve on your chapter board. If you can't, then make suggestions for, or offer to organize activities and programs. Do what you can to increase CGO participation within the local chapters. We, your representatives on the National Executive Board, will do our share to support you at the national level.

# TAKE BACK THE NIGHT

As a manufacturer of lighting standards worldwide, Hoffman Engineering is committed to supplying the highest quality test equipment available.

Hoffman's night vision products include :

- Image Tube Analysis Test Stations
- Field Portable Goggle Gain and Resolution Test Sets
- Specular / Diffuse Contrast Measurement Systems
- Night Sky Simulation Equipment
- Calibrated Scopes for Inspecting NVIS Displays
- Interior / Exterior Aircraft Lighting
- MIL- L - 85762A Compatible Filters

# Hell's Wings Brigade Continues the Mission in Southwest Asia

By Captain Terrance J. Dolan

**A**s units redeploy from Operation DESERT STORM and the Army-wide draw down continues, units around the world are inactivating. One such unit is the Second Armored Division, which inactivated the Division colors on 20 May 1991. Yet the spirit of the Hell

on Wheels Division continues to fly high over Southwest Asia in the form of the Division's Combat Aviation Brigade (CAB). The Brigade Headquarters narrowly escaped inactivation and continues to serve proudly as an Echelons Above Corps (EAC) aviation brigade assigned to the Army Central Command (ARCENT).

In December of 1990, while preparing for the ground war that would soon free Kuwait, ARCENT identified the need for an organization to command and control its theater aviation assets. When the CAB received the mission, it was without 85

percent of its equipment and many of its personnel. Within only a few days, the inactivation process was reversed. Equipment was

CPT Dolan is Asst. S-3, 2nd Aviation Brigade Headquarters, Saudi Arabia.

drawn and packed, soldiers were trained, and the Brigade Headquarters deployed to Southwest Asia.

On arrival, the brigade was redesignated the 2d Aviation Brigade and began receiving active, National Guard, and Reserve component aviation units from across the United States and Europe. The CH-47 battalion, 2d Battalion, 158th Aviation Regiment, was the most diverse with units from the National Guard and active components from five different home stations in three states and Germany. The brigade as a whole truly encompassed the total Army concept.

2-158 Aviation provided medium lift to ARCENT, the 22d Support Command, and backup medium lift support to both XVIII and VII Corps. During Operation DESERT STORM, one company fought with the XVIII Airborne Corps while the remainder of the battalion kept VII Corps units supplied from the Tapline Road to the Euphrates River.

# *First In Avionics With The First Team.*

The Harris LH digital map, coupled with the flat panel LCD's, will improve survivability more than other new technologies. You can't be seen or shot when the terrain masks you! This enhanced survivability is a unique development from Harris Aerospace and a product of our world leadership in Digital Map, Fiber Optic High Speed Data Bus (HSDB), and EMI-protected Sensor Data Distribution (SDDN) technology. As a result, the LH has a reconfigurable and centralized processing architecture that gives pilots faster target acquisition and engagement.

LIGHT  
HELICOPTER  
FIRST TEAM

## 2D AVN BDE ORGANIZATION DURING OPERATION DESERT STORM

### BRIGADE STRENGTH AT PEAK: 1628

Typical missions included hauling class IX repair parts from the corps support commands and back hauling enemy prisoners of war and space-available passengers. The brigade's Black Hawk battalion, 7-158 Aviation, moved high priority passengers and light cargo for EAC units and shared VIP transport missions with the brigade's fixed wing company, A Co, 2d Battalion, 228th Aviation Regiment. The addition of five C-23 Sherpa aircraft made A/2-228 a unique unit. These aircraft moved aviation Class IX repair parts from the theater depot in Abu Dhabi to maintenance facilities in Saudi Arabia. Other Brigade units included an Aviation Intermediate Maintenance (AVIM) company, F Company, 214th Aviation Regiment, an aviation signal repair company, 256th Signal Support Company, and an Apache battalion, 5th Battalion, 229th Aviation Regiment.

When deployment was complete, the 2d

Aviation Brigade was the largest brigade in theater and the only aviation brigade of its type in the world. The brigade provided command and control for over 100 aircraft based in four countries and operating in an area covering more than 84,000 square miles. Through the war and the months following the liberation of Kuwait, the brigade logged over 10,000 hours, transported over 14,000 passengers, airlifted more than 5,000 tons of cargo, and flew over 250,000 miles without serious incident.

After the liberation of Kuwait, the brigade was once again in danger of being deactivated. A redeployment to Fort Hood meant certain death for the 2d Aviation Brigade. However, the need for an aviation headquarters to support the follow-on mission in Southwest Asia dictated retention of the brigade in theater. Some new units were assigned to the brigade, and others redeployed as the mission changed.

**RAH-66 Comanche:  
multimission to save  
multimillions.**

Air Combat

Deep Strike

Heavy Attack

Armed Recon

Air combat, deep strike, heavy attack, armed reconnaissance—the multimission Comanche is designed to be many warfighters in one. It's also designed to cut operating, maintenance and support costs by 40%. And that's not all the savings. Because 1300 Comanches can replace

3100 of the Army's current Vietnam-era light helicopters. That's 21st-century technology working hard to save dollars right now.

For America and for the Army, the RAH-66 Comanche will be a bargain. For adversaries, it will be more than they bargained for.

# 2D AVN BDE ORGANIZATION

As of: 15 JUN 91

## AIRCRAFT TOTALS

UH-60	27
UH-1	2
C-12	4

Today, the 2d Aviation Brigade makes its home at the West Heliport, King Abdul Aziz Air Base, in Dhahran. Its new organization includes all of the Army Aviation assets required to support ARCENT and CENTCOM Forward in their new missions. Company A(-), 7-158 Aviation remains in theater providing dedicated command and control aircraft to the commander, ARCENT Forward and Commander, Defense Restoration and Assistance Office (DRAO) in Kuwait.

The remainder of the company's aircraft provide general support to units in the Kuwaiti Theater of Operations (KTO). Four C-12 aircraft remain in the brigade's fixed wing section with command and control, VIP transport, and courier missions. Two units that are new to the brigade are the

45th and 236th Medical Companies (Air Ambulance), which provide theater MedEvac support. The brigade also supports the Theater Aviation Maintenance and Materiel Program (TAMMP), an AVSCOM-controlled contract maintenance facility, collocated with the brigade at West Heliport. The TAMMP provides AVIM and limited depot maintenance for the KTO.

In total, the 2d Aviation Brigade retains over 300 personnel and 33 aircraft in Southwest Asia. As redeployment continues and the mission changes, so will the 2d Aviation Brigade. In the end, inactivation will surely catch up with the brigade, but until that day, the aviation soldiers of the 2d Aviation Brigade will continue to wear the Hell on Wheels patch over their hearts. Hell's Wings!

# A Word From the Sergeant Major

*This is the first in a continuing series of articles by the new Branch CSM which will appear on at least a quarterly basis.*

By Command Sergeant Major Fredy Finch, Jr.

**T**he computer age has arrived in Army Aviation Maintenance. The Unit Level Logistics System-Aviation (ULLS-A), scheduled to be implemented Jan 92, will be beneficial to crew chiefs, quality control inspectors, maintenance teams, and maintenance officers.

ULLS-A will provide Army Aviation maintenance with a state of the art automated logbook. The goal of ULLS-A is to provide improvements in supply accountability/availability, The Army Maintenance Management System-Aviation (TAMMS-A), and readiness reporting.

Train-up is scheduled to commence January 1992 in the 8th Infantry Division, Germany with software acceptance planned for February 1992. Other MACOMs will follow pending hardware availability and budget constraints.

## CMF 67 Changes

Recent revision of CMF 67 changes military occupational specialty (MOS) 67A (General

CSM Finch is Command Sergeant Major, USAAVNC and Ft. Rucker, AL.

