A Smaller Army

Ability, not size, is the true measure of a fighting force.

In the downsized Army, fewer than 1300 Comanche helicopters will replace 3100 Vietnam Era aircraft.

They'll make the light helicopter fleet more survivable, more lethal, and more supportable than ever before.

RAH-66 Comanche. On time and on budget.

Briefings

The National Aeronautic Association has selected LTG Robert R. Williams, Ret., AAAA Charter Member and former AAAA President, to receive one of the prestigious Elder Statesmen of Aviation awards for 1993. The award is given to outstanding Americans who, over a period of years, have made contributions of significant value to aeronautics. LTG Williams is widely regarded as the father of U.S. Army Aviation, and was personally responsible for persuading authorities in the Army and Department of Defense to establish a series of blue ribbon boards whose findings directly resulted in elevating Army Aviation units from the company level to the airmobile division. His efforts have made lasting and significant contributions to the U.S. Army's ability to effectively discharge its mission.

At a hearing before the House Armed Services Committee on 31 March 1993, GEN Gordon R. Sullivan, Chief of Staff, U.S. Army, told representatives that, "America's Army ... is the best in the world because it has displayed a consistent will to prepare to win. Today, our Army is a rapidly-changing institution. . . Our challenge—yours, mine, the Administration's, and the American people's—is to transform this Army, while keeping it trained and ready so that we can respond if needed, during this transformation period." GEN Sullivan reportedly added, "We are the eighth-largest Army in the world, behind countries like the two Koreas, Vietnam, Pakistan, India, China, Russia, and Indonesia. Soon we will be ninth; eventually, I think we will get into double digits."

McDonnell Douglas Corporation will fully integrate its helicopter operations into McDonnell Douglas Aerospace. The decision signals an end to active pursuit of joint venture or sale prospects for the helicopter division, based in Mesa, AZ. After extensive evaluations of a number of serious prospects, the company concluded that a partnership or sale at this time is not in the best interest of McDonnell Douglas or its customers.

In other McDonnell Douglas news, the Aviation Applied Technology Directorate (AATD), U.S. Army Aviation and Troop Command, Ft. Eustis, VA, awarded a 58-month, \$70,464,616 contract to McDonnell Douglas Helicopter Co. for the Rotorcraft Pilot's Associate (RPA) program. The RPA program is intended to provide revolutionary combat mission effectiveness for helicopters through the application of cognitive decision aiding systems, as well as integration of advanced technologies in the areas of pilotage, target acquisition, armament, and fire control, among others.

WHEN THE BUDGET CUT BECOMES MORE THAN JUST A PRACTICE MANEUVER.

Photograph of Real Time Imagery

THERE is no such thing as a simulated budget cut. Now, more than ever, you need the cost-efficient, High Performance Simulator that only an industry leader like Evans & Sutherland can provide.

Our ESIG® line of Image Generators delivers quality scene realism at a fraction of what others cost and provide full compatibility with the Army's CATT and DIS initiatives. We make it easy to upgrade as your needs evolve.

With 25 years of experience in providing visual systems for training applications, we can help you prepare for tomorrow, today.

EVANS & SUTHERLAND
THE POWER BEHIND THE SCENES

AMERICA'S ARMY — FLYING INTO THE 21st CENTURY

The Army Aviation Association of America can be justly proud of its contribution to the military-industrial effort — Team Apache — that will allow McDonnell Douglas Helicopter Company to produce this awesome flying machine [the AH-64D Longbow Apache]. Your commitment to educating soldiers, businesses, and the public made a big difference in this and many other Army programs. Thank you for your consistent support for our soldiers and the whole Army family, especially our Army aviators.

The AAAA gathers the whole Army family — Active, Army Reserve, National Guard, Army civilians, contractors, retirees, veterans, and friends of the Army. I see representatives of all of these groups here

*Excerpted from
the Chief's
address at the
AAAA Arizona
Chapter
meeting on the
eve of the
Longbow
Apache rollout.*

tonight. All of you do your part for the common defense. I thank you for your selfless service to our country.

Tonight, America's soldiers stand trained and ready. We are operating all over the world, in some 75 countries. Along with

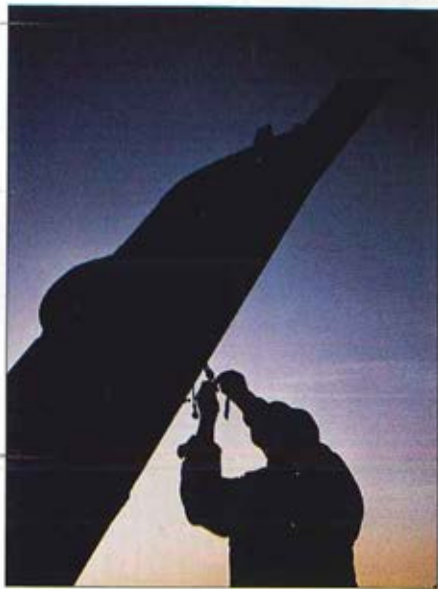

175,000 stationed forward in Europe, Asia, and Central America, we have tonight nearly 22,000 soldiers deployed on contingencies, many in harm's way. Army Aviation, featuring firepower, mobility, and speed, paces our efforts.

In Somalia, the 10th Mountain Division contingent centers around COL Michael D. Dallas and his 10th Aviation Brigade, including Cobras and Black Hawks of Task Force 2-25 Aviation. That is a tough mission.

In Croatia, our 502d Mobile Army

DynCorp's Safety Record Is No Accident.

In fact, it's the best in the business.

After almost five years of maintenance support at Fort Rucker, the largest military pilot training school in the world, DynCorp has supported more than 1.6 million flying hours without a maintenance related accident. It's a record that goes unsurpassed...by anyone...anywhere. It's earned DynCorp a worldwide reputation for quality service. But most important, it's kept our future aviators in the air. Safely.

Experience Counts

DynCorp

Surgical Hospital (MASH) treats patients in Zagreb. MEDEVAC helicopters make the whole MASH concept possible.

Right here at home, in the Midwest, we committed some 300 active duty troops and 8,200 National Guardsmen working on flood containment and recovery. They were supported all the way by the workhorse Huey helicopters of Guard aviation.

Only a world-class Army could do all of that in the midst of a drawdown. Our Army is in good shape. We are trained and ready. That reflects a lot of hard work and full support of our people, especially the AAAA. You of all Americans know why it is important for us to be ready when the call comes. We cannot train a skilled aviator or build a modern attack helicopter at the line of departure.

To fight and win worldwide, we must have state-of-the-art equipment. Our efforts in Army Aviation prove our determination to keep our justified reputation as the best-armed military force in the world. Consider the emerging aviation fleet of the 21st century:

- AH-64D Longbow Apache day and night attack helicopter.
- OH-58D Kiowa Warrior day and night armed scout.
- RAH-66 Comanche improved day and night armed scout.
- UH-60L improved Black Hawk

assault helicopter.

- UH-60Q MEDEVAC Black Hawk.
- MH-47E special operations Chinook and MH-60K SOA Black Hawk.

We tie these magnificent war machines into a seamless digital picture thanks to the microprocessor revolution: attack crews, M1A2 Abrams tank commanders, artillery batteries, air defenders, and command posts at all echelons will share a common electronic view of the ground and the fight — us, them, and what lies between. Imagine real-time situational awareness, not just for pilots, but throughout the force. By 1998, we hope to field just such a “digitized” division.

Technology springs from our doctrine, the engine for all modernization. You know we recently released our new FM 100-5 *Operations*, the capstone of our how-to-fight literature. This new manual captures a lot of the things we have learned and perfected in Panama, Southwest Asia, and on other missions.

We expect to fight side by side with our fellow services — one team, one fight. Army aviators pioneered these joint efforts. You routinely work hand in hand with the Air Force, Navy, and Marines. More than 130 aircraft of all services flew into battle over Panama

City in the dark hours of an early December morning back in 1989. On a black night in mid-January of 1991, Army Apache crews did it again, joining hundreds of Coalition aircraft in the massive opening strikes of the war to liberate Kuwait. We have institutionalized that kind of synchronization throughout our Army.

Our Army anticipates operations other than war, either concurrent with conflicts or as stand-alone efforts. Our soldiers don't just break things and kill people. We establish order. We control land and populations. Where we have been in Somalia, folks eat, work, and play — they have a life again. In Dade County after Hurricane Andrew, we went into a few spots where police hadn't been for six months. People were glad to see us.

Our doctrine accepts those sorts of roles. You'll soon see FM 100-23 on peace support operations, and FM 100-19 on support to civil authorities. The Cold War is over. We are fighting today's fights.

Doctrine is only as good as practice — training. The training imperative serves as the glue that binds our force together. We deal with today's realities, not tomorrow's "maybes". Our combat training centers at Fort Irwin, Fort Polk, and Hohenfels form the centerpiece of our collective training efforts. The new Air-Ground Engage-

ment System (AGES) allows Army aviation full play. All forces, air and ground, work in a joint arena. Well-schooled role players recreate allied units, local civilians, news media, and even insurgents and terrorists. The Combined Training Centers (CTCs) depict the realities of the Panama and Iraq aftermaths and the difficulties of a Somalia-type scenario. We don't cut corners.

The Army has changed a lot in the last five years. We are smaller, of course. Strategically, we have shifted from containing the Soviets to global power projection. It has been tough, but we have done it, and stayed trained and ready throughout. There is more work ahead.

But even as we make important, bold shifts, we will not change our essence. We remain dedicated to selfless service, and you can see it on our soldiers' faces and hear it in their voices. Soldiers thrive on challenges. They want to do the hard things well.

No power on earth can stop people like that. They believe in themselves, our Army, and our country. Selfless service — all the way, every day — that's what our soldiers provide. Thanks to them, America knows that it can count on its army. We get the job done.

★★

GEN Sullivan is the Acting Secretary of the Army and the Chief of Staff, U.S. Army, Washington, D.C.

Air-to-Air Stinger. The Dawn of a New Era.

