Battlefield Communications

Field commanders always seek the best vantage point to observe and direct the course of battle.

Today, that vantage point is the RAH-66 Comanche.

Moving undetected over hostile territory, Comanche coordinates the offense. Day or night. In any weather. It locates the enemy, identifies targets, and reports to those who need to know.

As the digital communications link for air, land, and sea forces, the Comanche is our best defense against friendly fire.

Briefings

BG Orlin L. Mullen, PM RAH-66 Comanche and **Robert Hubbard**, Comanche Deputy Program Manager, have retired effective 30 September 1994. **MG Dewitt T. Irby**, PEO Aviation, has named **COL(P) James R. Snider**, Apache Attack Helicopter PM, to become acting Comanche PM and **Darrell Harrison**, Comanche Director of Systems Engineering, as acting deputy manager. **COL Jack Shafer** of the Longbow Project Manager's Office, will serve as Comanche program chief of staff, while **Gary Nenninger** will serve as Acting Apache PMO.

The President has approved and forwarded to the Senate for confirmation the nomination of 39 Officers to the rank of Brigadier General. Among them are five Aviators: **COL(P) Bryan D. Brown**, Commander, 160th Special Operations Aviation Regiment (Airborne), Ft. Campbell, KY; **COL(P) Warren C. Edwards**, Chief of Staff, USAAVNC, Ft. Rucker, AL; **COL(P) Samuel L. Kindred**, Executive Officer to the Commanding General, U.S. Army Materiel Command, Alexandria, VA; **COL(P) James R. Snider**, Acting Program Manager, Comanche Program Office, PEO-Aviation, St. Louis, MO; and **COL(P) Julian A. Sullivan, Jr.**, Deputy Commander, U.S. Army Aviation and Troop Command.

Several personnel changes occurred in **DynCorp**. Chief among these is the promotion of AAAA Secretary-Treasurer **MG Carl H. McNair, Ret.** to the position of President, Enterprise Management business sector. He was also elected a corporate Vice President. **MG Richard E. Stephenson, Ret.**, AAAA Senior Vice President, was named corporate Vice President, Technology and Government Relations, a new position.

A reunion for the **52d Combat Aviation Battalion** has been set for 13-16 October 1994 at the Henry the Eighth Hotel in St. Louis, MO. The 52d served at Camp Holloway, Republic of Vietnam. For more information, contact **MSG Vernon Gano, Jr., Ret.**, 6 Lake Port Court, St. Peters, MO 63376, Tel: (314) 441-3590.

The **Seventh Annual NCO Symposium, AVNCOF 94**, has been scheduled for 14-18 November 1994 at the Ft. Rucker NCO Club. POCs: **SSG Lein/SFC Forester**, DSN 558-9980/9350, Com: (205) 255-9980/9350. Invitation Only.

The **Aviation Applied Technology Directorate (AATD)**, Fort Eustis, VA, will celebrate its 50th anniversary on Dec. 16. The occasion will be recognized with a one-day event including presentations about AATD's history, current and future research programs, facilities tours and a dinner. Contact **Jerry Irvine**, (804) 878-3272.

Some decisions are safe. Some decisions save lives.

If America was suddenly faced with several regional conflicts, our reserves would be the cornerstone to our success. Which raises a critical question: shouldn't the helicopters they fly be the best available?

The UH-60 BLACK HAWK is a helicopter designed to provide our reserves with the speed, the navigational accuracy, the protection and the technology they need to be able to handle the increasing demands of modern warfare. It can lift 9,000 pounds. It can carry 11 combat-equipped troops. It can safely take these troops 250 nautical miles at 150 knots.

It is an aircraft built without compromise. Every rotor and gear, every seam and rivet, every drop of paint, is subject to the closest scrutiny. The design is of the highest quality. The materials are the finest on earth. The process by which they are assembled is the most efficient possible. This constant attention to detail is inspired by an unwavering focus on a clear duty: to provide the army with the most capable helicopter available.

When it comes to our reserves, the UH-60 BLACK HAWK is not just the safe decision. It is the only decision.

For Military Missions Requiring Outstanding Performance

A proven P/Y Code GPS Dzus-mount navigation receiver for worldwide Military Aviation operations

The TNL 2100SM P/Y Code GPS Navigator is the most accurate navigation equipment ever developed for military aircraft operations. Using the satellite-based Global Positioning System (GPS), it calculates an aircraft position to within 15 meters RMS anywhere in the world, at anytime, and in any weather.

This robust GPS navigator uses an advanced six-channel receiver which calculates a new position every second and measures speed to better than a tenth of a knot.