Aircraft Repairer) by transferring skill level two duties and tasks to MOS 67B. It also establishes MOS 67B (Certified General Aircraft Repairer) for the purpose of conducting a prototype evaluation of a new concept in the training of aircraft mechanics.

## MOS 68X and CMFs 67/93

The proposal to establish MOS 68X combines selected positions from MOS 68F (Aircraft Electrician) and all positions from MOS 68J (Aircraft Armament/Missile System Repairer) associated with AH-64 maintenance (ASI X1) to create MOS 68X was approved by the ODCSPER.

The NCO/Enlisted Career Map for both CMFs 67 and 93 are currently being completed at U.S. Army Training and Doctrine Command for final approval and worldwide distribution.

Both Career Maps, developed by U.S.

## OUTER-SPACE TECHNOLOGY FROM A DOWN-TO-EARTH COMPANY.

**INTRODUCING THE TNL 7880 GPS/OMEGA/VLF NAVIGATION SYSTEM.** The Global Positioning System is the future of airborne navigation. It's the most accurate navigation technology ever developed and the FAA has indicated that it will soon be the system of choice for U.S. airspace.

Trimble is working with NASA in developing a GPS-based emergency landing system for the space shuttle.

But GPS isn't an easy technology to deliver. It requires some of the most advanced electronics ever designed. That's why you need a system built and supported by experts, not by a company that's just getting started with GPS.

At Trimble, we pioneered GPS.

We developed the first commercial GPS receiver over seven years ago, and since then we've delivered more systems, for more applications, than anyone else.

One of our first receivers is in the Smithsonian and our latest hand-held units made news in the Persian Gulf as the only way our troops could accurately locate themselves in the desert.

Our GPS Time Transfer systems are used by the U.S. Coast Guard to calibrate the Omega transmitters—so in a sense you've already been using Trimble GPS for years.

Trimble GPS Time transfer systems are used to calibrate the Omega transmitters.

Satellites 11,000 miles up give accuracy measured in meters on the ground.

Now you can have the best of both worlds with the 7880, because it combines Trimble's state-of-the-art GPS receiver with the industry-standard Omega/VLF system. It's the best way to bridge the technology conversion that's going on right now in aviation.

The 7880 Omega/VLF receiver has been proven in thousands of commercial and military installations worldwide. It comes standard with a color CDU and can be integrated with virtually any flight system. Existing 7880's are designed for and can easily be up-graded to GPS.

Trimble's Omega/VLF systems are used by more airlines than any other.

Our GPS sensor is a six-channel design built for the severe dynamics of flight. It can deliver a fresh position once a second, anywhere in the world, in any weather.

So if you want a system that can take you around the world, make sure you're getting it from a company that's been around the block.

If you'd like to know more about GPS, call or write for our 80 page book.

## CSM Fredy Finch, Jr.

CSM Finch was born in Franklin, PA in February 1950. He entered the Army in 1969 and upon completion of Basic Infantry Training, was assigned to the Republic of Vietnam where he served for 27 months as an infantryman, squad leader, platoon sergeant, OH-6A door gunner, UH-1H crew chief and operations sergeant with the 1st Cav Div.

During the course of his career, CSM Finch graduated from the Infantryman Basic Course, and was designated honor graduate of the Drill Sergeant Course, and the Aviation Advanced Course. He was selected as Drill Sergeant of the Year in 1981. CSM Finch is a graduate of the Sergeants Major Academy, Fort Bliss, TX. He holds a Bachelors degree in business management and an Associates degree in Applied Science.

CSM Finch has served as Command Sergeant Major of a Combat Aviation Battalion, Cavalry Squadron, Combat Aviation Brigade, and Command Sergeant Major of the Aviation Regiment, 101st Airborne Division (Air Assault) at Fort Campbell, Kentucky. His most recent assignment was as the Command Sergeant Major, Allied Mobile Forces (Landsoutheast), in Turkey.

CSM Finch is the recipient of the Bronze Star Medal 1st OLC, for valor. The Purple Heart 1st OLC; the Defense Meritorious Service Medal; the Meritorious Service Medal 9th OLC; the Air Medal, 6 awards; the Army Commendation medal 5th OLC, for valor; the Joint Service Commendation Medal; the Army Achievement Medal 1st OLC, and numerous service awards, including the Southwest Asia campaign medal. He has also earned the Combat Infantry Badge, the Aircraft Crewman's Badge, the Drill Sergeant Badge, and the Air Assault Badge.

He is married to the former Sukyong Pak and has one son, Fredy III, who is currently serving with the U.S. Army at Fort Knox, Kentucky, as an M1 tank commander.

He became Branch CSM in late May 1991 replacing CSM Roy McCormes who is now stationed in Panama with HHC 128th Aviation Regiment. CSM Finch is the chairman of the Enlisted Affairs Committee on the AAAA National Executive Board.

Army Aviation Logistics School for CMF 67 and U.S. Army Aviation Center for CMF 93, provide soldiers and NCOs a clear path for further advancement and educational opportunities. Both maps will be published in Department of the Army Pamphlet 350-17 and utilized by local education centers to integrate CMFs and local colleges and related courses into a complete education program for individual self-development. Tuition assistance hopefully will be tied to these educational opportunities.

## ATC/Aeroscout Observer 93B

The "L" Series table of organization and equipment (TOE) for Air Traffic Control (ATC) units continues to move toward final approval and implementation. Department of the Army has the TOE for boarding and approval is expected.

Military Occupational Specialty (MOS) 93C (Air Traffic Control Operators) are now eligible to attend the new Battle Staff Operations NCO Course and be awarded Additional Skill Identifier (ASI) 2S. A recent change to AR 611-201 deleted ASI 3S (Senior NCO Operations/Intelligence Sergeant) and made the Battle Staff Operations NCO Course available to soldiers in any MOS in the rank of SSG-SGM. The course is six-weeks in length and conducted by the United States Sergeants Major Academy at Fort Bliss, Texas.

Two new ASIs are available for MOS 93D (Air Traffic Control Equipment Repairer). Additional Skill Identifier B6 identifies individuals trained on Radar System AN/FSQ-84. Additional Skill Identifier 7C concerns those trained on Radio Transmitting Set AN/FRN-41. Programs of Instruction has been developed for both ASIs and training is projected to begin at USAVNC in Oct 91. Those individuals who have already been trained on the AN/FSQ-84 and AN/FRN-41, and this training is documented in their records, will be awarded the ASIs during the May-June 92 time frame. Orders will be published by local personnel service centers.

The Aeroscout Observer 93B training program has been revised to include

In the 1990's, American defense contractors are facing a threat they never anticipated: the end of the Cold War. This event is the best news in 45 years. It also presents a real opportunity to redefine our country's defense requirements.

To meet these changing requirements and reduce

spending at the same time, defense contractors must apply cost-effective technologies. Technologies that will help reshape our military into a more flexible, versatile, efficient force.

We have developed a reliable, versatile and deployable airborne ground surveillance system that can look deep beyond national borders. It is capable of performing a variety of operational missions in support of ground operations across the spectrum of conflict from high to low intensity, as well as special operations.

Technology has always been America's best defense. And Grumman has the technologies that make sense today.

TECHNOLOGIES THAT  
MAKE SENSE TODAY.

JOINT STARS

**GRUMMAN**

# More range. More endurance.

## ERA'S ADVANCED EXTERNAL AUXILIARY FUEL SYSTEM

Designed to fit BELL 412, 212,  
205 and UH-1H/N Helicopters...

### FEATURES:

- 153 gallons additional fuel extends endurance by 1.5 hours (minimum)
- Improved flight characteristics
- Full utilization cargo/cabin areas
- Extensive flight hours - proven worldwide
- Utilizes existing hardpoints for attachment
- Auxiliary fuel located safely away from passengers
- Meets or exceeds FAR 29 Airworthiness standards
- Kevlar® composite construction

Manufactured by:

Era Aviation, Inc.