Air-To-Air Stinger (ATAS) provides Army aviators a combat-proven, lightweight solution for helicopter air combat.

In operation with Kiowa and Kiowa Warrior, ATAS is planned for integration on Apache and Comanche. Weapon system enhancements are under way to defeat the evolving threat well into the next century.

Air-To-Air Stinger plus Army Aviation. A lethal combination.

ARMY AVIATION AND FUTURE OPERATIONS

My message this month is on the essence of Army Aviation, its employment principles and our future direction.

This current era confirms the increasing use of high technology in future warfare. Weapons with the "effects of massed forces" are available to any nation possessing hard currency. Precision munitions, digital communications, and position location equipment promise to change the face of future battles and operations other than war.

The dynamics of the battlefield and the broad spectrum of challenges urgently demand intuitive and versatile leaders supported by agile battle staffs and well-trained soldiers. Recent world events underscore the need for a trained and ready contingency-oriented Army.

*How the
principles of
Army Aviation
will be served
by the
Aviation
Restructure
Initiative.*

Mobility, agility, simultaneity of effort, lethality, flexibility, increased battle tempo, and space age logistics must dominate our Nation's restructuring and investment decisions. Domestic change and fiscal constraints broaden our challenges.

The centerpiece of U.S. National military strategy continues to be deterrence, coupled with a military capability to inflict overwhelming destruction upon its enemies should deterrence fail. We will maintain a smaller force, with fewer forces forward deployed. Major regional contingencies will be the basis for force development planning. Military operations other than war will also be important. Peacekeeping, humanitarian assistance, peace-making, counter-narcotics, and sup-

port of civil authorities operations will demand innovative use of aviation units.

Seldom, if ever, will military operations be conducted by a single Service. The Army will act as part of a joint or combined force. Properly planned and executed, operations by aviation elements can be decisive at the tactical level and may make decisive contributions to operational level success.

However, aviation is not a substitute for other members of the combined arms team; rather, we bring unique capabilities that complement the other combat arms. Our ability to operate in all dimensions of the battle space provides a degree of flexibility and agility that is not only unique, but brings maneuver warfare to a pinnacle of battle dominance.

While aviation forces break friction with the ground, we operate in the ground regime and are subjected to the same dynamics of the battlefield and the same physics of land warfare as other combat units.

Aviation Maneuver — to place the enemy in a position of disadvantage through the flexible application of combat power in the third dimension.

We are a versatile force whose primary focus is combat operations. Mission planning and execution are driven by general princi-

ples which apply and go beyond or derive from the principles of war and the tenets of Army operations. The principles are as follows:

Aviation operates in the ground regime, not in the aerospace environment. We are a member of the combined arms team; we are not the air component of the U.S. Army. Our primary mission is to fight the land battle, secondarily to support ground operations. Our leverage is achieved through a combination of observation, mobility and firepower that is unprecedented in land warfare.

Aviation expands the battlefield in space, time and echelon. Expansion is necessary to seize the initiative at a critical point. We expand the ground commander's battlefield in space and time by extending the range at which fires, reconnaissance, and surveillance can be directed at the enemy.

Aviation performs combat and combat support battlefield functions. Aviation's greatest contribution is the ability to apply decisive combat power at critical times, anywhere on the battlefield. This may be direct fire or the insertion of overwhelming infantry fires by air assault.

Aviation does not perform combat service support battlefield functions except for those designated aviation logistics elements responsible for the maintenance and supply of aviation combat and

See First, Shoot First, Survive

D.A.V.

Warning and Surveillance System for Helicopters

The D.A.V. Warning and Surveillance system for helicopters detects, classifies, and identifies air threats. This covert pulse doppler radar system provides 360° coverage in a compact module designed for light helicopter installations. It detects and locates low flying air threats including hovering helicopters at safe distances. After detection, the D.A.V. classifies airplanes and helicopters and identifies helicopters by type. The system is designed to operate in all weather and battlefield conditions and

provides very short reaction times. Its location accuracies are compatible with EO/IR devices including missile seekers. The D.A.V. installs easily on helicopter rotor hubs and is compatible with current and future helicopters such as the AH64, OH58D, UH60, AH6, MH6 and RAH66. By adding the D.A.V. to your helicopter, you provide the capability to find the threat, locate the threat, and identify the threat . . . before it finds you.

This program is a cooperative effort with Dassault Electronique.

Demonstration flights of the D.A.V. radar have been conducted in France for the U.S. Army. The demonstration was organized by the French Ministry of Defense and took place from 1-8 June 1993. The D.A.V. operated onboard a French Puma helicopter with one U.S. Army UH-1, one U.S. Army UH-60, and one French Army Gazelle as the target aircraft. U.S. Army representatives stated they were completely satisfied with the execution of the demonstration and data analysis is ongoing.

Electronics & Space Corp.

A Subsidiary of ESCO Electronics Corporation

combat support units.

The role of combat aviation is to locate and destroy enemy ground forces and support elements. Aviation combines the four elements of combat power — maneuver, firepower, protection, and leadership. Together with armor and infantry, combat aviation forms the nucleus of the Army's maneuver forces to close with and destroy the enemy.

Combat aviation is concentrated at division level. Division is the highest level at which infantry, armor and combat aviation are fought together in an habitual association. All three arms are required for deep, close, and rear operations throughout the course of battle. Therefore, combat aviation must be primarily assigned to and employed by divisional aviation brigades. Aviation fights as units and must be given unit missions. In like manner, aviation units conducting aviation maneuver operations are given maneuver objectives rather than individual targets.

Combat aviation is primarily employed against deep targets and on flanks, secondarily in support of ground maneuver elements in the close fight. The mobility and firepower of attack helicopters are most effective when concentrated against enemy flanks or against moving armor and artillery. When coordinated with di-

rect and indirect fires at the Forward Line of Own Troops (FLOT), surprise and disruption of all enemy forces will be greatest. When fighting in the close battle, attack helicopters minimize vulnerability and exploit the effect of surprise by using its own axes and battle positions.

Combat aviation will be supported by all of the Battlefield Operating Systems (BOS). As one of the division and corps commanders' primary maneuver elements, combat aviation will be supported by the other BOS. Systems such as air defense, fire support, intelligence and engineer are essential and must be synchronized early in the planning process.

Combat support aviation is primarily concentrated at corps and employed at both corps and division levels. General support, medium lift and special purpose aviation units will be primarily assigned to corps aviation groups and will be used for corps missions or allocated to divisions when required.

Aviation units are integrated into the combined arms down to the level at which they will be employed. Aviation units cannot be effectively employed if they are plugged into operations on a task order basis. The division aviation brigade is the primary level of integration, and the brigade commander is responsible for all divi-

AWESOME.

AND THEN SOME.

The new multirole AH-64D Longbow Apache is 16 times more effective than the original Apache of Desert Storm fame. Sixteen times. That's awesome.

So, what's different? Integration of the new Longbow radar and fire-

and-forget Hellfire missile provides more combat capability in all weather conditions. It can see farther. See more. And fight through smoke, rain and fog. AH-64D Longbow Apache can detect, classify, prioritize and engage more targets, and do it faster.

And it's flying now. Longbow Apache is making the world's best attack helicopter even better.

With tighter defense budgets, Apache modernization is a smart move for the U.S. Army and the country — and then some.

MCDONNELL DOUGLAS
APACHE OWNS THE NIGHT

sional aviation. He will also command and integrate reinforcing aviation units from corps. When aviation units are placed under operational control of the other brigades, they will normally be "for a mission basis" and a liaison detachment should be placed at the ground brigade command post to advise on aviation employment.

Planning times for air and ground maneuver elements will be the same. Aviation units conduct deliberate planning within the same time parameters as the other maneuver elements. Air-space coordination, route clearances, and weather updates complicate the task for aviation staffs; but for effective combat operations, the standard is the same.

The aviation brigade staff is a planning staff. The key to success in planning aviation maneuver is including the aviation brigade commander early in the stages of the planning. The aviation brigade commander will normally collocate his Tactical Operations Center/Tactical Air Command (TOC/TAC) with the division/corps main to increase the planning capabilities of both staffs in regard to aviation maneuver across the battlefield.

Today's aviation is much different than that of the Vietnam era. The organizational structure and technology of the aviation force of the 1960s changed over

time to meet the challenges of the 1980s and 1990s. Operations such as JUST CAUSE and DESERT STORM were practical examinations that certified aviation as a lethal maneuver force.

Once again aviation must reshape its organizational structure and technology to meet the challenges of a new international order, a new national defense focus, and the realities of current resources. In shaping aviation for the future, we must increase and sustain our warfighting capabilities; divest old, aged, and inadequate fleets; posture for modernization; and stay within available resources. Aviation must remain a capable, affordable force and not simply a smaller version of its Cold War incarnation.

Analysis of current deficiencies, lessons learned and emerging doctrine form the basis for guiding the future aviation designs. Our modernization strategy leverages technology to increase warfighting capabilities, digitize the battlefield and promote horizontal technology integration. Through the retirement of old systems, the total fleet will be reduced from more than 8,000 aircraft to approximately 4,600 and aircraft types from ten to five in FY 2012. The scout/attack fleet will be reduced from more than 3,600 aircraft to approxi-

BLACK HAWK FLIGHT SIMULATOR PROGRAM UPDATE

The Black Hawk Flight Simulator program has continued to be dynamic and successful.

Since the last UH-60 Flight Simulator article written for ARMY AVIATION Magazine, November 30, 1990, we've completed the fielding of the 18 production Black Hawk Flight Simulators. Number 17 (Ft. Carson, CO) was fielded in September 1990 with the last device fielded at Ft. Rucker, AL in May 1992. Due to a site change for the last device (from Ft. Wainwright, AK to Ft. Rucker), it was necessary to move one of the two UH-60 Flight Simulators located in Korea to Ft. Wainwright, in October 1992.

The Black Hawk Flight Simulator program was also responsible for the acquisition and delivery of a Foreign

New technology brings increased capability to Black Hawk simulation.