The TNL 2100SM is more than just a receiver, it's a complete navigation management system giving instant access to detailed flight information. It can fix your position then instantaneously calculate and display bearing and distance to any point on the planet, showing destination

name, ground speed, ground track, ETE and ETA. A course deviation indicator (CDI) is displayed as well.

At pilot option, a specific inbound or outbound course from any waypoint may be entered. The appropriate course deviation is then displayed on a pilot selectable Track Angle Error graphic providing a visual representation of desired course intercept.

It includes both standard C/A code positioning and P/Y code through incorporation of the PPS-SM, when valid Keys loaded and Y code satellites operational.

The Navigator provides selectable MGRS, Lat/Lon, UTM and UPS coordinate systems with 123 worldwide Datums; user units (nautical miles, kilometers, statute miles, etc.); a quick access search of the 20 nearest airports, VORs, NDBs, intersections, and user waypoints; it can automatically

sequence through 20 flight plans with up to 20 waypoints each; plan vertical descents or climbs; display minimum safe altitudes; calculate winds aloft; and provide E-6B calculation functions.

Coupled with an optional Air Data Computer, the TNL 2100SM Navigator can display true air speed, density altitude, pressure altitude, and winds aloft.

The Navigator incorporates a Jeppesen NavData* card—a complete database of worldwide aeronautical information including military and public use airports, VORs, intersections, NDBs, airspace boundaries, MEAs, and more.

The TNL 2100SM comes complete with a Night Vision Goggle (NVG) compatible display. It is in operational use now by U.S. and allied military forces worldwide.

COMANCHE: ESSENTIAL CAPABILITY FOR THE FUTURE

The first RAH-66 Comanche prototype is scheduled to lift off before the end of 1995. That first flight at the Sikorsky's Flight Test facility in West Palm Beach, FL, will mark the beginning of an extensive flight test program, resulting from years of dedication and determination of thousands of individuals around the country.

The United States Army is committed to accomplishing its goal of developing and fielding this key system. The Comanche will provide our soldiers critical capabilities that are lacking in the existing armed reconnaissance/light attack helicopter fleet. For that reason, it remains the Army's top priority research and development program. Comanche

*The Secretary
of the Army
goes on
the record
supporting
the RAH-66
Comanche.*

represents the next generation of rotorcraft technology that is essential for our troops to fight effectively and survive in future conflicts. This system has been designed to replace the aging, obsolete OH-6

and OH-58A/C unarmed scout and AH-1 attack helicopters.

While propelling the Army 50 years ahead in technology, Comanche will significantly expand air cavalry and attack capabilities. It will enable us to conduct tactical operations in all types of terrain, adverse weather, and obscured battlefield environments, during day and night. Because it is a digitized and integrated system, Comanche brings to the maneuver commander a true third dimension on the division battlefield.

NOW YOU CAN OWN THE NIGHT WHEREVER YOU ARE.

Air or ground, anywhere in the world, depend on the proven performance of ITT night vision.

Owning the night gives you the war-fighting edge essential to victory. That's why we're working to expand your night vision capabilities.

For the first time, fixed-wing aviators can trust the night to ITT. U.S. Air National Guard, Air Force and Navy as well as military pilots worldwide can benefit from our improved Aviator's Night Vision Imaging System (ANVIS).

And for ground forces, our GEN III 25mm image intensifier is available as a direct retrofit to upgrade existing weapon sights and drivers' viewers.

This dedication to advancements, combined with our proven performance, has

made us the world leader in GEN III image intensification. A full-service organization, ITT is committed to continuous improvement, supporting night operations of U.S. and allied military forces around the globe.

And we're ready now to respond to your future requirements ... anywhere.

ITT DEFENSE & ELECTRONICS

*"The art of war is simple enough.
Find out where your enemy is..."*

ULYSSES S. GRANT

The most critical capability that Comanche will provide is the ability to gather information quickly in order to provide commanders with accurate real-time data with which timely battle decisions can be made. The existing scout fleet has severely limited ability to fight at night or in adverse weather, is marginally supportable, and has limited air-to-air capability.

Comanche will perform the armed reconnaissance mission by reconnoitering and locating adversaries. It will secure flanks and weak areas, find relocatables, and provide the coordination function for the combined arms team.

Comanches will also select attack helicopter routes and positions, provide surveillance and early warning, and enhance deep operations situations. The tactical commander must know where the enemy is and is not, and determine his capabilities, and will to fight. Commanders have always relied on scout "eyes on the target" to acquire and disseminate critical decision-making information. Army aviation provides this capabili-

ty while operating in the third dimension of the battlefield — the vertical space within the ground commander's area of operation.