Era Aviation Services  
P.O. Box 6550 / Lake Charles, LA 70506  
318-478-8131 / Telex 502-459 / FAX 318-474-3918  
Kevlar® Registered Trademark of DUPONT

- FAA Approved
- U.S. Patent No. 4,860,972
- AVSCOM Airworthiness Release

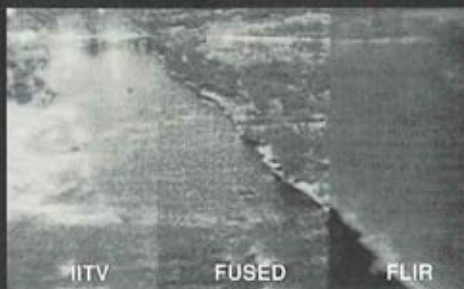

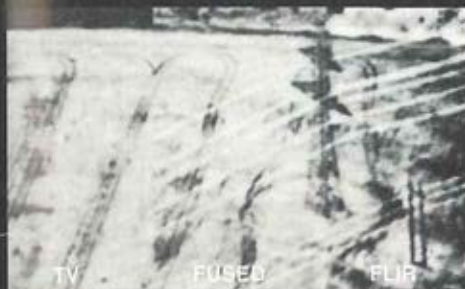

operating the OH-58A/C under VFR conditions, both day and night, and with night vision goggles. The 93B flight handling hours were increased from 9.1 to 15.0 hours and all flight handling tasks are evaluated before the 93B graduates. Unit training, which was only conducted by Instructor Pilots (IPs), can now be conducted by Pilots-In-Command (PICs) as well as the IPs. This change gives commanders a better trained aeroscout observer and allows the commanders more flexibility when choosing pilots to conduct air training manual (ATM) training. These training improvements lead to a more effective combat unit.

### Secret Security Clearance

In order to enhance the combat effectiveness of aviation operations, effective 1 October 91, MOS 93P, Aviation Operations Specialists, must possess a SECRET security clearance. All new accessions after 30 September 1991 will be processed for a SECRET security clearance. This change will appear in the October 91 Update of AR 611-201. Also, aviation operations personnel will lose the Additional Skill Identifier (ASI) 3S (Operations and Intelligence). This course and the ASI are being replaced by a new course, Battle Staff Operations NCO, with the ASI of 2S. The six-week long Battle Staff Operations Course is conducted at Fort Bliss, Texas. Aviation Operations Specialist in the rank of SSG-SGM are eligible to attend.

||||

## TI image fusion: you can see clearer now!

Your eyes, by themselves, can see only so much. Night operations, a "dirty" battlefield, smoke, haze and adverse weather only make it tougher to see, requiring optical sensors like FLIR and Image Intensified TV (IITV).

Now TI has taken optical sensors one step farther – Image Fusion.

Image Fusion combines the best attributes of FLIR and either day TV or IITV into one single composite display. This final fused imagery contains more useful operator information than individual

sensors can provide.

Image Fusion offers the user real benefits:

- Reduced operator workload
- Faster target acquisition
- Improved situation awareness
- Enhanced flight safety

Seeing is believing. Ask your TI representative to show you the video.

MAINTENANCE:

## CORPUS CHRISTI UPDATE

BY COLONEL EDWARD J. SHANNON

**CORPUS CHRISTI, TX** — The Corpus Christi Army Depot (CCAD) is undergoing a dramatic change—in the way we do business. It was recently announced by the Department of Defense that maintenance depots will compete with commercial contractors for work.

Aviation Systems Command (AVSCOM) has been assigning the depot work based on CCAD's capability. Now workload will be given to the depot or contractor with the lowest price technically acceptable competitive bid. CCAD will be competing against other branches of service, as well as the private sector. Initially, at least one workload will be identified for solicitation each fiscal year 1992 through 1997.

We know our way of doing business is evolving, so we too are changing to remain competitive. There are several things we are doing to keep our doors open. The foremost is our management philosophy of continuous improvement. Depot leadership is willing to alter the traditional ways of doing business. We have to change or become extinct. We know it from the evolution process, we see it in the business world, and we can even feel it at the depot. Competition will impact the depot more than any other event in

CCAD's 30 year history.

Depot leadership is establishing an environment of continuous improvement in which everyone thinks every day about ways to make our operations better in quality, output, costs, and customer satisfaction.

One project we are implementing to keep costs down is Zero Base Process Initiative. Basically, it is looking at redundancy in the depot and trying to eliminate it. This initiative will change CCAD's way of doing business in the processing of our product and will effect all personnel.

Currently, the initiative is working to reach a zero base level of inspections of various aircraft components by transitioning quality control inspectors to quality assessors. CCAD will be going from 100 percent product inspections to process auditing, i.e. random sampling, spot checks, customer feedback, and continuous improvement of the processes.

This is a fully coordinated initiative with our Directorates of

**COL Shannon was Commander, Corpus Christi Army Depot, Corpus Christi, TX at the time this was written.**

Maintenance and Quality Assessment. The inception of the process auditing came about through a barrier bashing analysis and reorganization the depot underwent in January.

This initiative will not affect mandatory inspections in flight safety parts, National Inventory Control Point, and the like.

In terms of teamwork, we are striving for a common goal—customer satisfaction and continuous improvement. However, no inspection points will be adjusted until the supervisors and inspectors involved concur.

This initiative will also give employees the opportunity to have a say in improving this process and procedure, and others. It will instill in the workers that they will have more responsibility to perform the tasks right the first time as a supplier of product or service to a customer and as the owner or the provider. It will make the craftsman and supervisor aware of cultural changes needed to update quality systems to keep pace with technology and the need to continually improve our processes for customer satisfaction.

The Zero Base Process Initiative is just one of many steps CCAD is taking to stay competitive. We've also established a competition office to provide competitive bids for work. This can include anything the depot is capable of working on.

We are looking around and trying what works. We don't want to go the way of some of the airlines—being good, but not good enough to survive. We will continue our strong 30 year tradition of putting out quality product for the soldiers in the field. IIII

# PEATS

(Portable Engine Analyzer Test Set)

## Fix or Fly?

Before you decide to "fix-it" or "fly-it", you need more than just cockpit gauge data. You need an engine analyzer system. The PEATS (Portable Engine Analyzer Test Set) System increases the scope of engine diagnosis by analyzing the engine during flight at the system and subsystem levels.

- PEATS helps locate and identify engine trouble before extensive secondary damage occurs, and verifies repair effectiveness with "before-and-after" diagnostics.
- PEATS gives a detailed "picture" of the engine gas path.
- PEATS provides an NBS traceable standard for detecting cockpit indicator problems.
- PEATS eliminates the costly "parts-changing" method of troubleshooting engines.

Fix or fly? A question of safety and readiness. PEATS provides the answer. For more information contact Howell, innovators in flight instrumentation since 1951.

# HUNTER OR PREY?

In today's combat environment, you can go from hunter to hunted in a matter of seconds.

To meet today's demanding requirements on the modern battlefield, Dalmo Victor's APR-39A threat warning system provides aviators with what they need—fast, accurate, and complete combat information on the electronic threat.

The APR-39A is a small, lightweight, digital threat warning system that provides the crew with clear and concise audio and visual information and prioritization of multiple threats. Call, write, or telex Dalmo Victor for more information.

## Few things hold up as well as our ADIs.

There are little emergencies . . . and there are big ones.

When there's trouble with a power system or if power is *completely* lost, the J.E.T. 3-inch attitude indicator supplies vital pitch and roll information. As a self-contained gyro system, it can be relied upon even in a failure situation.

With addition of a J.E.T. power supply, our ADI-350 is so efficient — its power drain so low — that it can operate for up to 5 hours.