Military Sales (FMS) UH-60 Desert Hawk Flight Simulator to King Khalid Military City (KKMC), Saudi Arabia in October 1992. This device was delivered with a Saudi Arabian desert visual data base.

Additional capabilities were added to the

Black Hawk Flight Simulators with the incorporation of three major Engineering Change Proposals (ECPs). These included the Block Update (BUD), Global Positioning Systems (GPS) and the A-L Modification (A-L) ECPs.

The first contract is the IOS/APR-39A(V)1 ECP with the stated purpose of replacing the Sanders Instructor Operator Station (IOS) with the latest technology Silicon Graphics IOS and replacing the older version APR-39(V)1 with

the latest APR-39A(V)1 Radar Warning Receiver (RWR).

The second contract is the Networking ECP with the stated purpose of networking together the two UH-60 Flight Simulators at Ft. Campbell, KY.

Let's discuss some of the recent developments. A decision was made by the Directorate of Simulation (DOS), Ft. Rucker, the Utility Helicopter Project Manager's Office, St. Louis, MO, and the Project Manager for Training Devices, STRICOM to replace the older IOS in all Black Hawk Flight Simulators.

As most of you already know, the older IOS system is not user friendly. More importantly, Sanders Corporation informed us that they would no longer be providing spare parts for these systems.

Black Hawk team members, Mr. Randy Ramsey, Mr. Jerry LaCross, and Mr. Dan Bradley from DOS met with Mr. Jason Weiner and Mr. John Donahue, Black Hawk team members at STRICOM, to discuss what features would be required in a new IOS. These ideas were translated into a statement of work (SOW) and subsequently a

modification to the Black Hawk contract was awarded to CAE-Link Corporation.

Using the same program approach that proved successful with the GPS, we worked with Mr. Jerry Kelly and his team from CAE-Link. Our approach was simply Government and Defense teaming. On the Government side, we gave Link our ideas, and they responded verbally and on paper to what they thought we wanted. We took what they gave us, modified it and provided additional direction. This process went back and forth eight to ten times.

"The new IOS is user friendly and will provide a full color presentation of the gaming area..."

There have been no surprises. The product that was developed is exactly what we wanted, and we think that you are going to like it. The new IOS is user friendly and will provide a full color presentation of the gaming area and will include icons for targets, leadship and the ownship. Infinitely adjustable map scaling with independent zoom capabilities and the ability to reposition the ownship instantly utilizing the point and move capabilities of the touch screens will allow the instructor/operator to rapidly adjust **(Black Hawk — cont. on p. 104)**

STRIPES ON THE FLIGHT LINE – REVISITED

Technical/Leadership Tracking and the Stripes on the Flight Line initiatives are two extremely important but inseparable issues within the enlisted Aviation community.

To keep pace with technology while maintaining our readiness, it is imperative we keep qualified and experienced technicians on the flight line. Historically, this created a paradox when leadership positions were the foundations for promotion opportunity. Technical/leadership tracking is a change in personnel management philosophy that will support both a technical track and a leadership track. Figure 1 depicts this initiative.

Stripes on the Flight Line supports implementation of the technical track by retaining our most experienced soldiers in aircraft maintenance roles.

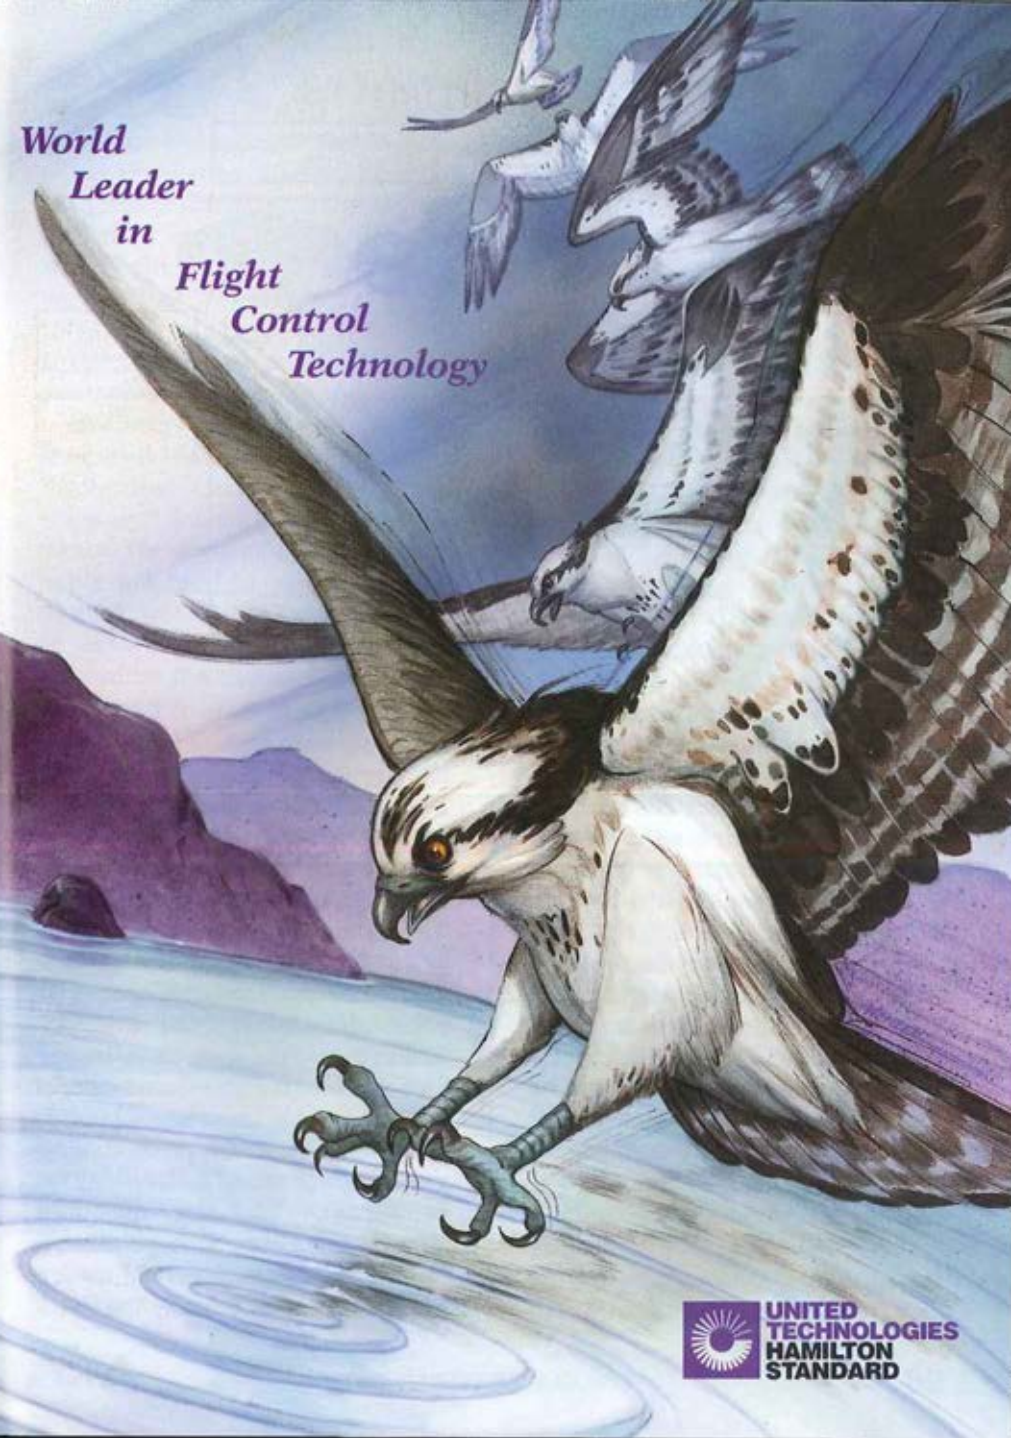

A look at two key enlisted issues for Aviation Branch NCOs.

While it is simple to explain our intent, the process to implement it is complex. This is largely due to Department of the Army Standards of Grade (SGA) requirements, which are designed to ensure full promotion opportunity, and the current processes used

by the Department of the Army centralized selection boards for promotion.

SGA requirements are described in AR 611-1 and the Guide for Preparation of Changes to the Military Occupation Classification Structure (MOCS). These SGA requirements are symbolized through a personnel management pyramid. The pyramid depicts a balance of requirements within a MOCS to support competition and opportunity for promotion at a rate consistent with other MOCSs

within the Army. It ensures that we don't have more sergeant first class requirements than we have staff sergeants, and that we don't have so few sergeant first class requirements that promotion is too difficult. There are other considerations for authorizations, like doctrinal and operational requirements, but the SGA is the primary personnel consideration. Realistically, it is too difficult to match any MOCS exactly to the pyramid, but we use it as a guide to monitor or merge existing MOCSs or create new ones.

The Department of the Army is reluctant to approve MOCS authorizations that deviate significantly from the ideal pyramid, as they affect promotion opportunity. All

soldiers should have a fair opportunity for promotion. In any MOCS, if there are too many personnel in a given grade competing for too few positions in the next higher grade, soldiers will not be promoted at the same rate as in other Army MOCSs. There must be a logical methodology to match the Army's needs.

Another problem develops as we phase aircraft out of the inventory. Reductions to the fleet, as we modernize systems, reduces the number of authorizations for related MOCSs and thus reduces the promotion opportunity for those soldiers. As we reduce the Mohawk, Iroquois, Kiowa, and Cobra vintage aircraft and introduce the family of modernized aircraft, specifically the Black

Hawk, Apache, Comanche, Kiowa Warrior, and CH-47D Chinook, great care and concern must be placed on developing a personnel plan designed to transition these soldiers into other compatible MOCSs that will continue to offer promotion opportunities. This plan must be initiated well in advance of aircraft introduction to allow proper personnel management integration.