Recent lessons learned from Panama, the Euphrates Valley, and Somalia, demonstrate an acute need for real-time battlefield information. Today's reconnaissance fleet lacks the capabilities required to successfully perform armed reconnaissance, light attack, and air combat roles on the 21st century battlefield while sur-

viving to fight another day. It cannot successfully operate at night or in reduced visibility, does not demonstrate flight performance necessary for global operations and possesses inadequate targeting sensors.

Comanche is the division commander's only reconnaissance asset that provides a responsive and real-time common view of the divisional area tailorable to the division commander's needs. This responsiveness increases his ability to gain the initiative through an overwhelming operational tempo that is faster than the enemy's ability to react.

Responsiveness combined with the common view of the battlefield

"The existing scout fleet has severely limited ability to fight at night or in adverse weather, is marginally supportable, and has limited air-to-air capability."

Extensive modern facilities and engineering expertise to meet your FAA and MIL-SPEC certification needs.

For Helicopter Modifications and System Upgrades, Look to the Premier Airborne Systems Company.

Advanced Quickfix*

The U.S. Army's newest EW platform, successfully completing CTAS airworthiness flight testing.

*Advanced QuickFix brings next generation direction finding and jamming capabilities to the Digital Battlefield. Coupled with new INS/GPS, 1553 Databus and netted data link sharing with ground EW platforms, extremely fast and decisive onboard situational development is guaranteed.

CTAS has the experience in EW, Command and Control, Avionics, and Cockpit Improvements to satisfy your requirements, small or large.

7500 Maehr Road ♦ Waco, Texas 76715

allows the commander to increase the tempo of operations, expand the force's battle space, and exploit fleeting opportunities allowing him to bring overwhelming force and complete destruction of the threat combat power. All other strategic intelligence and tactical information gathering assets have environmental limitations, must be requested from higher headquarters, or have limited areas of coverage with a potential result of allowing the enemy sufficient time to regain the initiative.

Comanche is the only weapon system which contributes to all five tenets of the modernization overmatch: project/sustain, protect the force, win the information war, deliver precision strike, and dominate maneuver.

Current National Military Strategy requires a force projection army that can build and sustain decisive combat power in regions worldwide. Comanche gets into the fight early and because of its multi-mission capability to perform armed reconnaissance, attack and air combat roles, it allows the initial force to establish rapidly and expand securely its foothold for the conduct of early entry operations.

This integrated weapon system will provide the decisive battlefield information to the joint and combined arms team and can preclude the enemy from obtaining the

similar information.

Only Comanche has the ability to conduct lethal deep, close, and rear operations and survive while providing critical data, protection, and flexibility to forward-deployed maneuver forces in the initiation of the land campaign.

Comanche incorporates emerging technologies that will provide a leap-ahead weapon system. If we are to make efficient use of a downsized force, it is critical that we deploy troops worldwide with a minimal logistics burden.

Comanche's digital technology will enable advanced command and control capability for the battle commander with a three-dimensional situation awareness that provides a sharper view of a conflict than what is now possible. Digital maps will display the battlefield picture on cockpit monitors, consolidating all real-time data with identification of friends or foes.

Survivability will be enhanced significantly through signature reduction, subsystem redundancy, sturdy structures, armor protection, and a self-healing system architecture. The design provides the Army with an extremely capable and survivable aircraft system. No other aircraft today provides this capability nor could an aircraft be reasonably retrofitted to provide the capability. Comanche is the

We Do What It Takes!

Whether that's quick-turnaround maintenance for flight trainer aircraft, ingenious modifications for improved aircraft performance, or battle-area support for special missions. We're there when needed for:

- Maintenance/Modification
- System Integration
- Equipment Repair
- Structural Upgrades
- Mission Enhancement
- Logistical Support

SERV-AIR, INC.

An E-SYSTEMS Company

Serv-Air, Inc. • P.O. Box 6669
Greenville, Texas 75403-6669
(903) 454-2000

Recipient of Department of the Army, U.S. Special Operations Command, and many other Command-level awards for outstanding support during Operation Desert Shield/Desert Storm.

only real helicopter development in the near-to-mid-term providing for significant dual-use capabilities.

Even though traditional threats have diminished in post-Cold War conditions, an unsettled world environment continues to jeopardize global stability and peace. We remain concerned about the constant proliferation of modern weapons and the upgrade of existing forces throughout the world, the alarming lethality at all levels of conflict, proliferation of nuclear, biological and chemical weapons, and the affinity of our enemies to attempt to dissuade our resolve. This unsettled mix contributes to potential instability of both existing and emerging nations. Therefore, our current National Military Strategy requires flexible deterrence options.