J.E.T.'s record of reliability is unmatched: more than 35,000 2-inch and 3-inch units produced in the past 20 years. Plus: easy serviceability and J.E.T.'s global support. Write, or call 616-949-6600, for technical data.

# Laser Detection . . .

## New Sensors for Threat Warning.

U.S. helicopter crews will now be protected from laser threats, thanks to a new laser warning system developed by Hughes Danbury Systems, a subsidiary of Hughes Aircraft Company.

The AN/AVR-2 Laser Detecting Set (LDS) is the first laser detecting system available. It will become a vital component for the U.S. Army, Navy and Marine Corps.

The AN/AVR-2 LDS interfaces with existing radar warning systems, and is part of Hughes'

ongoing effort to make combat helicopters, other aircraft and tanks safer through advanced sensor technology.

For more information, contact our Business Development office at (203) 797-5261.

*AN/AVR-2. In production now and ready for tomorrow.*

# **SATCOM ANTENNAS**

## **field proven designs**

**No other antenna manufacturer has  
more operational antennas in the field**

Dorne & Margolin's wide range of SATCOM antennas includes small, portable, and rapidly deployable high gain antennas for use with the newest series of lightweight UHF satellite terminals. In addition, our DM C34 series provides dual mode operation for aircraft satellite communication systems. DM C99 series low-profile antennas provide unique broad beam radiation pattern coverage which accurately maintains vital UHF satellite communication links when satellite intercept angles constantly vary. DM C143 series are flush-mounted aircraft antennas

offering state-of-the-art co-located antenna functions within the same frequency range.

No matter what your antenna requirements are, Dorne & Margolin has over 40 years experience and the know-how to design and produce antennas with unprecedented quality, accuracy, dependability, and durability. We pride ourselves in solving the most difficult and challenging antenna requirements.

If you think antennas,  
think Dorne & Margolin.

## WE'RE COMMITTED TO YOU.

**Robertson Aviation Range Extension Fuel Systems are built for the toughest customer of all. You!**

We don't just build auxiliary fuel systems for your aircraft. We build them for you. Our commitment to total quality means you won't have to think twice about the reliability or survivability of your system. Just concentrate on your mission.

### DOUBLE THE RANGE/FARE CAPABILITY.

Combat-proven Robertson internal aux systems can double your range or endurance. Our **GUARDIAN®** systems can also provide Forward Area Refueling capability.

### READY WHEN YOU ARE.

Mission-ready Robertson tanks are available in sizes from 28.5 to 800 gal. They fit compactly into your aircraft and take up minimum passenger/cargo space.

After initial installation, tanks can be removed or reinstalled in 5 minutes or less *without tools*.

### SELF-SEALING BLADDERS.

Robertson systems exceed the most stringent government requirements. Tanks with self-sealing bladders have passed .50 cal., 14.5mm, 20mm gunfire tests, and survived the 65-ft. drop test — *without leakage*.

### WE GO THE EXTRA DISTANCE FOR YOU.

Robertson systems go the extra distance everyday for U.S. military forces around the world. They'll go the extra distance for you. For

more information, call (602) 967-5185. FAX (602) 968-3019 anytime. Or write P.O. Box 968, Tempe, AZ 85280.

## Where "Huey" Engines Are Reborn

**A**t Sabreliner Corporation, UH-1 "Huey" helicopter engines are given a new life. Sabreliner tears them down, repairs them, rebuilds them, and then tests them to meet Army specifications.

In Sabreliner's engine test cell, precise testing is accomplished using fully automated and analog instrumentation with the capability to monitor 48 engine performance parameters simultaneously.

Dedicated to serving a variety of aircraft, Sabreliner has proven qualifications in military aviation maintenance and modification services.

# THE FUTURE OF IS RIGHT UNDER

# SURVEILLANCE ER YOUR NOSE.

Its name: The MSSA—the Multi-Sensor Surveillance Aircraft—from Westinghouse. MSSA's unique edge is its Integrated Multi-Sensor System. The surveillance suite includes a unique 360° AN/APG-66 SR radar, a 360° infra-red imaging system, a comprehensive communications/navigation package, and real-time video data link to enhance ground support. So where law enforcement surveillance, border and fisheries patrol, or drug interdiction is critical, the MSSA can detect, track, and identify suspicious airborne, ground, and maritime activities at extended ranges.

This technology is integrated aboard the most successful light transport STOL aircraft flying today, the PBN Islander. With this rugged, low-cost platform, the MSSA starts as a proven performer. A wide range of missions is within your reach at a very affordable operating cost.

If you have a nose for results and savings, set your sights on MSSA. From Westinghouse, the world's leader in advanced surveillance systems. For additional information contact Law Enforcement Systems Dept., P.O. Box 746, MS-8880, Baltimore, MD 21203.

Phone: 301-712-1381

Fax: 301-712-1382.

# WIRES! WIRES! WIRES!

*The World's Only Proven Wire Strike Avoidance System*

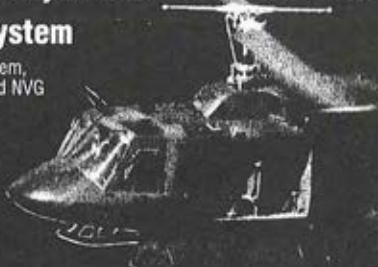

## Cable Warning System

This compact lightweight system, consisting of a sensor unit and NVG compatible cockpit indicator, is designed for low-cost installation.

As the power cable is approached an audio warning is sounded and a directional indication is given.

### From the U.S. Army Final Report:

"The system worked as advertised...all Class A wire strike accidents that occurred during the past ten years were reviewed...The results of this review indicated that the CWS may have prevented between 49% and 74% of these accidents."

A large military helicopter is shown in flight, viewed from a low angle. Below it is a simulated terrain with a dirt road, several small buildings, a larger white industrial-style building, and a blue swimming pool. The background shows rolling hills under a clear sky.

**SOF  
MISSION  
REHEARSAL.**

**WE'RE ON  
THE SCENE IN  
48 HOURS.**

**EVANS & SUTHERLAND**

Until now, rapid database turnaround has been a major challenge for SOF mission rehearsal. Not any more.

Evans & Sutherland presents the new ESIG-4000 image generator. Designed with breakthrough architecture, it meets time-critical database requirements in as few as 48 hours.

Selected for the Air Force's SOF-ATS program, the ESIG-4000 is unlike any other system. It takes separately processed terrain and feature databases, combines them in its hardware, and generates—in real time—a complete mission scenario.

This powerful capability totally eliminates the most time-consuming procedures of database modeling.

What's more, the flexible database format allows a mission scenario to be easily updated with late-breaking intelligence.

Advanced database processing is the catalyst for the ESIG-4000's ability to generate unrivaled visual fidelity. Giving aircrews a photo-realistic mission preview, the system provides a higher level of detail, generates greater terrain fidelity and supports full sensor simulation for NVG, LLTV and IR.

For a complete picture of the new ESIG-4000, contact: Evans & Sutherland, Simulation Division, 600 Komas Drive, Salt Lake City, Utah 84108. Tel: 801-582-5847, Ext. 6521, Fax: 801-582-5848

Two premier defense electronics companies have joined forces to further expand night vision technology—already a key advantage for U.S. Army battlefield helicopters. Now,

Heads-Up Display (HUD) will assure safer, more efficient flight operations under all conditions.

AEL, the Army's principal designer of advanced helicopter avionics installations, will lead the ANVIS/HUD team as program manager, systems integrator and installation designer.

AEL's extensive experience in night vision lighting, together with Elbit's proven ANVIS/HUD technology, provides the optimum non-development solution to the outstanding Army requirements.

# AEL and Elbit. The right team for ANVIS/HUD.

# ON THE AIR. IN THE AIR.

Only ITT makes SINGARS fly.