As Army Aviation transitions from numerous airframes to a few modernized aircraft, we must develop a vision for aircraft maintenance. These visionary efforts must apply not only to our modernized aircraft, but also be flexible enough to ensure maintenance personnel focused on the non-modernized aircraft can transition their invaluable skills to meet the future needs.

Now back to Stripes on the Flight Line. If we simply authorize staff sergeant crew chiefs in lieu of specialists or sergeants, we may not solve the problem. We will create a demand for staff sergeants, and sergeants will get promoted, but it will only increase the rank on the aircraft, not the experience. This move could also create a flood of staff sergeant authorizations, making promotion to sergeant first class very difficult. This dramatic change in the SGA will not benefit the soldier or the Army in the long term.

Our Aviation Branch must develop a technical track to allow

our senior aircraft maintenance soldiers to remain in aircraft maintenance, while simultaneously remaining competitive for promotion. Competition must be against other technicians. The leadership tracked soldiers must be compared only against other leadership tracked soldiers. Our current single tracked system would not be fair to technical tracked soldiers. Current doctrine allows 85% of the 67Z master/first sergeants to work in the leadership arena, and 100 percent of our 67Z sergeants major to work in staff areas of responsibilities. This must be reversed or at least equalled, to keep highly-trained and experienced aircraft maintenance soldiers working in aircraft maintenance.

We hope you can now see why the Stripes on the Flight Line initiative cannot stand alone but is intertwined with the Leadership/Technical Tracking initiative. Both will benefit the using unit and the Aviation Branch, but they require simultaneous implementation. Neither can stand alone. They are linked to the reduction in the Aviation MOCS career progression of our enlisted soldiers and focused on maintaining our modernized aircraft, with safety and efficiency in mind.

VICTORY AT SUNSET: APACHES RETURN TO THE DESERT

One year after the return of forces from Operation DESERT STORM, when many units were either drawing down or still recovering, Victory Corps in Germany deployed its Apache attack helicopter units back to the desert. The deployment, known as WILLING EAGLE II, successfully tested and validated the strategic deployment, tactical employment, and redeployment of eight Apache battalions.

WILLING EAGLE II was the largest out-of-country exercise conducted by European based U.S. Army Aviation units in FY92. It provided limited means to practice the Army's concept of force projection at the operational level. Its major benefit was the exercise and refinement of attack helicopter tactics and

An analysis of attack helicopter tactics and techniques in WILLING EAGLE II.

techniques within the framework of Air-Land Battle doctrine at the tactical level. This refinement will further enhance Army Aviation's role in combined arms operations and ensure victory on the modern battlefield. This article will describe the composition and conduct of the deployment and discuss attack aviation employment methods used during WILLING EAGLE II.

The joint/combined portion of WILLING EAGLE II was led by COL Richard L. Noel, Commander of 4th Brigade, 1st Armored Division. It began with the build-up of Task Force Eagle (the Army contingent) commanded by LTC Patrick J. Sheahan. The 3rd Battalion, 227th Aviation Regiment of 4th Brigade, 1st Armored Division was

GRUMMAN®

used as an equipment and personnel base. A total of 198 soldiers comprised of 138 1st Armored Division soldiers, 12 3rd Infantry Division soldiers, 12 11th Aviation Brigade soldiers, two 12th Aviation Brigade soldiers, 24 Victory Corps soldiers, and 11 civilians from ATCOM made up the Task Force. Equipment which was deployed included 18 AH-64s, three UH-60s, three Commercial Utility Cargo Vehicles (CUCVs), one HMMWV, and an Apache battalion's worth of parts and tools. A great deal of host nation support including vehicles, mess, maintenance facilities, refuel and repair parts were also used.

The notional mission of Task Force Eagle was to deploy out of sector in late July of 1992 in defense of a friendly nation, conduct security operations, and prepare for offensive operations to restore the national border. Conduct of day/night company and battalion level battle drills culminating in Table XII attack helicopter gunnery was the tactical vehicle.

FM 1-100, Doctrinal Principles for Army Aviation in Combat Operations, begins by stating that "AirLand Battle doctrine requires

worldwide mobility and warfighting capability across the spectrum of conflict" (Headquarters, Department of the Army [HQDA], 1989). The deployment of Task Force Eagle as a Victory Corps advance element to another theater of operations exercised worldwide mobility and force projection. More importantly, the deployment validated one of the most basic assumptions of AirLand Battle doctrine: routine cooperation of Army units with other services and nations in joint,

combined, and contingency operations. The synergistic effects of other fighting services, civil authorities, allies, and nations resulted in mission success.

The deployment of all units involved in WILLING

EAGLE II was successful. The price of success, however, was significant. We used 20 U.S. Air Force and five U.S. Army sorties involving C-5A, C-141, C-130, 737, and C-12 aircraft. That mix of aircraft ensured the upload, transport, and download of eight battalions, 21,752 rounds of ammunition, and hundreds of tons of equipment. In addition, the host nation was asked for and provided 65 days of food, over 270,000 gallons of fuel, vehicles, equipment,

"The synergistic effects of other fighting services, civil authorities, allies, and nations resulted in mission success."

The HF Radio That's As Easy To Use As A More Familiar Communications Device.

Until now, HF communications has been, at times, difficult to use. Between the dual challenges of frequency management and atmospheric propagation, maintaining communications could be like trying to nail Jello® to a tree.

But Bendix/King's new off-the-shelf STRAC-COM HF/ALE radio changes all that.

Offering ALE (automatic link establishment), our new STRAC-COM unit monitors and controls HF frequency selection with unprecedented ease. Its advanced design incorporates the most extensive use to date of digital signal processing (DSP) techniques in a production HF radio. And its automated linking procedures make establishing HF communications as easy as dialing a telephone. You key the radio, and its ALE function does the rest.

Fully compliant with the MIL-STD-188-141A waveform, the Bendix/King STRAC-COM scans up to 10 HF channels per second. Add NAV sensor input and you can implement flight following. Through the use of DSP, it can offer digital data compression, embedded modem operations, low

probability of intercept (LPI) anti-jam waveforms, and compatibility with multiple existing speech/data encryption systems. And other DSP advantages include the ability to add functions without adding hardware, saving on space, weight and cost.

Even as it takes the established reliability of the AN/ARC-199 to a new level, our STRAC-COM HF/ALE radio offers the same form and fit. To reduce the cost of modernization, all fielded AN/ARC-199s can be modified to meet these new performance parameters. And, of course, it's fully compatible with MIL-STD-1553B bus architecture.

In short, the HF radio of the future is here, and it's easier than ever to use.

facilities, and invaluable personnel support.

The effective application and sustainment of the dynamics of combat power in concert will decide the outcome of major operations, battles, and engagements (HQDA, 1992). To optimize combat power, Army Aviation must maximize the effects of air maneuver, firepower, protection, and leadership in the vertical dimension. Optimization was achieved through understanding the capabilities and limitations of our sister services and allies. Training was conducted to overcome our limitations.

During WILLING EAGLE II, the massive use of U.S. and Allied Air Force support created endless opportunities for exercising the dynamics of combat power. Tactical deployment to the theater of operations, precision Apache attack helicopter fire power, defensive operations, intelligence, ammunition/logistics planning, and force sustainment/protection were continually exercised not only with the cooperation of allied nations and sister services, but also under their limitations and restrictions.

Leadership, the most essential dynamic of combat power, practiced decision making under new and unexpected conditions. Task Force Eagle leaders and soldiers were given the mission of supporting over 100 company battle drills in

a two month period. Company missions included Table VI, Table XI, and Table XII helicopter gunnery, as well as live electronic warfare ranges.

Missions were flown both day and night with armament including 131 live Hellfire missile shots. Operations were 24 hours-a-day in order to maintain the 18 Apache and three Black Hawk helicopters at OPTEMPOs 2.3 and 3.1 times the DA standard respectively.

The commanders and staffs of the rotating battalions were immediately placed in positions where they had to exercise command, control, and coordination. Units were put on a reverse sleep cycle upon arrival in the host country. Leaders were given operations orders which challenged them with two deep attack missions a day into totally unfamiliar desert terrain.

There were no familiarization flights. This was a "come as you are" war. Commanders and staffs with Warrant Officer expertise conducted detailed planning, sand table rehearsals and synchronization drills to provide the versatile air maneuver which supported the ground commander's plan.

Unit commanders were required to meet their missions while protecting the force. Aerial security, maneuver, deception, dispersion, suppression and destruction of enemy weapons are all part of the

Imagine for a moment that each word on this page weighs 500 pounds. At high altitude, a Chinook helicopter can lift about this much. But with enhanced T55 engines, it could lift this much. Big deal, you say. A difference of one measly little sentence. Is it worth upgrading the engines on the Chinook for one little sentence? Well, remember, that one sentence means 15 extra soldiers. Or 20% fewer trips back and forth. So yes, one sentence is a big deal. Especially when you have to transport a whole paragraph.

The enhanced T55 series. A whole new level of technology. A whole new level of power.

plan. More importantly during WILLING EAGLE II, commanders were challenged with protecting the safety, health, morale, and welfare of soldiers, and leaders gained invaluable experience in exercising the dynamics of combat power during WILLING EAGLE II.

Safety is a key responsibility. The realistic training during WILLING EAGLE II provided ample opportunity for commanders to train themselves and their soldiers in risk management. Careful analysis of the risk in order to safely complete the mission instills confidence and preserves human and equipment resources.

Risk management, experience, expertise, and professionalism proved paramount during WILLING EAGLE II. The result was 1,265 accident free flying hours, and AH-64 fully mission capable rate of 71%, and a greater than 90% total mission capable rate for the exercise.

WILLING EAGLE II was an outstanding success. It trained and validated a strategic deployment plan for USAREUR attack helicopter battalions in a joint and combined training scenario. It demon-

strated that Apache units can sustain operations over the long haul in a harsh theater with two to three times the standard OPTEMPO seen in most Apache battalions today. Key to the sustainment of such an operation is a detailed and meticulous logistics support plan developed side-by-side with the operational plan.