The centerpiece of this strategy involves the ability to project forces quickly enough to provide a credible and lethal force overpowering the enemy with the minimum number of friendly casualties.

In the face of continued force structure deductions, it is essential that the nation's Armed Forces are comprised of world-class soldiers equipped with world-class weapon systems. Such a quality force will provide commanders with the capability to strike early and decisively in any contingency.

Comanche lends credibility to

our fighting forces. Regardless of the task — humanitarian aid, drug interdiction, or counter-terrorism — flexibility, deployability, ease of employment and sustainment are the attributes necessary to accomplish a number of missions with a smaller, yet quality military.

Comanche is the key to superiority in future conflicts and is ready to meet user requirements. It can perform all required missions, defeat the projected threat, and survive on the future battlefield. Comanche is the key to advanced technologies in the helicopter dual-use industry. Capable, dedicated people continue to work the Comanche solution every day to ensure the success of this vital aviation and U.S. industrial program.

CHANGE OF COMMAND AT FT. RUCKER

Above: GEN Frederick M. Franks, Jr. (left), Commanding General U.S. Army Training and Doctrine Command, accepts the colors from MG John D. Robinson (right), outgoing Aviation Branch Chief, before presenting them to incoming Branch Chief MG Ronald E. Adams (center). Observing is CSM Fredy Finch, Jr. (far right).

On 28 July 1994, MG Ronald E. Adams assumed command as U.S. Army Aviation Branch Chief and CG, U.S. Army Aviation Center and Ft. Rucker, AL; and Commandant U.S. Army Aviation Logistics School from MG John D. Robinson

MG Robinson assumed Command 22 July 1991 after moving from the position of Director for Force Structure, Resource, and Assessment, Joint Staff, the Pentagon. MG Robinson has retired from the military and is now Vice President Operations, Beech Aircraft Services.

MG Adams' immediate past assignment was Director of Requirements, Office of the Deputy Chief of Staff for Operations and Plans, the Army Staff. After two combat tours

with armored and air cavalry squadrons in Vietnam, MG Adams commanded cavalry troops at Ft. Hood, TX and Ft. Lewis, WA; a battalion in Korea; a brigade in Hawaii; and participated in Operations DESERT SHIELD and DESERT STORM as the Assistant Division Commander of the 101st Airborne Division (AASLT), Ft. Campbell, KY.

MG Adams earned a Masters Degree in Organizational Behavior at Pennsylvania State University, completed the Advanced Management Program at Carnegie-Mellon University, and graduated from the Army Command and General Staff College and the National War College.

MG Adams is married to the former Ardee Christy of Warren, OH.

VANGUARD OF CHANGE

As our ever changing world encounters the challenges of the 21st century, America's Army must stay ready. Look what is going on in our world right now—the message is very clear—expect the unexpected and be ready! Coupled with ambiguous threat is a dramatic technology explosion and new national military strategy, all compounded by declining resources. This will continue to present us with challenges that we must vigorously attack with innovativeness and creativity while keeping a clear focus on taking care of soldiers.

Army Aviation is on the cutting edge of change; and with the great work being done by all members of the team in the field, in St. Louis, at Fort Rucker, and elsewhere, we should stay on the point. However,

*Success
through
teamwork,
versatility,
and a clear
focus on the
future.*

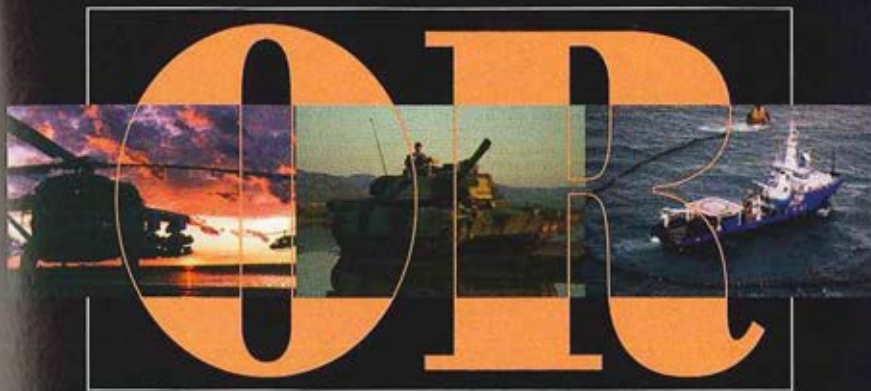

our operational challenges are many...we must learn to fight and lay claim to five dimensions of the battlefield: length, height, breadth, time, and the ability to predict enemy actions. Our evolving aviation doctrine must revolve around these five

dimensions.