In the trenches. On wheels. And now, in the air. ITT is SINGARS.

With ITT's Airborne Anti-Jam SINGARS radio, all of your forces can communicate voice and data securely.

Three airborne configurations are available. And ITT will equip one of them to your specific application.

ITT's Airborne SINGARS is part of the SINGARS System; backed

by complete logistic support, including multilevel maintenance, easy-to-use installation kits comprehensive training, and documentation.

If you have high standards, only ITT's Airborne SINGARS can meet them today.

# VANISHING ACT.

ITT's lightweight ECM Systems are out there protecting America's helicopters and tactical aircraft.

The decision was clearly a smart one.

The U.S. Army chose ITT's family of ALQ-136 Electronic Countermeasure Systems to enhance aircraft survivability.

The ALQ-136 was selected for its top-flight ECM capability. And for its high reliability.

We've produced over one thousand ALQ-136 lightweight jammers for Army combat helicopters. And we are developing

another version for tactical aircraft.

The ALQ-136 family of ECM systems is backed by the sophisticated production technology and support our forces have come to expect from ITT. We're working together to insure America's security.

# BRIEFINGS

**McDonnell Douglas Helicopter Company's** improved version of the AH-64 Apache's main rotor blades has eliminated problems experienced with the original blades fielded by the U.S. Army. The Army calls for the blades to be flown for 1,500 hours before removal for repair. Three ship sets of improved blades (four blades per aircraft) in service on Apaches at Ft. Rucker, AL, are approaching 1,500 hours with no failures or indications of impending failures.

**Lockheed Sanders** has been awarded approximately \$15.4 million by the U.S. Army contract for 640 modification kits to convert ALQ-144s to the upgraded ALQ-144A(V)1 and 3 configuration. The funds will also cover installation of the kits and an accelerated delivery schedule. These systems will provide upgraded protection against infrared (IR) guided missiles. More than 3,000 ALQ-144s now protect a wide variety of helicopters and fixed wing aircraft in all U.S. Armed Services.

**Webb F. Joiner** has been named President of **Bell Helicopter Textron, Inc.** He succeeds **Leonard M. Horner**, who will serve as chairman

of Bell until his retirement early next year. Mr. Joiner, 57, becomes the fifth president in Bell Helicopter's 40-year history. He joined the division in 1960, and served as controller, vice president-finance, and senior vice president before becoming executive vice president in 1986.

**The Panther 800 team** achieved a program milestone when the helicopter was moved from LTV Aerospace and Defense's Aircraft Division in Dallas to Aerospatiale's facilities in Grand Prairie, TX. LTV completed the design for the hardware and engine installation systems and Aerospatiale will install the T-800 engines and cockpit. LTV, along with team members Aerospatiale, LHTEC, and IBM, will offer the Panther 800 to the U.S. Army as an off-the-shelf option light for the utility helicopter role to replace the aging UH-1.

The United States Army recently contracted with **FlightSafety International** for a pilot initial training course for RC-12K pilots based in Europe. The ground school for the RC-12K was conducted last month in Weisbaden, Germany.

## Do rotor track and balance in as few as two flights!

### Track and Balance

"Smart Charts" are computer programs which are entered into the 8500 via its 3 1/2" disk drive. They consider the complex interaction of track and balance to calculate changes to weight, sweep, pitch link and tab - all at once!

One flight, and the 8500/Smart Chart acquires measurements from a pair of vibration pickups and presents all changes to be made to sweeten the rotor.

### Tail Rotors, Turbo Fans and Propellers

Tail Rotors, propellers, turbo-fans, shafts and blowers and other components, are quickly balanced with the 8500 and programs entered from disk. Many programs provide for acquisition of balance readings and spectra from a single push of the START button.

### Service and Support

For over 20 years, helicopter manufacturers and civilian and military operators have relied on Chadwick-Helmuth. Our outstanding staff of experienced and knowledgeable Field Service Representatives provide worldwide support.

### Changes are made in response to vibration measurements (after all, the object is to reduce vibration). Simple to use, a crewman can use it with a few minutes' training.

### Spectral Analysis

The 8500 is also an FFT Spectrum Analyzer. Spectral data is stored to a magnetic disk, and our **VibratLog**, a powerful post-processing program for IBM PC or compatible, is a complete diagnostic system.

# NIGHT VISION.

In the dark of night, clear vision is the name of the game. Players who win know that ITT IS NIGHT VISION.

When night falls, you can't afford to be left in the dark. That's why U.S. Forces trust the night to ITT. Over the last two decades, we've delivered more image intensification devices than anyone else.

Our Gen II set the standard. And our Gen III gives our armed forces unparalleled night vision technology well into the 21st century.

We are the world's largest supplier of the AN/AVS-6, the most advanced goggle in use today for night aviation. And our

AN/PVS-7B uses the same GEN III technology to meet the rigorous requirements of the U.S. Army foot soldier.

For night operations on land, air and sea, ITT has the technology, the experience, and the capability to meet your demands.

ITT has the vision it takes to get you through the night.

# NOMINATIONS OPEN

## 1991 AAAA Air/Sea Rescue Award

### BACKGROUND

Sponsored by Lucas Aerospace, this AAAA National Award will be presented "to the crew or crew member who have performed a rescue using a personnel rescue hoist that saved the life or eased the suffering of an individual or individuals during the awards period encompassing October 1, 1990 through September 30, 1991."

### ELIGIBILITY

A candidate must be U.S. Army, Active or Reserve Component, and must have had an active role in an air rescue effort using a personnel rescue hoist.

Membership in the AAAA is not a requirement for consideration.

The contribution of the nominee should have been initiated and completed during the awards period encompassing October 1, 1990 through September 30, 1991.

### DOCUMENTATION

The official nomination form should be used and is attainable from the AAAA National Office,

49 Richmondville Ave., Westport, CT 06880-2000; Telephone: (203) 226-8184.

The official nomination form may be reproduced locally. The receipt of each nomination form will be acknowledged directly by the National Office of the Army Aviation Association of America (AAAA).

### SUSPENSE DATE

The nomination(s) should be mailed so as to arrive at the AAAA National Office not later than **October 31, 1991**.

### SELECTION

The "Army Aviation Air/Sea Rescue Award" nominations will be reviewed at a mid-November meeting by the members of AAAA Awards Committee appointed by the President of the Army Aviation Center Chapter.

### PRESENTATION

The AAAA's "Army Aviation Air/Sea Rescue Award" will be presented at an AAAA Awards Banquet sponsored by the Army Aviation Center Chapter on December 5, 1991.

---

## 1991 AAAA Trainer of the Year Award

### BACKGROUND

Sponsored by the CAE-Link Corporation, Link Flight Simulation Division, this AAAA National Award will be presented "to the trainer who has made an outstanding individual contribution to Army Aviation during the awards period encompassing calendar year 1991."

### ELIGIBILITY

A candidate for this AAAA National Award may be a military or a civilian nominee and must be actively involved in Army Aviation training.

Membership in the AAAA is not a requirement for consideration.

The individual contribution of the nominee should have been initiated and completed during the awards period consisting of calendar year 1991.

### DOCUMENTATION

The official nomination form should be used and is attainable from the AAAA National Office, 49 Richmondville Ave., Westport, CT 06880-2000 (203) 226-8184.

The official nomination form may be reproduced locally. The receipt of each nomination form will be acknowledged directly by the National Office of the Army Aviation Association of America (AAAA).

### SUSPENSE DATE

The nomination(s) should be mailed so as to arrive at the AAAA National Office not later than **October 31, 1991**.