Additionally, Army Aviation units were able to train to standard without the restrictions and other garrison encumbrances which ty-

pically affect Army units.

The concept of force projection combined with the dynamics of combat power and risk management were exercised per Army doctrine. The leaders and soldiers of WILLING EAGLE

II returned to Europe better trained and more capable of meeting the demands of a force projection national military strategy. Army Aviation demonstrated its great capability as an early deployable, hard-hitting combat force.

★★

At the time this article was written, LTC Sheahan was Commander, 4th Brigade, 1st Armored Division.

MAJ Adams was Commander, 3-227th Attack Helicopter Battalion, Hanau, Germany.

1LT Antolick was Apache Platoon Leader, B Co., 3-227 AHB, Hanau, Germany.

“WILLING EAGLE. . . demonstrated that Apache units can sustain operations over the long haul in a harsh theater with two to three times the standard OPTEMPO.”

COULD YOUR AUX TANK SURVIVE A FIRING SQUAD?

Robertson's **GUARDIAN**® auxiliary fuel tanks have survived .50 cal., 14.5mm and 20mm gunfire — even a brutal 65 ft. drop test *without leakage*.

Extending your range is one thing. Extending the survivability of your aircraft is another. Lightweight,

space-saving Robertson aux fuel systems with combat proven self-sealing bladders are designed to do both. So why fly with anything less than the most dependable, most survivable aux fuel systems in the air. The ones that exceed the U.S. military and government's most stringent crashworthy and functional requirements.

GO THE EXTRA DISTANCE WITH THE SURVIVORS. To get the most survivability and range from your aircraft, call (602) 967-5185. FAX (602) 968-3019 anytime. Or write P.O. Box 968, Tempe, AZ 85280 for more information.

Survivability Is Everything

Aircraft and aircrew survivability is dependent upon the energy-absorbing properties of aircraft components. Energy absorbing seating systems from Simula contribute to increased survivability of aircrews in a variety of helicopters.

Design knowledge accumulated from Simula's many years of experience in aviation crash safety is applied to each energy-attenuating seat we build. Every component of our seating products is thoroughly engineered to work together as a system to increase aircrew survivability and reduce the possibility of injury in a crash.

Simula currently produces armored or unarmored energy-absorbing seating products for the majority of U.S. military helicopters in use today. See what Simula has to offer to improve the efficiency and survivability of your helicopter fleet.

Call our military seating product manager today.

Introducing GEC's

AN/ASN-128/G

**Lightweight Doppler
Navigation System
with embedded
GPS Receiver**

**Upper window - MGRS coordinates
Lower window - GPS EPE/TGT STR**

- ▶ Provides the reliable AN/ASN-128 Doppler navigator with P/Y code GPS accuracy
- ▶ Retains the familiar AN/ASN-128 display, modified to combine Doppler and GPS navigation
- ▶ Utilizes GPS to calibrate Doppler accuracy

READY TO FIGHT. ANYWHERE. ANYTIME.

Apache. Blackhawk. Chinook. Kiowa. Iroquois. They must be ready to fly and fight at a moment's notice.

That's why the Army turns to Lockheed for aviation unit maintenance, modification, and supply support. Lockheed knows what it takes to keep Army aviation units up and ready. We've been in the maintenance and modification business for decades. In fact, in 1989 AAAA recognized our sustained record of outstanding support by naming Lockheed Support Systems, Inc., as the recipient of the Material Readiness Award for an Industry Team. And in 1990, AAAA honored us with the Material Readiness Award for Contributions by a Major Contractor.

We contribute to the readiness of a variety of helicopters, including the AH-64, the UH-60, the CH-47, the OH-58, and the UH-1. With Lockheed, the Army has available the full range of the corporation's aerospace technologies and resources. Most importantly, though, we respond rapidly, whether it's to a stateside base or a forward combat zone like Panama or Saudi Arabia.

Lockheed, part of the Army team—anywhere, anytime.

We Do What It Takes!

Whether that's quick-turnaround maintenance for flight trainer aircraft, ingenious modifications for improved aircraft performance, or battle-area support for special missions. We're there when needed for:

- Maintenance/Modification
- System Integration
- Equipment Repair
- Structural Upgrades
- Mission Enhancement
- Logistical Support

*Purveyors of premium peripherals
for the AN/APR-39A(V) Family of Radar Warning Systems.*

As experts in the AN/APR-39A Radar Signal Detecting Set, we offer a wide selection of products to support peak performance from your system, including:

- ★ Solid State Track File Data Recorder with integrated GPS Receiver
- ★ MIL-STD-1553B Communications Interface Unit
- ★ Improved Articulated Audio for reprogrammable alert messages.

Our Track File Data Recorder, like our MIL-STD-1553B CIU which is being integrated into the Apache Longbow avionics to support multifunction display of threat symbols, is designed as an integral slice for the APR-39A's Digital Processor. The recorder captures everything of interest to support mission debriefing, mission planning, and the analysis of threat data to support reprogramming of parameters in the Emitter Identification Tables.

Please call us to discuss your requirements.

"See us at AUTOTESTCON '93"

FUTURE OPERATIONS (continued from page 20)

mately 2,200 and total types from five to two. The resulting force will be fully modernized and fully capable.

Standard aviation organizations throughout the force are the foundational base for the redesign development. Attack, assault, and cavalry designs will be the same for the entire force. The attack helicopter battalion employment concept includes the interim configuration of nine of 24 AH-64 or AH-1 helicopters configured as scout aircraft for reconnaissance, security, and air combat missions. The objective organization replaces these aircraft with the RAH-66 Comanche at the same ratio. Light attack organizations will be either 24 AH-1s or 24 OH-58D Kiowa Warriors to be replaced entirely by RAH-66s. Two attack battalions will be assigned to every division and corps aviation brigade.

The air cavalry troops will also undergo change to increase their ability to perform reconnaissance and security operations. The objective organization will include two 12-ship RAH-66-equipped troops while the interim organization will contain eight AH-1s or OH-58Ds per troop.

Divisional utility designs will in-

clude a general support helicopter battalion of 24 UH-60s or an assault helicopter battalion of 38 UH-60s. All three CONUS-based corps brigades will contain 86 UH-60s, 24 in the command aviation battalion, 32 in the combined support aviation battalion, and 30 in the assault battalion.

Major improvements are also scheduled for aviation Combat Service Support (CSS). Heavy divisions will be restructured to include a Division Aviation Support Battalion (DASB) to focus logistical support for the aviation brigade. The DASB will include a headquarters and supply company, and Aviation Intermediate Maintenance (AVIM) company, and a ground maintenance company that will conduct wheeled vehicle and ground support equipment maintenance.

In shaping aviation for the future, the redesign initiative supports aviation's new doctrine. The interim and objective forces achieve significant cost reductions by removing obsolete aircraft, creating homogenous units, and streamlining maintenance. Army of excellence (AOE) deficiencies are fixed within the mission area and restructuring supports the Army modernization objectives. Warfighting capability is enhanced by investing manpower and force structure to manage and maintain modern systems with more capable organizations.

When You Need the Very Best

A multi-sensor P/Y Code GPS/LORAN Dzus-mount navigation receiver for worldwide Military Aviation operations

The TNL 3100SM P/Y Code GPS/LORAN Navigator is the most accurate radio navigation equipment ever developed for Military aircraft operations. Using the satellite-based Global Positioning System (GPS), it can calculate an aircraft position to within 15 meters RMS when operating in P/Y mode, anywhere in the world, any time of the day, in any weather.

At the heart of the navigator is an advanced, six-channel GPS receiver which calculates a new position every second and measures speed to better than a tenth of a knot. In addition to standard C/A code positioning, P/Y code is also available through incorporation of the PPS-SM, when valid Keys are loaded and Y code satellites are operational.

The Navigator is more than just a receiver, it's a complete navigation management system giving you instant access to detailed flight information. It will fix your position and then instantaneously calculate and display the bearing and distance to any point on the planet, display destination name, ground speed, ground track, and ETA. A course deviation indicator (CDI) is included as well. At the option of the pilot, a specific course inbound or outbound from any waypoint may be inserted into the navigation solution resulting in an appropriate course deviation displayed by the built-in CDI. Also available on the display is a pilot selectable Track Angle Error graphic located directly above the CDI, providing a visual representation of desired course intercept.

For navigation position redundancy the TNL 3100SM Navigator also includes a Trimble multi-chain LORAN receiver. Its new all-digital design provides excellent tracking and noise rejection performance.

The Navigator provides selectable Lat/Lon, MGRS, UTM and UPS coordinate systems with 123 worldwide Datums; user units (nautical miles, kilometers, statute miles, etc.); a quick access search to the 20 nearest airports, VORs, NDBs, intersections, and user waypoints; it can automatically sequence through 20 flight plans with up to 20 waypoints each; plan vertical descents or climbs; display minimum safe altitudes; calculate winds aloft; and provide E-6B calculation functions.

When coupled with an optional Air Data Computer, the TNL 3100SM Navigator displays true air speed, density altitude, pressure altitude, and winds aloft.

The Navigator incorporates a Jeppesen NavData card — a complete database of worldwide aeronautical information including public use and military airports, VORs, intersections, NDBs, airspace boundaries, MEAs, and much more. *Made in U.S.A.*

Aviation brings an extra dimension of excellence to warfighting — the third dimension! Breaking friction with the ground, aviation maneuver forces vastly expand the commander's ability to conduct simultaneous attack in depth and to do so undetected at night. The dynamics of combat power are magnified as aviation units integrate maneuver and firepower in combined arms operations under the capable leadership of aviation warriors. Force protection is significantly enhanced through technological advances that allow units to detect, engage and kill the enemy at extreme standoff distances, day and night, and to digitally transmit and receive realtime combat information among ground and air users.

In preparing to move the Army into the 21st Century, aviation will play an ever bigger role in projecting decisive combat power. New designs in organizational structure and aircraft technologies will focus on deployability while maintaining the edge on lethality and mobility. They

will be integrated and interoperable.