We must emphasize and capitalize on our *versatility* — it is truly the essence of our branch. Who better can meet diverse challenges and rapidly shift a tailored force for accomplishing a wide range of combat, combat support, and combat service support missions? The answer clearly is Army Aviation.

We have made and will continue to make giant strides in the areas of Doctrine, Training, Leader development, Organization, Materiel, and

OPERATIONAL READINESS

It's the measure of our success.

At Fort Irwin, CA, providing
425,000 operationally ready
vehicle miles per month.

At Camp Doha, Kuwait,
supplying 337,500 combat-
ready vehicle miles weekly.

At Fort Rucker, AL, delivering
3,600 training-ready system
hours per day.

And along the U.S. coastline,
the Virgin Islands and
Hawaii, responding to oil
spills exceeding 50,400
gallons within two hours.

DynCorp

Soldier issues (DTLOMS). We are executing an aggressive effort to streamline our doctrinal manuals from sixteen to four quality manuals.

Our branch embraces the full range of military operations which is evident with our integral role in the emerging doctrinal manuals *Information Operations* (FM100-6) and *Space Support to Army Operations* (FM 100-18), just to name a few. We are streamlining initial entry training, and we are embracing advanced skills training and the training of our soldiers. The challenge is to properly fund each to provide the best trained soldier.

The new training helicopter (TH-67 Creek) should save us substantial resources — estimated to be \$34M a year. IERW is now a dual-track course and the early reports from the first class are very positive. We are making major shifts in our gunnery program with a new FM 1-140 giving our warriors objective scoring, better defined standards, and a master gunner program. Expect the final FM 1-140 this fall.

The leader development aspect of our mission is probably one of the most important. We are striving at

Fort Rucker to produce an agile-minded, even smarter soldier. Our NCO academy is recognized by TRADOC as being one of the premier academies; only those NCOs who prove they have a commitment to excellence graduate.

The Aviation Officer Basic Course is an intense three-phase course. The first phase concentrates on basic soldier skills and military knowledge. The second phase is the initial entry rotary wing course and the critical final

phase focuses on combined arms warfighting.

The Aviation Officer Advanced Course effectively uses small group instruction coupled with other new initiatives like the AIRNET/SIMNET exercises to produce top-notch

company commanders and staff officers.

The Warrant Officer Career Center is an essential ingredient to the overall success of our branch and is regarded by all branches as the focal point on all key warrant officer issues. Our goal is to make the 21st century Aviation schoolhouse the center of excellence of our nation's land warfare university.

The synergy of structure and modernization for the future is the

***"Our goal is to
make the
21st century
Aviation schoolhouse
the center
of excellence
of our nation's
land warfare
university."***

BE THE HUNTER. NOT THE PREY.

In today's combat environment, you can go from the hunter to the prey in a matter of seconds. Vast amounts of threat data from onboard sensors must be processed to make critical decisions. Litton knows every second counts.

We have integrated interactive subsystems for reduction of pilot workload and key information retrieval. Called the Integrated Electronic Warfare Suite (IEWS), accurate, multispectral rapid warning threats (EO/IR/RF) are shown on a single display for enhanced situational awareness. And, our proven APR-39A(V)2 Threat Warning System serves as the electronic warfare controller.

The Litton IEWS. Chosen by the U.S. Army.

Litton

Applied Technology

4747 Hellyer Avenue, P.O. Box 7012, San Jose, California 95150-7012

Aviation Restructure Initiative (ARI). Since change is never easy, this has often been an emotional subject. The simple fact is that fiscal realities demand that efficiencies be adopted which will allow aviation to remain affordable and fightable in the 21st century. ARI is the answer — it creates homogenous organizations, fixes sustainment problems, divests old aircraft, and reshapes aviation forces to eliminate long-standing Army of Excellence (AOE) deficiencies.

There will be numerous challenges and stumbling blocks we must overcome, but I ask you to keep the faith and the proper focus. ARI will prove a major success.

Our modernization strategy takes our helicopter fleet from ten systems to four basic airframes; the fixed-wing fleet from twenty-six different systems to four. To set the stage for Army Aviation in the 21st century a potent reconnaissance/attack triad has been developed — Comanche, Apache, and Kiowa Warrior.

Comanche remains the centerpiece for Army Aviation. It will provide the tactical commander real-time reconnaissance and lead our Army on the digital battlefield in the armed reconnaissance role. There is no helicopter in the world that will have the ability to gather and process information like the Comanche.