### SELECTION

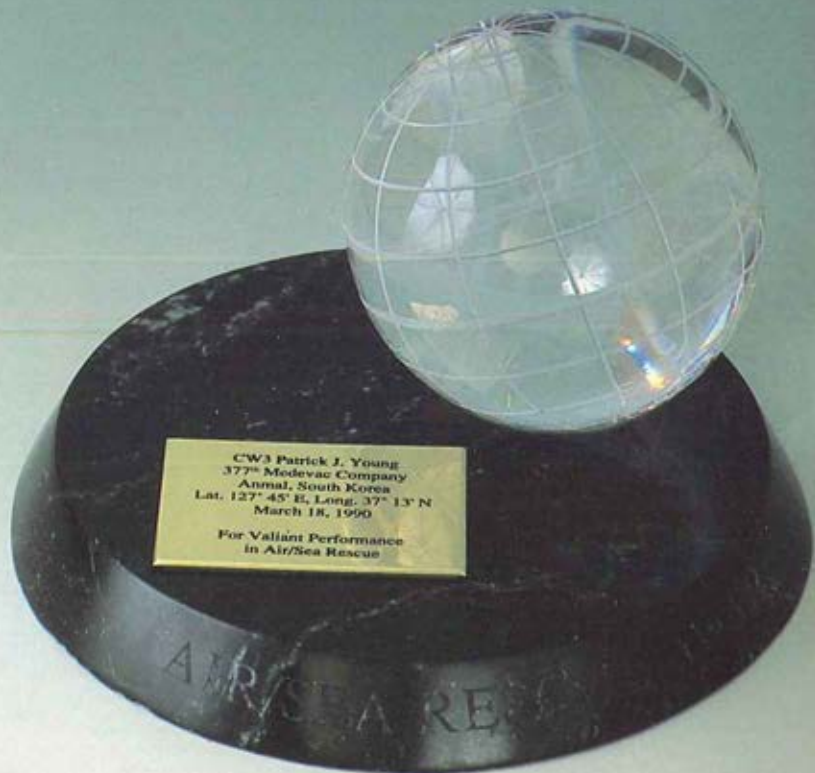

The CY91 "Aviation Trainer of the Year Award" nominations will be reviewed at a mid-November meeting by the members of AAAA Awards Committee appointed by the President of the Army Aviation Center Chapter.

### PRESENTATION

The AAAA's "Aviation Trainer of the Year Award" will be presented at an AAAA Awards Banquet sponsored by the Army Aviation Center Chapter at the Ft. Rucker Officers' Club on Thursday, December 5, 1991.

# Lucas Aerospace

Through its sponsoring of the annual  
AAAA Air/Sea Rescue Award,  
Lucas salutes the men and women  
of U.S. Army Aviation Crews around  
the world who save the lives of others,  
often at great personal risk.

Lucas

## 1991 AAAA Scholarship Foundation Awardees Announced

The AAAA Scholarship Foundation awarded a record \$100,000 in grants and loans to the individuals listed below who will be entering college this fall.

The AAAA Scholarship Foundation is a nonprofit, tax-exempt corporation established to render financial assistance for college level education to selected members of the Army Aviation Association of America, Inc. and the selected spouses, unmarried siblings, and unmarried children of current and deceased AAAA members.

Since its inception in 1963, the AAAA Scholarship Foundation has provided over \$475,475 to more than 447 qualified applicants. The Foundation has pursued a philosophy of awarding national scholarships primarily on the basis of academic merit and personal achievement. The selection process is anonymous with respect to the name of applicants and the rank of the qualifying member.

AAAA National and AAAA Chapters make considerable financial contributions to the Foundation. Among the major chapter events that support the AAAA Scholarship Foundation are the Annual Joseph P. Cribbins Product Support Symposium sponsored by the Lindbergh Chapter, St. Louis, MO and the biennial Avionics Symposium put on by the Monmouth Chapter.

In addition, many AAAA members, friends of Army Aviation, relatives of deceased members, private businesses, and corporations make substantial donations to the Foundation. All funds collected for the AAAA Life Membership Program are also direct donations to the AAAA Scholarship Foundation.

## 1991 AAAA Scholarship Foundation provides \$100,000 to 31 National Awardees

**AAAA National Scholarship—\$12,000 (\$3,000 a year for four years)** Elizabeth E. Bellocchio, daughter of Paul J. Bellocchio, Vestal, NY — Duke University

**LTC William B. Bunker Memorial Scholarship—\$10,000 (\$2,500 a year for four years)** Eric A. Bergantz, son of LTC Joseph L. Bergantz, St. Louis, MO — Washington University

**GEN Frank S. Besson, Jr. Memorial Scholarship—\$10,000 (\$2,500 a year for four years)** Christopher C. Maret, son of Richard C. Maret, Cedar Rapids, IA — Luther College

**AAAA National Scholarship—\$6,000 (\$1,500 a year for four years)** Stephanie D. Kernahan, daughter of MW4 Harold E. Kernahan, Petaluma, CA — Stanford University

**BG Robert M. Leich Memorial Scholarship—\$5,000 (\$1,250 a year for four years)** Gregory A. Ray, son of James A. Ray, Bridgeton, MO — Vanderbilt University

**BG O. Glenn Goodhand Memorial Scholarship—\$5,000 (\$1,250 a year for four years)** Tanya V. Bezreh, daughter of COL Anthony A. Bezreh, St. Louis, MO — Radcliffe College

**AAAA National Scholarship (Aeronautical)—\$4,000 (\$1,000 a year for four years)** Thomas A. Paramore, son of LTC Jerry S. Paramore, Grafton, VA — University of Georgia

**Monmouth Chapter (Perpetual) Scholarship—\$4,000 (\$1,000 a year for four years)** John T. Respass, son of John T. Respass, Wall, NJ — Yale University

**AAAA National Scholarship (Aeronautical)—\$2,000 (\$1,000 a year for two years)** Misty A. Davidson, daughter of Cheryl G. Davidson, Oakhurst, NJ — Florida Institute of Technology

**B. Howard Dean Memorial Scholarship—\$2,000 (\$1,000 a year for two years)** Catherine C. Culling, daughter of MAJ Laurence J. Culling, Ret., Kempner, TX — University of Texas at Arlington

**MAJ R. Kahl-Winter Memorial Scholarship—\$2,000 (\$1,000 a year for two years)** Sean P. Broderick, son of CW4 James L. Broderick, Milford, KS — Kansas State University

**Chesapeake Bay Chapter Matching Scholarship—\$2,000 (\$1,000 a year for two years)** Thomas L. Story, son of MW4 Thomas A. Story, Woodbridge, VA — Duke University

**Colonial Virginia Chapter Matching Scholarship—\$2,000 (\$1,000 a year for two years)** Jennifer L. Watkins, daughter of MAJ Robert D. Watkins, Jr., Newport News, VA — Westminster College

**Central Florida Chapter Matching Scholarship—\$2,000 (\$1,000 a year for two years)** Charlotte L. Kolb, daughter of B.F. Kolb, Orlando, FL — University of Central Florida

**CW3 Stephen A. Hansen Memorial Scholarship—\$1,000 (\$1,000 for one year)** Andrea Margaret Schmidt, daughter of CW3 Karl A. Schmidt, Newport News, VA — Valparaiso University

**Ken K. Kelly Memorial Scholarship—\$1,000 (\$1,000 for one year)** Amanda D. New, daughter of Jerry D. New, Corpus Christi, TX — Texas A&M University

**AAAA National Scholarship—\$1,000 (\$1,000 for one year)** Jonathan P. Cunzeman, son of CW4 Douglas W. Cunzeman, Des Plaines, IL — Northwestern University

**Aviation Center Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Rebecca L. Wentlent, daughter of LTC Mark S. Wentlent, Fort Rucker, AL — Auburn University

**Cedar Rapids Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Regen A. Gallagher, son of SFC George D. Gallagher, Ret., White River Junction, VT — University of New England

**Greater Atlanta Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Amy E. Deason, daughter of LTC Emory N. Deason, Jr., Ret., Jonesboro, GA — Georgia Tech