Aviation leaders must continue to conduct tough, realistic training to maintain that competitive edge. We must accept nothing short of the highest standards of safety by assessing and managing risk to ensure our resources are preserved, trained, and ready for battle.

Our branch is vested in the future of the U.S. Army through innovative doctrine, modernization, technological advancement, leader development, and a warrior ethic that permeates everything we do. Aviation is key in the combined arms team whether in combat or supporting combat. So while there are challenges, in them is incredible opportunity as we shape the force for the future.

Our mission is warfighting! We can never forget it. A trained and ready *total* force will contribute greatly to decisive victory!

QUALITY ACID FREE

The McDonnell Douglas AH-64 Apache Attack Helicopter is one of the most formidable weapons systems available to the Free World. The first in a new Army Aviation Art Series by artist Dru Blair, "Deliverance" depicts the swift and sudden appearance of one of these agile fighters along a winding river. The raw power of this fully armed 17,000 lb. aircraft is demonstrated in this high speedturn and the coning of the rotor blades indicates the tremendous demand placed on man and machine during this maneuver.

Reproduced on 100 lb. Quintessence Archival Stock, each print of "Deliverance" is individually inspected and signed by the artist. Please add \$6.00 shipping. Most orders shipped within 24 hrs. and your complete satisfaction is guaranteed. Catalog is available.

COMING THIS FALL: COBRA, BLACKHAWK, AND TWO NEW APACHE RELEASES

Visa/MasterCard, personal check or money order accepted.

Army Officers Save atUSAA

You'll find out why 9 out of 10 active duty officers save time and money with USAA. Request a free auto or homeowners insurance rate quote. There's no obligation. Then consider the "big picture." We think you'll save with USAA. Call us today.

1-800-292-8039

BLACK HAWK (continued from page 23)

the scenario to fully utilize the capabilities of the simulator and to meet the training needs of the crew.

After discussion with Lt. Col. Peter M. McGrew, USMC, of the Aviation Electronic Combat (AEC) PM office in St. Louis, MO and the AEC Project Manager, Litton and DOS, we decided to procure and develop an unclassified version of the APR-39A(V)1 Radar Warning Receiver (RWR). Initially, we were instructed to procure a classified version of the APR-39A(V)1 but after discussion with Lt. Col. McGrew and his team, we were assured that an unclassified version would suffice.

The latest technology computers and work stations have been purchased from Silicon Graphics, Inc. This was necessary due to the growth that has occurred within the original computational equipment because of the added ECPs. After the BUD, GPS, and A-L CPS, we were left with less than 20% spare capacity in computer timing and memory. With the addition of this new computer hardware, the Black Hawk simulators will be left with a substantial amount of computer spare capacity after the IOS/APR-39A(V)1 ECP.

Networking the two UH-60

New standards. New design.

DESIGNED TO FIT BELL

AND UH-1H/N
HELICOPTERS. . .

ERA'S
ENHANCED
EXTERNAL
AUXILIARY
FUEL
SYSTEM

Manufactured by:

Era Aviation, Inc.

Era Aviation Services
P.O. Box 6550/ Lake Charles, LA 70606
318-478-6131 / FAX 318-474-3918

FEATURES:

- 145 gallons of additional fuel extends endurance by approximately 1.5 hours.
- Improved flight characteristics
- Full utilization of cabin space
- Meets FAR 29.952 NPRM crashworthiness, using fuel cell bladders
- Optional MIL-T-27422 - self sealing fuel cell.
- Fuel shut-off valve to isolate external fuel system.
- Inertia switch (8 Gs) to remove all electrical power to system.
- Frangible, quick disconnect fittings.
- Independent control system mounted on glare shield or in center pedestal.
- Night vision compatible instrumentation.

- FAA Approved
- U.S. Patent No. 4,860,972

Flight Simulators at Ft. Campbell, KY, made sense given the immense training benefits that would be realized. The capabilities of networked UH-60 Flight Simulators will allow for multi-ship operations and flight in brown-out condition that resulted from the other helicopter's rotorwash.

Air-to-air training and evasive maneuvering can be performed safely and realistically by portraying the other networked helicopter as any type of helicopter from the scout to attack, friendly or hostile. Utilizing networked Flight Simulators, aviator training can develop from individual to crew to team. Multi-ship operations will

now be a reality and that equates to enhanced safety.

The Black Hawk Flight Simulator program has been alive and well. The new ECPs should prove to be an immense aid to future aviator training.

★★

ON THE AIR. IN THE AIR.

Only ITT makes SINGARS fly.

On the digitized battlefield, information must flow anywhere. On the ground. On the sea.

And in the air.

ITT SINGARS will provide the vital horizontal and vertical communications links to integrate all areas of the battlefield. ITT Airborne SINGARS increases the ability to meet tactical challenges whenever they arise. Wherever they arise.

In partnership with our customers and backed by millions of dollars of R&D investment, we are evolving Airborne SINGARS to keep pace with ITT SINGARS GEN III ground radio enhancements.

These enhancements include increased situation awareness capabilities. Improved data

rate. Increased reliability. Plus the latest in 1553 bus technology.

If your command and control needs go above the ground, ITT Airborne SINGARS provides the answer.

And it's only available from ITT, your partner in forward area battlefield communications.

IT CRUISES AT 468 KNOTS AND HAS THE ROOMIEST, MOST COMFORTABLE CABIN IN ITS CLASS.

The Beechjet 400A does not sacrifice comfort for speed. Quite the contrary.

The 400A's "vertical oval" cabin design provides more head and shoulder room and more interior volume than competitors' cabins can offer.

And the Beechjet 400A flies at real jet speeds. With a maximum cruise speed of 468 knots plus the ability to climb direct to 41,000 feet in just 22 minutes and operate routinely at 45,000 feet, it pro-

Crew/Max. Passengers	2/9
Maximum Altitude	45,000 FT
Maximum Range (with reserves)	1,900 NM
Maximum Speed (FL 270)	468 KTAS
Weights:	
Maximum Ramp	16,300 LBS
Maximum Takeoff	16,100 LBS
Maximum ZFW	13,000 LBS
Basic Operating	10,450 LBS
Useful Load	5,850 LBS
Maximum Payload	2,250 LBS

vides superb performance in every regime.

For more than 60 years, Beechcraft has built high-quality airplanes to meet the requirements of U.S. military services. The Beechjet 400A, in service with the Air Force as the T-1A Jayhawk, is the latest Beechcraft to join this tradition of excellence.

For more information, call Bill O'Neal, Director - Aerospace Aircraft Marketing, at 316-676-7168.

IT'S NOT JUST AN AIRCRAFT. IT'S A BEECHCRAFT.

ARMY AVIATION IS PERFORMANCE.

The ***FNC***[®] Battery is **Performance.**

ARMY AVIATION IS RELIABLE.

The ***FNC***[®] Battery is **Reliable.**

ARMY AVIATION IS PROVEN.

The ***FNC***[®] Battery is **Proven.**

BUT, ARMY AVIATION REQUIRES MAINTENANCE.

The ***FNC***[®] Battery requires **No Maintenance.**

Army Aviation has proven it's performance over and over. The *FNC*^{*} *no maintenance* battery has also proven it's superior performance.

Army Aviation is always ready when called upon to defend our nation, as is the *FNC no maintenance* battery system.

Army Aviation has been proven by over 50 years of proud service. The *FNC no maintenance* battery system has been proven by over 600 maintenance free flight hours on AH-64A's at Ft. Rucker and over 2 years of failure free, maintenance free service on select F-16's. This system has been contracted for the AH-64 Longbow, Boeing 777, and Douglas MD-90. No other battery can match the *FNC* performance, reliability, and O & S cost reduction capability. For more information on how this outstanding battery system can serve your needs contact Kevin M. Kriegel, Marketing Program Manager.

First Time, Every Time

First time hits depend on real-time coordination of weapons and sensors.

For Apache AH-64C/D, proven boresighting technology from Photronics will:

- Provide complete harmonization of all fire-control and weapons systems with the on-board INU
- Reduce support time for maximum readiness
- Offer major, solid life-cycle savings

BE THE HUNTER. NOT THE PREY.

In today's combat environment, you can go from the hunter to the prey in a matter of seconds.

Vast amounts of threat data from onboard sensors must be processed to make critical decisions.

Litton knows every second counts.

We have integrated interactive subsystems for reduction of pilot workload and key information retrieval. Called the Integrated Electronic Warfare Suite (IEWS), accurate, multispectral rapid warning threats (EO/IR/RF) are shown on a single display for enhanced situational awareness. And, our proven APR-39A(V)2 Threat Warning System serves as the electronic warfare controller.

The Litton IEWS. Chosen by the U.S. Army.

1993 Scholarship Winners

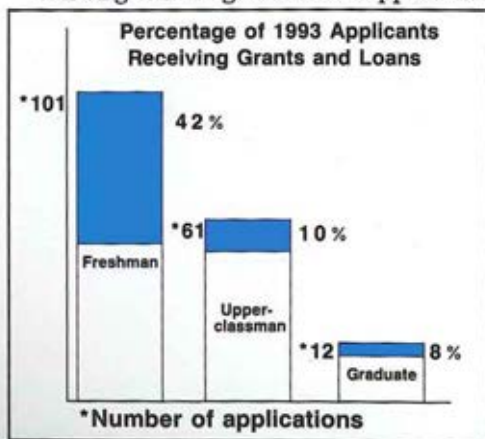

MG Richard E. Stephenson, Ret.
President, AAAA Scholarship Foundation, Inc.

Your AAAA Scholarship Foundation announced the 1993 winners of \$122,000 worth of scholarships and grants. This year's competition was hotter than ever with awards going to 49 of 174 applicants. The chart below shows the percentage of winning applicants for each of the three categories of freshmen, upperclassmen, and graduate students.