Apache, our battle tested heavy hitter, continues to perform in 26 combat-ready Army and National Guard units across America, Germany, and now Korea. Its marriage with Longbow will bring yet another versatile dimension to the modern battlefield. No other attack helicopter kills from greater distances with greater precision than Longbow Apache. The OH-58D Kiowa Warrior is a great interim solution for the armed reconnaissance role. It is a dynamic, multi-mission fighter which gives the tactical commander a key warfighting advantage.

Black Hawk and Chinook procurement should continue, though we have to overcome some funding issues. Out lift assets will continue to give commanders versatility across the spectrum of operations and will remain the workhorses of Army Aviation.

Our streamlined fixed-wing fleet will continue to provide an essential intelligence-gathering capability, priority air movements, and intra-theater cargo transport operations. The fixed-wing fleet will always be a critical component to the overall success of the branch.

Our Aviation simulation strategy will provide the branch with training aids, devices, simulators, and simulations necessary to lead us into the future. One of the hottest projects is the Aviation Combined

UNC LEAR SIEGLER 

We Just Made Another Name for Ourselves

UNC's acquisition of Lear Siegler Management Services adds yet another name to an already distinguished reputation for superior aviation services.

UNC Lear Siegler Contract Field Teams with 33 years experience including helicopter refurbishment and Army depot-level repair joins UNC Aviation Services with an unsurpassed safety record in pilot training at Fort Rucker.

Altogether, Army aviation has some powerful names to rely on.

UNC AVIATION SERVICES 

175 Admiral Cochrane Drive
Annapolis, Maryland 21401
1-800-533-8965

Arms Tactical Trainer (AVCATT) which will train individuals, crews, and units at the same time. The potential is unlimited for quality combined arms training as well as logical, smart expenditure of scarce resources. The capabilities of simulation for the future are endless — bound only by our imagination.

Digitization of the battlefield will be the key to winning the information war. It will allow each commander, shooter, and supporter to maintain the clear and accurate relevant common picture of the battlefield essential to planning and execution. Our branch is heavily involved in digitization with six active programs — with the great team at PEO Aviation doing dynamite work on pulling together the complex pieces.

We face many challenges in regard to force projection, all of which will force us to have an even smaller margin of error in our daily business. We must manage risk and avoid accidents—especially the human error accidents. We must do it the “right way” and take no shortcuts. Leaders at all levels must stay involved.

Within the branch we need to adapt a teamplayer or “whole person” perspective. We must be technically and tactically proficient in all of our missions. For

example, attack pilots must understand and be able to intelligently talk the lift missions and vice versa. This will promote the branch within the combined arms team and build better, well-rounded aviation soldiers.

The watchwords we will follow at the Aviation Center and which I would like to see the branch follow are the following:

- Set, enforce, and maintain high standards.
- Safety — Protect the force.
- Treat everyone with dignity.
- Effective leadership is founded on respect.
- Conduct realistic, battle focused training.
- Aim clearly on the future.

The magnitude of change forces Army Aviation to adapt, improvise and overcome the challenges that lay ahead. I am confident that together the entire team—active, reserve, civilian, retired, and industry—will continue to build on past successes. But we must keep the future square in our sights and seek new opportunities to remain at the leading edge, at the vanguard of change.

AVIATION LIAISON OFFICERS

IBM is one of the most successful businesses in the world. The key ingredient of their success is customer service. They have highly educated, professional employees who focus on customer satisfaction. They study the customer, then select the correct computer system for them. They install it, train the customer in its use, and then ensure it is maintained properly. The IBM employee becomes an important, almost critical, part of the customer's organization.

Aviation Liaison Officers (LNOs) serve this function to ground maneuver units. The critical difference is that Army Aviation is at the same point IBM was in the 1960s, critically important but not universally accepted. Army Aviation liai-

the Aviation
Branch.*

son officers are a key ingredient to the future success or failure of the branch. The purpose of this article is to ensure the future success of Aviation Brigade LNOs by discussing lessons learned from the train-up for and execution of NTC rotation 93-07 by the

1st Brigade, 4th Infantry Division.

Success as an LNO relies on commander's intent. The LNO must know the intent of the aviation brigade commander, the ground brigade commander, and individual aviation battalion commanders. The hard part for most LNOs is getting the commander's intent. The answer is to attend every meeting, orders brief, or IPR that occurs for a particular exercise. The commanders are focused on the execution of the mission during these meetings, and

First Time, Every Time

First time hits depend on real-time coordination of weapons and sensors.