**Lindbergh Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Craig E. Hingle, son of Edward C. Hingle, St. Louis, MO — Quincy College

**Monmouth Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Daniel M. Marlo, son of Joseph C. Marlo, St. Louis, MO — Georgetown University

**North Texas Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Richard D. Robbins, son of Michael R. Robbins, Hurst, TX — Southwestern University

**Phantom Corps Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Colleen M. Hipp, daughter of COL Gerald T. Hipp, Ret., St. Louis, MO — University of Notre Dame

**Southern California Chapter Matching Scholarship—\$1,000 (\$1,000 for one year)** Randall W. Cason, Jr., son of MAJ Randall W. Cason, APO New York — Baylor University

**MG Robert F. Molinelli Memorial Scholarship—\$1,000 (\$1,000 for one year)** Lori M. Culwell, daughter of COL Kenneth L. Culwell, Arlington, VA — University of California at Irvine

### Interest Free Loan Recipients

**AAAA Scholarship Interest Free Loan—\$4,000 (\$1,000 a year for four years)** Melissa M. Lesniak, daughter of Kathleen M. Lesniak, St. Louis, MO — Maryville College

**AAAA Scholarship Interest Free Loan—\$4,000 (\$1,000 a year for four years)** David A. Sharon, son of LTC Gary A. Sharon, Chesterfield, MO — Texas A&M University

**AAAA Scholarship Interest Free Loan—\$4,000 (\$1,000 a year for four years)** Kevin P. Phelps, son of LTC Patrick F. Phelps, Woodbridge, VA — University of Scranton

**AAAA Scholarship Interest Free Loan—\$4,000 (\$1,000 a year for four years)** Christopher J. Bell, son of LTC William L. Bell, Ret., Linden, NC — Wake Forest University

**AAAA Scholarship Interest Free Loan—\$4,000 (\$1,000 a year for four years)** Aimee L. Dodson, daughter of Frank A. Dodson, Jr., Pleasanton, TX — University of Texas at Austin

Since the inception of the AAAA Scholarship Foundation in 1963 as a separate corporate entity, selected members of the Army Aviation Association, Inc. (AAAA), and the selected spouses, unmarried siblings, and unmarried children of current and deceased AAAA members have received 447 national scholarship awards totaling \$475,475.

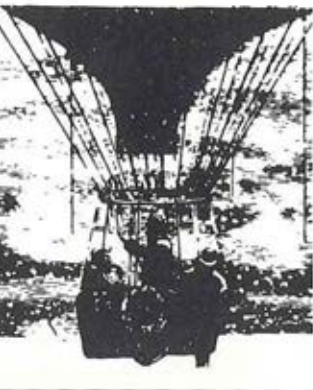

# Readiness. Reliability. Results.

At GE Aircraft Engines, we are proud to be allied with America's defense forces worldwide in programs such as the versatile Black Hawk helicopter.

Being there when it counts makes all the difference.

## Air-to-Air Stinger. The Dawn of a New Era.

Air-to-Air Stinger (ATAS), designed by General Dynamics Air Defense Systems Division, gives Army aviators a new weapons capability for helicopter air combat.

We have integrated our combat proven Stinger missile into a lightweight airborne system that provides the helicopter self defense capability needed on today's battlefield.

Air-to-Air Stinger. Designed to provide the decisive edge in air combat.

# MEETING THE CHALLENGE

## HEAD-ON

Rugged, dependable systems are the prerequisites of mission success. Canadian Marconi systems meet this challenge head-on, time and time again.

That's why CMC avionics have been chosen for every U.S. Army helicopter program throughout the past 30 years. CMC is extremely proud of this accomplishment. And we're committed to maintaining our reputation for product dependability in advanced avionics technology — into the 21st century and beyond.

## **Your Associate in Simulation**

We've envisioned your future for thirty years. We've understood the pressure to perform, developed the technology you needed for ever-increasing performance, solved your challenges sometimes even before you realized them.

Encore's simulation and training experts are industry insiders with in-depth technical knowledge and problem-solving capabilities. An association with Encore means access to the most advanced real-time, deterministic technology and expertise in the industry.

### **Time-Critical Mission**

Whether it's a small procedures trainer or a full scope simulator, a localized project or a distributed simulator with modules around the world, Encore offers the scalability and systems technology for total solutions.

That's why Encore has always been the choice of the most demanding simulation and training programs in the world. While others have struggled, Encore has been with you - and will always be with you - to break the next barrier of real-time performance.

### **Continued Leadership**

Today, with the ongoing CONCEPT/32<sup>™</sup> line and the new symmetric multiprocessing Encore 90<sup>™</sup> family, Encore continues to envision your challenges. A strategic association with Encore guarantees you the smooth migration and support you need for long-term program success.

## **Encore: Masters of Reality**

# ADVANCED GEAR TECHNOLOGY

With over one hundred years of experience, Litton Precision Gear today is a healthy major subcontractor supplying transmissions to the U.S. Army's AH-64A & CH-47D programs. We have the knowledge and expertise to manufacture the complex, precise, and advanced gearing for power-lift air vehicles of the future.

Our unparalleled gear pattern development capacity is the result of years of cooperation with the chief gear designers of many leading prime contractors. To this experience, we apply continually advancing technology to manufacture gearing and housing.

Litton Precision Gear has been entrusted to develop and manufacture many systems and components by prime contractors who have come to depend on our expertise. The performance of our products in the aviation industry is evidenced by the success of our customers.

## Four new reasons to get your hands on a TRIMPACK.

**The TRIMPACK is the most powerful hand-held GPS navigation system in the world. Now, new design advances have extended the capabilities of this popular receiver in several significant ways:**

**1 More Channels.** The TRIMPACK now has three independent satellite-tracking channels. That means faster time to first fix and more accurate position solutions. With these channels, it will navigate under tougher conditions—in moving vehicles, under foliage, even spinning helicopter rotors.

**2 Enhanced Dynamics.** Other hand-held GPS systems lose lock on the GPS signal when they're moved. And that can result in inaccurate position measurements. The TRIMPACK's new three-channel design, working with its second-generation software, keeps it locked-on and tracking at speeds up to 600 knots, even under severe accelerations. You get precise position and velocity fixes once a second. Every second. No excuses.

**3 Updated Software.** Available at your fingertips is a wide array of navigation information—3-D position and velocity, azimuth and cross-track-error, waypoints, ETA, and much more. The TRIMPACK is a complete navigation system capable of interface using a wide variety of interchangeable formats—even a HAVE QUICK timing reference.

**4 Lower Power.** The TRIMPACK's new design significantly reduces its power consumption so you can navigate longer on smaller, lighter batteries. Choose from interchangeable NiCad, Lithium, or AA alkaline battery packs. They're lightweight, convenient and cost-effective.

**So if you'd like to put the whole world in your hands, call or write, and we'll send you more information on the new TRIMPACK.**

**TrimbleNavigation**

# Your best defense when it comes to thunderstorms.

There is no other airborne technology available today that can map electrical discharges and thunderstorm activity as precisely as the *Stormscope*™ Series II Weather Mapping System. The *Stormscope* system is currently being used by all branches of the military and government service on a wide variety of aircraft.

As a complement to radar, the *Stormscope* Series II system provides a more complete picture of weather conditions to aid pilots in making surer, safer

decisions to avoid dangerous thunderstorm conditions. *Stormscope* systems are passive, so that, in addition to exhibiting outstanding reliability, they do not radiate detectable emissions.

*Stormscope* Series II systems can monitor thunderstorm activity up to 200 nautical miles away, further than any other weather-related avionics. This low-cost, high-tech system is easy to install, operate and interpret. It offers many additional features including: continual self-test capabilities, a checklist mode that allows the pilot to store up to six checklists,

a time/date mode, future expansion capabilities and much more. A night vision compatible version is also available.