On the basis of academic achievement, the Scholarship Selection Committee established an Order of Merit List (OML) by ballot among all meritoriously competitive files for each of the three categories. That is: only freshmen competed against freshmen, upperclassmen vs. upperclassmen, and graduate students vs. graduate students. AAAA Scholarships were awarded in descending order by dollar value to the applicants in descending order by OML; loans were awarded in similar fashion after all grants were awarded.

A major effort was made to stay as close as possible to the final OMLs for all awards. Therefore, it is possible that specific chapter matching fund scholarships and even awards "reserved" for particular AAAA members of specific rank may not have gone to members of these groups if these applicants had been selected for awards of higher dollar amounts, or were not at the top of the final OMLs.

Among winning freshmen applicants the AVERAGE awardee had a 3.94

out of 4.00 Grade Point Average, was ranked in the top 4.32 percent of his/her class, and had an average SAT math and verbal score, for example, of 619 out of 800. The upperclassmen and graduate school awardees were similarly competitive.

The good news is that we will be able to increase the awards next year to \$150,000. The bad news is that every year there are many, many highly qualified and de-

(continued on page 120)

AAAA Spouse Scholarship — \$1,000 (\$1,000 for one year) Pamela E. Baskett, wife of Barry J. Baskett, Florissant, MO — Lindenwood College.

COL Jerry L. Fleming Life Member Memorial Scholarship — \$1,000 (\$1,000 for one year) Justin K. Bhansali, son of Kirt J. Bhansali, Chesterfield, MO — Washington Univ. in St. Louis.

AAAA Upperclassmen Scholarship — \$3,000 (\$1,000 a year for three years) John D. Byars, son of LTC Harold W. Byars, Ret., Poquoson, VA — Clemson University.

MinuteMan Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Dawn M. Caramanico, daughter of Thomas R. Caramanico, Aston, PA — Pennsylvania State University.

Monmouth Chapter (Perpetual) Scholarship — \$4,000 (\$1,000 a year for four years) Rachel T. Colten, daughter of Mr. Norman E. Colten, Ocean, NJ — Yeshiva University, Sterns College.

B. Howard Dean/Ken K. Kelly Memorial Scholarship — \$3,000 (\$1,500 a year for two years) Susan E. Conn, daughter of John W. Conn, Clifton, NJ — University of Virginia.

MG Robert F. Molinelli Washington D.C. Chapter Matching Scholarship — \$2,000 (\$1,000 a year for two years) Jennifer J. Curran, daughter of LTC(P) John M. Curran, Burke, VA — Purdue University.

AAAA Warrant Officer Members Scholarship — \$1,000 (\$1,000 for one year) CW2 Roger P. Dionne, Jr., Fort Campbell, KY — Austin Peay State University.

Corpus Christi Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Kelly L. Ehrhart, daughter of Mark E. Ehrhart, Hammonton, NJ — Princeton University.

Colleen Hipp Memorial Scholarship — \$1,000 (\$1,000 for one year) Nicole M. Emerson, daughter of LTC James (Joe) Emerson, Ret., Manchester, MO — University of Missouri

AAAA Scholarship Interest Free Loan — \$4,000 (\$1,000 a year for four years) Robert B. Farmer, son of MAJ Michael B. Farmer (deceased) — Auburn University.

AAAA Scholarship Interest Free Loan — \$4,000 (\$1,000 a year for four years) Christopher B. Fouk, son of COL Tom B. Fouk, Carlisle, PA — Virginia Polytechnic Institute.

Southern California Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Janette L. Fraser, daughter of CW3 Robert E. Fraser, II, Ret., Simi Valley, CA — Shorter College.

MAJ R. Kahl-Winter Memorial Scholarship — \$2,000 (\$1,000 a year for two years) Christina E. Giallourakis, daughter of Bill Giallourakis, Eatontown, NJ — Boston College.

CW3 Stephen A. Hansen Memorial Scholarship — \$1,000 (\$1,000 for one year) Sara E. Goodwin, daughter of LTC William P. Goodwin, Fort Rucker, AL — Samford University.

AAAA National Scholarship — \$1,000 (\$1,000 for one year) John K. Hendrickson, son of LTC John F. Hendrickson, Huntington Beach, CA—University of Oklahoma.

AAAA Upperclassmen Scholarship — \$3,000 (\$1,000 a year for three years) Heather C. Homann, daughter of LTC Dwight F. Homann, Ret., Troy, IL—Illinois College.

Washington D.C. Chapter Matching Scholarship — \$2,000 (\$1,000 a year for two years) Robert C. Houser, son of CW4 Robert E. Houser, Woodbridge, VA—Washington State University.

Greater Atlanta Chapter Scholarship — \$1,000 (\$1,000 for one year) Loan L. Hudson, daughter of LTC Gabriel L. Hudson, Ret., Fayetteville, GA—North Georgia College.

COL Eugene B. Conrad Life Member Memorial Scholarship — \$1,000 (\$1,000 for one year) Leslie A. Inman, daughter of LTC Michael T. Inman, Honolulu, HI—Centre College.

AAAA National Scholarship — \$1,000 (\$1,000 for one year) Brendon J. Johnson, son of LTC Terry L. Johnson, APO AE—University of Notre Dame.

Corpus Christi Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Lucas C. Johnson, son of COL Thomas E. Johnson, Corpus Christi, TX—Louisiana State University.

AAAA Graduate Scholarship — \$1,000 (\$1,000 for one year) Jennifer E. Jorgensen, wife of 1LT Robert R. Jorgensen, Newport News, VA—University of Michigan.

Chesapeake Bay Chapter Scholarship — \$1,000 (\$1,000 for one year) Julie E. King, daughter of LTC Bernard F. King, Ret., Lansing, KS—University of Kansas.

AAAA Scholarship Interest Free Loan — \$4,000 (\$1,000 a year for four years) Bhavna R. Lail, daughter of Bisham J. Lail, St. Louis, MO—Washington University in St. Louis.

BG Robert M. Leich Scholarship — \$5,000 (\$1,250 a year for four years) Dale E. Lebsack, Jr., son of MAJ Dale E. Lebsack, Ret., Enterprise, AL—Troy State University.

AAAA National Scholarship (Acromedical) — \$4,000 (\$1,000 a year for four years) Jeanne M. Lehrter, daughter of LTC John B. Lehrter, Ret., Florence, AL—Auburn University.

AAAA Spouse Scholarship — \$1,000 (\$1,000 for one year) Cynthia E. Lewis, wife of LTC William D. Lewis, Yorktown, VA—Riverside School of Nursing.

Bryce Wilson Life Member Memorial Scholarship — \$1,000 (\$1,000 for one year) Tammy E. Madish, daughter of COL Daniel T. Madish, Ret., Herndon, VA—Virginia Polytechnic Institute.

Aviation Center Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Chad S. Martin, son of MW4 John T. Martin, II, Fort Rucker, AL—Vanderbilt University.

Jane and Wayne Phillips Memorial Scholarship — \$1,000 (\$1,000 for one year) Kerry L. Mullen, daughter of COL James D. Mullen, Fort Monroe, VA—State University of New York.

AAAA National Scholarship — \$1,000 (\$1,000 for one year) James M. Nuzum, son of Mr. J.M. Nuzum, Warwick, RI—Colby College.

BG O. Glenn Goodhand Memorial Scholarship — \$5,000 (\$1,250 a year for four years) Sean R. Ozbolt, son of LTC Bob Ozbolt, Alexandria VA—University of Virginia.

Chesapeake Bay Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Matthew I. Palmer, son of LTC James G. Palmer, Hatboro, PA—Cornell University.

Central Florida Chapter Matching Scholarship — \$3,000 (\$1,500 a year for two years) Douglas A. Patti, son of Mr. Anthony C. Patti, Woodbridge, CT—Duke University.

Joseph P. Cribbins Scholarship — \$2,000 (\$1,000 a year for two years) Andrew K. Powelson, son of Dennis A. Powelson, Manchester, MO—Westminster College.

Monmouth Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Linaye L. Price, wife of 2LT John D. Price, Ozark, AL—University of Texas at El Paso.

AAAA National Scholarship — \$1,000 (\$1,000 for one year) Shawn A. Reed, son of CW4 Dennis A. Reed, Clarksville, TN—Worcester Polytechnic Institute.

LTC William B. Bunker Memorial Scholarship — \$10,000 (\$2,500 a year for four years) Bryan D. Respass, son of Mr. John T. Respass, Wall, NJ—Princeton University.

COL Edward L. Nielsen Life Member Memorial Scholarship — \$1,000 (\$1,000 for one year) Jennifer M. Retta, daughter of COL Lawrence R. Retta, Arlington, VA—Auburn University.

North Texas Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Erin L. Robbins, daughter of Michael R. Robbins, Fort Worth, TX—Southwestern University.

AAAA Scholarship Interest Free Loan — \$4,000 (\$1,000 a year for four years) James F. Simmons, son of LTC James E. Simmons, Alexandria, VA—Baylor University.

Lindbergh Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Sherri J. Sparks, daughter of LTC John E. Sparks, Ret., Collinsville, IL—University of Kentucky.

Phantom Corps Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Jennifer A. Stangle, daughter of MAJ Morgan G. Stangle, Harker Heights, TX—Arizona State University.

Colonial Virginia Chapter Matching Scholarship — \$2,000 (\$1,000 a year for two years) Jennifer A. Sutton,, daughter of LTC James E. Sutton, Newport News, VA—University of the South.

AAAA National Scholarship — \$12,000 (\$3,000 a year for four years) Daniel E. Swanson, son of Mr. Ronald L. Swanson, Cedar Rapids, IA—University of Kansas.

GEN Frank S. Besson Jr. Memorial Scholarship — \$12,000 (\$3,000 a year for four years) Andrew T. Tellez, son of Ms. Alma N. Tellez, Florissant, MO—George Washington University.

AAAA Scholarship Interest Free Loan — \$4,000 (\$1,000 a year for four years) Jennifer L. Vega, daughter of MAJ Jaime Vega, Rome, NY—Penn State University.