For Apache AH-64C/D, proven boresighting technology from Photronics will:

- Provide complete harmonization of all fire-control and weapons systems with the on-board INU
- Reduce support time for maximum readiness
- Offer major, solid life-cycle savings

their intent is much easier to obtain. If you have any questions, talk to the S-3s. They can refine any information that you get, and they will usually have certain tactics, techniques, or procedures that they want you to use when planning for their assets.

Sometimes the intent of the aviation commander may be different from that of the ground commander. It is your job to define the differences and talk to each commander about them. The best way to work out these occurrences is to have the commanders talk to each other. This is the fastest and most definitive method. During the planning process, you may notice that, internally, everyone in the aviation brigade is not on the same "sheet of music". Because of your "macro view" you may be the first to notice this. Again, define the difference or misunderstanding and speak up. The LNO is an information conduit. You must collect, analyze, integrate, and then act on massive amounts of information.

LNOs must be knowledgeable in and comfortable with the Army orders process. The Aviation LNO must be prepared to participate in every phase of the process, briefing assets available and employment limitations during the mission analysis phase; participating in the course of action development phase; briefing your choice for the best

course of action development phase; briefing your choice for the best course of action during the decision brief; wargaming the selected COA; possibly writing the aviation annex to the order; and ensuring that all mention of aviation in the order is accurate and understandable. ST 100-9 from the Command and General Staff College is the doctrinal guide, and describes every step of the process in detail.

Bottom Line: Your first act at the ground brigade will be to participate in the orders process. How you function will set the tone for your entire tour as LNO. Know what is going on. Know what is expected of you, and be aggressive (but not obnoxious) during the process. Most likely, the planning staff will not know how to properly employ Army Aviation; it is your responsibility to ensure that aviation is used in a doctrinally sound manner. If the ground commander gets torn up at the AAR because he didn't use aviation correctly, guess who is in the "hot seat"?

Aviation LNOs will interact with every staff officer in the ground brigade. The following is a list of the important battle staff officers common to LNO interactions.

● **Brigade XO.** The chief of staff in a ground maneuver brigade; he runs the staff. You are a special staff member. You must work well with the XO. He is responsible for most

"See us at AUTOTESTCON '94"

logistic matters during deployment, and he runs the TOC during execution of the battles. You will be there with him. He may run the deep battle from the TOC. This would involve attack helicopters.

● **S-3 AIR.** If the ground brigade does not have one or if he is not a full time S-3 AIR, you will have to work twice as hard. If there is not an S-3 AIR, you definitely need a second LNO. The AIR should control the use of the brigade airspace (A²C² duties). He should request all aircraft from division. He should be responsible for the orders drill process. And he should write the aviation annex to the order. In reality, you would split these duties up, but *he* is responsible and *you* are there to advise and assist.

During NTC rotation 93-07, the LNOs did all of these tasks. Be prepared!

● **Brigade S-3.** He will run the planning sessions. He will need technical assistance more than anyone else because he is planning for the integration of your aviation assets.

● **Brigade Fire Support Officer.** You will fight with him for airspace and ground space. You must work with him during the planning phase

to ensure that his artillery firing positions allow for good air routes forward. He will plan for Copperhead engagements. He will give fires to all aviation assets working for the brigade. He must brief all aircrews that are reconnoitering for the brigade or providing Combat Service Support (CSS) flights forward. He will play a large part in Joint Air Attack Team (JAAT) missions. You, the support brigade FSO, and the aviation brigade FSO must work well together.

● **S-2.** Probably the most important and misunderstood member of the staff. You and the aviation brigade must get him to give you current, accurate, and detailed ADA information. Do the aviation brigade S-2 and the ground brigade S-2 see the

"Any aircrew that comes to the TOC for a mission brief must see the FSO, the S-2, the battle captain, and the ADA officer for in-depth briefs."

same enemy situation?

The S-2 will give you weather and illumination data. He can do Terrabase runs for ATKHB missions, and he will talk to the OH-58Ds when they are DS to the brigade. Monitor the S-2 to make sure he briefs your aircrews well. Any aircrew that comes to the TOC for a mission brief (C2, 58D, UH-60, etc.) must see the FSO, the S-2, the battle captain, and the ADA officer for in-depth briefs

in each of their areas. Make a detailed check list to ensure that the aircrews get all necessary information.

● **Battle Captain.** He runs the current operations in the ground brigade TOC. This person is typically an assistant S-3, O-3-type. He is talking to all the subordinate units. He must tell them when aircraft are flying overhead. He can get precise friendly front line traces for you. Beware, the battle captain may try to task you. You don't work for the battle captain, so remain focused on your primary purpose: advising and assisting in the employment of Army Aviation. If you get something important or hot, put it on a message form with the DTG on it and hand it to him. Battle captains get tired and a piece of paper is more likely to get action. This also gives you a hard copy of your request and time. The battle captain can give you land for FARPs, FAAs, etc.