To arrange a briefing explaining how pilots of all U.S. services are using *Stormscope* Series II weather mapping systems, call Government Programs Department at 614-888-9502.

## HALL OF FAME CANDIDATES SELECTED

The Board of Trustees of the Army Aviation Hall of Fame has selected 21 candidates for 1992 Hall of Fame induction. The Trustees met on Friday, August 9, 1991 in Washington, D.C., to select the candidates from 75 nominees. Some 9,000 AAAA members having two or more years of consecutive AAAA membership will be

mailed ballots which contain the candidates' photos and biographical sketches later this Fall. Seven of the 21 candidates will be selected to be inducted into the Hall of Fame in ceremonies to be held Thursday, April 9, 1992 at the Hall of Fame Luncheon at the AAAA Annual Convention in Atlanta, GA.

LTG Robert R. Williams

Mr. Joseph P. Critbins

The 21 Candidates who are being considered for April 1992 induction are: MG George S. Beatty, Jr., Ret.; CPT William P. Brake, deceased; COL Clark A. Burnett, Ret.; CW3 Alfred J. Cargen, Ret.; COL Robert F. Cassidy, Ret.; CSM William H. Fountain, Ret.; Dr. Anselm Franz; MG Benjamin L. Harrison, Ret.; COL Frank L. Henry, deceased; CW3 Jon A. Iseminger; Mr. William P. Jones, deceased; Mr. Bartram Kelley; SSG/CPT James T. Kerr, Ret.; LTC Donald F. Luce, Ret.; LTG Jack V. Mackmull, Ret.; COL Nelson A. Mahone, Jr., deceased; LTG James H. Merryman, Ret.; BG Tom M. Nicholson, deceased; Mr. Jack G. Real; Dr. S. Harry Robertson; and MAJ Marie T. Rossi, deceased.

GEN Robert M. Shoemaker

CW4 Michael J. Novosel

There are 64 members currently in the Army Aviation Hall of Fame, of whom 41 are living. Fifty-seven are military. The AAAA-sponsored Hall of Fame honors those who have made outstanding contributions to Army Aviation and records the excellence of their achievements for posterity. The actual Hall of Fame is located at the U.S. Army Aviation Museum at Ft. Rucker, AL.

LTG Harry W. O. Kinnard

CSM Lawrence E. Kennedy

MG George W. Putnam, Jr.

### BOARD OF TRUSTESS

LTG Robert R. Williams, Ret., top left, serves as the Chairman of the Hall of Fame Board of Trustees. The remaining Trustees - all members of the Hall of Fame - serve as appointees for one three-year term of office.

Rev. Jerome R. Daly

# Take them by storm.

Now when you want to take something by storm, you can.

With the Boeing MH-47E.

Because it'll fly under almost any conditions.

In the driving rain. In the screaming wind. In the highest humidity. In the darkest night.

Designed specifically for deep penetration, clandestine

missions, the MH-47E can carry Special Forces A-Teams or SEAL Platoons anywhere. And bring them back safely.

The MH-47E flies nap-of-the-earth. In nearly zero-light. Up to 600 nautical miles without refueling.

It can be either land- or ship-based. And it features advanced communication and navigation

equipment, forward-looking infrared, multi-mode terrain avoidance/terrain following radar, and air-to-air refueling.

The Boeing MH-47E. It adds a whole new meaning to the concept of riding out a storm.

To learn more about the MH-47E, call Boeing Helicopters at (215) 591-2202.

**BOEING**

## New AAAA Chapter Officers

### Aloha:

LTC Jack D. Bennett (SrVP)

### Checkpoint Charlie:

MAJ Dorothea M. Cypher (President)

### Chesapeake Bay:

Ms. Deborah L. Horne (Pres); CW3 Timothy T. Lawry (SrVP)

### Edwin A. Link:

CW4 William A. Yarett, Ret. (Pres); David Lum (SrVP); MAJ Thomas E. Burch, Ret. (Secy); Sam Knight (Treas); Randy Monroe (VP, Memb. Enroll); Charles F. Tubbert (VP, Memb. Renew); LTC George P. McGee, Ret. (VP, Promotions)

### Fort Bragg:

COL Thomas A. Green (Acting President)

### Fort Indiantown Gap:

CW3 Robert Oburn (VP, Membership Enrollment)

### Monterey Bay:

CPT Scott S. Burgess (VP, Membership)

### North Texas:

Tony Geishauser (VP, Prog)

### Rhine Valley:

CPT Brian E. McKinley (VP, Membership)

### Savannah:

COL Burt S. Tackaberry (Pres); LTC Thomas F. Stewart (SrVP/Prog); MAJ Ralph G. Pallotta (Secy); MAJ Gregory M. Williamitis (Treas); MW4 Robert L. Williams (VP, War. Aff); 1LT Susan Kae Davis (VP, Corp. Aff/P.R.); CSM James C. Hart (VP, Enlist. Aff); LTC Sidney L. Strickland, Ret. (VP, Retired Affairs)

The Bonn Area Chapter hosted a professional dinner meeting on 18 March 1991, where BG Istvan Csoboth (above, left), Head of the Aviation Division in the German Army Office, Cologne, and Chief of German Army Aviation, was presented an honorary membership to AAAA by Chapter President LTC Russell Robinson (above, right). During his career, BG Csoboth has been a strong supporter of German and American aviation interoperability.

## AAAA CALENDAR

A listing of recent AAAA Chapter events and upcoming National dates.

### September, 1991

- ✓ **Sept. 27.** Wings of the Devil Chapter Professional-Social Meeting at the Fort Polk Officer's Club Ballroom No. 1. Guest Speaker: COL William D. McGill II, Cdr., Avn Bde 1st Cav Div.
- ✓ **Sept. 30.** Washington D.C. Chapter General Membership Meeting, Ballroom of SOSA Recreation Center, Fort Belvoir, VA.

### October 1991

- ✓ **Oct. 14.** AAAA National Executive Board Meeting, Sheraton Washington Hotel, Washington D.C.
- ✓ **Oct. 14.** AAAA Scholarship Board of Governors Executive Committee Meeting, Sheraton

Washington Hotel, Washington, D.C.

### November, 1991

- ✓ **Nov. 5-6.** 9th AAAA Annual Aircraft Survivability Equipment Symposium, Hosted by Hughes Danbury Optical Systems, El Segundo, CA.
- ✓ **Nov. 5.** AAAA ASE Award Presentation, Los Angeles Airport Marriot, Los Angeles, CA.

### December, 1991

- ✓ **Dec. 5.** AAAA Aviation Trainer of the Year Award Presentation, AAAA Air/Sea Rescue Award Presentation, and AAAA ROTC Award Presentation, Ft. Rucker, AL.
- ✓ **Dec. 6.** AAAA National Executive Board Meeting, Fort Rucker, AL.

## OUR ASC-15B KEEPS BATTLE COMMANDERS IN CONTROL.

Collins AN/ASC-15B gives battlefield commanders enhanced flexibility in fast-changing tactical situations. Designed for quick and easy removal from the host aircraft, the system also serves as a stand-alone ground command post.

Four radios in a single command and control console provide the communications capabilities normally requiring up to eight radios. The ASC-15B consists of three AN/ARC-182 VHF/UHF radios and one AN/ARC-174 HF radio to provide multiband secure voice and data communications. Have Quick ECCM, channel scanning, NOE IFM and satellite communications.

Our system is NATO and Tri-Service interoperable, and has planned growth (P'I) including Have Quick II/IIA and SINGARS.

The ASC-15B is a national stock numbered item. Turnkey installation service can be provided through the Rockwell Aircraft Modification Center in Shreveport, Louisiana.

For more information, contact: Collins Avionics and Communications Division, Rockwell International, 350 Collins Road NE, Cedar Rapids, Iowa 52498. (319) 395-1600. Telex 464-435.