AAAA National Scholarship — \$1,000 (\$1,000 for one year) Karl L. Weist, daughter of MAJ Russell H. Zelman, Margaretville, NY—Binghamton University.

servicing applicants who are not awarded grants and loans because of funding constraints.

You can help by making a donation yourself, by donating via your Last Will and Testament, by encouraging your Chapter to establish an AAAA Scholarship, or your employer to match employee donations to the AAAA Scholarship Foundation. Contact the AAAA National Office for more details.

The goal is to be able to fund all our very deserving applicants. On behalf of the AAAA Scholarship Foundation and I'm sure all our fellow AAAA members, congratulations to all our 1993 applicants and winners. You all have earned our admiration and support.

AAAA Scholarship Foundation

The AAAA Scholarship Foundation, Inc. is a non-profit, tax-exempt corporation established to render financial assistance for college level education to selected members of the Army Aviation Association of America, Inc. (AAAA), and the selected spouses, unmarried siblings, and unmarried children of current and deceased AAAA members.

Since the inception of the program in 1963, the AAAA Scholarship Foundation has provided over \$711,975 to 540 qualified applicants.

The Foundation has pursued an award philosophy where national scholarships are awarded on the basis of academic merit and personal achievement.

There are no paid full or part-time Foundation staff members. 100% of all donations goes directly to scholarship funds because the AAAA underwrites all direct expenses.

NOMINATIONS OPEN

1993 AAAA Air/Sea Rescue Award

BACKGROUND

Sponsored by Lucas Aerospace, this AAAA National Award will be presented "to the crew or crew member who have performed a rescue using a personnel rescue hoist that saved the life or eased the suffering of an individual or individuals during the awards period encompassing September 1, 1992 through August 31, 1993."

ELIGIBILITY

A candidate must be U.S. Army, Active or Reserve Component, and must have had an active role in an air rescue effort using a personnel rescue hoist.

Membership in the AAAA is not a requirement for consideration.

The contribution of the nominee should have been initiated and completed during the awards period encompassing September 1, 1992 through August 31, 1993.

DOCUMENTATION

The official nomination form should be used and is attainable from the AAAA National Office,

49 Richmondville Ave., Westport, CT 06880-2000; Telephone: (203) 226-8184.

The official nomination form may be reproduced locally. The receipt of each nomination form will be acknowledged directly by the National Office of the Army Aviation Association of America (AAAA).

SUSPENSE DATE

The nomination(s) should be mailed so as to arrive at the AAAA National Office not later than **September 30**.

SELECTION

The "Army Aviation Air/Sea Rescue Award" nominations will be reviewed at a mid-October meeting by the members of the AAAA Awards Committee appointed by the President of the Aviation Center Chapter.

PRESENTATION

The AAAA's "Army Aviation Air/Sea Rescue Award" will be presented at an AAAA Awards Banquet sponsored by the Aviation Center Chapter in December.

1993 AAAA Trainer of the Year Award

BACKGROUND

Sponsored by the CAE-Link Corporation, this AAAA National Award will be presented "to the trainer who has made an outstanding individual contribution to Army Aviation during the awards period encompassing September 1, 1992 through August 31, 1993."

ELIGIBILITY

A candidate for this AAAA National Award may be a military or a civilian nominee and must be actively involved in Army Aviation training.

Membership in the AAAA is not a requirement for consideration.

The individual contribution of the nominee should have been initiated and completed during the awards period encompassing September 1, 1992 through August 31, 1993.

DOCUMENTATION

The official nomination form should be used and is attainable from the AAAA National Office, 49 Richmondville Ave., Westport, CT 06880-2000 (203) 226-8184.

The official nomination form may be reproduced locally. The receipt of each nomination form will be acknowledged directly by the National Office of the Army Aviation Association of America (AAAA).

SUSPENSE DATE

The nomination(s) should be mailed so as to arrive at the AAAA National Office not later than **September 30**.

SELECTION

The "Aviation Trainer of the Year Award" nominations will be reviewed at a mid-October meeting by the members of the AAAA Awards Committee appointed by the President of the Aviation Center Chapter.

PRESENTATION

The AAAA's "Aviation Trainer of the Year Award" will be presented at an AAAA Awards Banquet sponsored by the Aviation Center Chapter in December.

Lucas Aerospace

Through its sponsoring of the annual
AAAA Air/Sea Rescue Award,
Lucas salutes the men and women
of U.S. Army Aviation Crews around
the world who save the lives of others,
often at great personal risk.

Above: 1SG Allan C. Mull, Renegade 4/3 ACR, Ft. Bliss, TX received a Bronze Order of St. Michael at ceremonies held on 18 May 1993. LTC Gratton O. Sealock and Old Bill Chapter President MW4 Ronald A. Edwards presented the award to 1SG Mull, who has 21 years of distinguished military service under his belt. He is currently enroute to Hawaii.

Below: COL Charles S. Hurt (left), Commander, Aviation Brigade, 101st Airborne Division (AASLT), presents a Bronze Order of St. Michael to MAJ Christopher A. Acker (right) during ceremonies held at Ft. Campbell, KY, on 10 May 1993. MAJ Acker was commander of the AAAA Outstanding Aviation Unit of the Year (Active) for 1987.

AAAA Supports the OCS

In a little known awards program, the AAAA national organization supplies a set of Aviation Brass to all OCS Candidates who branch Army Aviation. Recently, several classes have received their awards.

Eleven OCS Candidates were branched Aviation during ceremonies conducted at Wigle Hall, Ft. Benning, GA, at 1600 hours on 13 May 1993. The candidates were: Terry Alken, Harry Brooks, Joseph DiPasquale, Alvin Godwin, Archer Hirschhorn, Lance Kincanon, Glenn Lapoint, Ronald Looney, Daniel Pinkava, Dana Smith, and Todd Wolford. COL Charles M. Burke, Deputy Assistant Commandant, USAAVNC, spoke to the candidates and presented them with their first set of Aviation brass, compliments of the AAAA. Each candidate also received a letter of welcome to the Branch from MG John D. Robinson, Commanding General of USAAVNC, Ft. Rucker, AL. The candidates graduated on the 14th of May.

Seven OCS candidates were branched Aviation during ceremonies conducted on 12 August 1993. The candidates were: David Bond, Samuel Cain, John Davis, Michael Fiscus, William Kronke, Jason Osberg, and Armand Watson. COL Mario Meola, Army National Guard, USAAVNC, spoke to the candidates and presented them with their Aviation brass. Each candidate also received a letter of welcome to the Branch from MG John D. Robinson.

Nine OCS Candidates were branched Aviation during ceremonies conducted on 27 September 1993. The candidates were William Brown, Daniel Duffy, Stephen Gregg, John Keeler, Michael Kellogg, Samuel Osborne, Larry Ouellette, Loren Partlo, and Alan Robinson. A guest speaker from the Field Artillery addressed them, and presented them with their AAAA-sponsored Aviation brass.

Upon graduation, the candidates were off to Ft. Rucker to attend Aviation Officer Basic Course and Initial Entry Rotary Wing Course.

AAAA CALENDAR

A listing of recent AAAA Chapter Events and upcoming National dates.

October, 1993

- ✓ Oct. 18. AAAA National Executive Board Meeting, Sheraton Washington Hotel, Washington, D.C.
- ✓ Oct. 18. AAAA Scholarship Board of Governors Executive Committee Meeting, Sheraton Washington Hotel, Washington, D.C.

November, 1993

- ✓ Nov. 2-5. 11th AAAA Aviation Electronic Combat Symposium, hosted by Grumman Melbourne Systems, Melbourne, FL.

- ✓ Nov. 2. AAAA ASE and Avionics Award Presentations, Melbourne, FL.

December, 1993

- ✓ Dec. 1. AAAA National Executive Board Meeting, Ft. Rucker, AL.

February, 1994

- ✓ Feb. 2-4. 20th Annual Joseph P. Cribbins Product Support Symposium, Stouffer Concourse Hotel, St. Louis, MO.
- ✓ Feb. 5. AAAA Outstanding

Aviation Logistics Support Unit of the Year Award and AAAA Industry Award Presentations, Stouffer Concourse Hotel, St. Louis, MO.

March, 1994

- ✓ Mar. 25. AAAA USAREUR Region Professional Sessions.
- ✓ Mar. 26. AAAA USAREUR Region Ball.

April, 1994

- ✓ Apr. 20-24. AAAA Annual Convention, Cervantes Convention Center, St. Louis, MO.

NEVER LOSE TOUCH

WITH THE ROCKWELL/HARRIS SOLUTION FOR ARMY NAP-OF-THE-EARTH COMMUNICATIONS.

Interoperable air and ground high-frequency communications are assured by Rockwell/Harris team experience. **T**he two leading HF suppliers in the world have joined forces and technical expertise to meet the Army's most important NOE COMM requirements through the ARC-220 pursuit. **S**eparately, it has taken Rockwell (airborne HF) and Harris (ground HF) more than 10 years and significant individual investments to develop the key technologies to implement U.S. MIL-STD Automatic Link Establishment, Electronic Counter Countermeasure and data modem waveforms.* **N**ot an easy task, yet accomplished through diligent engineering and innovation. **T**ogether, these two industry-leading companies offer complementary low-risk solutions for the full range of NOE COMM requirements, for air and ground. **T**hey have conquered the complexities of some of the toughest waveforms ever developed and made it all very easy to use. **R**ockwell and Harris have off-the-shelf production equipment available today to demonstrate that they can meet the stringent requirements of the U.S. Army's NOE COMM program. **C**ommunications are assured with the high-frequency systems from the Rockwell/Harris team -- the source for advanced HF products to meet tough requirements. **T**he ARC-220 will be a quality solution from the experienced leaders in HF communications. **F**or more information, contact the Rockwell/Harris NOE COMM Program Office at (319) 395-1600, fax to: (319) 395-5111, or write to: Rockwell/Harris, NOE COMM Team, Dept. 120-131, 350 Collins Road