● **ADA.** He controls the air defense assets in the brigade and can turn off all ADA in the brigade in a matter of seconds. Tell him when and where you have aircraft flying.

● **Intelligence and Electronic Warfare Support Officer (IEW-SO).** He is the LNO from the military intelligence battalion. He can collect and jam ADA nets. He can direction-find deep targets for attack helicopter missions.

● **S-3 Planner.** The one with the least sleep. He will be the juice behind the orders process. He also

controls the graphics. You must get aviation graphics on the ground brigade master graphics. They hate it when you "clutter" their graphics, but the bottom line is that if aviation graphics are not on the master, no one will ever see them.

● **Air Force Liaison.** The man for JAATs. If the ground brigade isn't using its air, ask him if the aviation brigade can have it.

Finally, you must be a self-starter and an exemplary soldier. You must wear BDUs, Kevlar, and LBE, you must be comfortable dirty, and you must be able to go harder, longer, and faster than any of the infantry or armor officers. You must always have comms to the aviation brigade. FM SECURE, VHF/UHF (if the Air Force will let you have it), and a huge antenna are required. The best solution is an MSE system in your vehicle. You must also be self-sufficient for supplies and equipment.

In the eyes of the ground commander, you are responsible for everything that flies. Therefore, you need to take control. Be responsible, and be aggressive in your duties at the ground brigade. The first few days will be rough; hang in there. You will look back upon this as one of your greatest experiences.

FILLING THE INTELLIGENCE GAP

How often have you been on a combat or training mission and received up-to-date enemy intelligence information? What if you had an asset that could bring you real-time or near real-time intelligence information 24 hours a day? Would this asset multiply your unit's combat capability?

Recently, there have been a few significant changes in the Army's reconnaissance inventory. Some of these changes include developing and using Unmanned Aerial Vehicles (UAVs) and deactivating OV-1 units with Side-Looking Airborne Radar (SLAR) capability.

UAV, SLAR, and MMS — what are the differences with each system? Wait a minute! I didn't pull a "fast one". What does MMS mean? If you're an OH-58D Kiowa Warrior

How the OH-58D Kiowa Warrior can help the Divisional Cavalry Squadron fulfill its mission.

pilot, you know exactly what I mean. MMS stands for Mast Mounted Sight System found on the OH-58D aircraft. I'll sum up in two words the differences with each of these systems — battlefield availability. Currently, there are not any ac-

tive UAV units available. The loss of SLAR capability further reduces our aerial reconnaissance ability. Both situations increase our battlefield intelligence gap.

MAJ David Stockwell, a military spokesperson in Mogadishu, said that intelligence is one of those commodities that you can never have enough of and you can never have fast enough. He made this comment following the 3 October 1993 firefight with Aidid's militia — 13 Army Rangers were killed and 77 wounded.

Analysts point to this 15 hour firefight as the painful consequence of the lack of accurate and timely information on enemy capabilities and intent.

The purpose of this article is to show that by properly employing the Kiowa Warrior's advanced day/night sight system, Division, Brigade, and Squadron commanders could narrow the battlefield intelligence gap that exists today. The Kiowa Warrior will be employed as part of a Divisional Cavalry Squadron and has a unique intelligence capability that various intelligence organizations should capitalize upon. This article will focus on battlefield intelligence availability and employing the Kiowa Warrior in an intelligence gathering role.

The MMS provides the ground commander the ability to search, detect, recognize, track, locate, and designate ground targets in both day and night environments and limited visibility. Targets are detected, acquired, and tracked using either the Thermal Imaging Sensor (TIS) for infrared sensing during darkness and poor visibility or a Television Sensor (TVS) during daylight operations. The Kiowa Warrior's Airborne Video Tape Recorder (VTR) records MMS images on an 8mm tape. The VTR 8mm tape records up to two hours of video footage.

Several pilots with whom I spoke

rate the Kiowa Warrior's MMS as one of the best day/night sight systems in the Army inventory. Using the MMS during Operation DESERT STORM, pilots identified enemy contacts at ten miles or more depending on environmental conditions. While the MMS does not have an active downlink capability like the UAV does, this capability does exist.

One feature of the OH-58D available as a future option is real-time video transmission for remote monitoring. Bell Helicopter Textron engineers say that the link between the TV/TIS subsystems in the MMS and the Multifunction Display (MFD) screens in the cockpit is a standard video composite signal. This signal can be transmitted and remotely displayed on other television monitors. The technology is available to take a tactical MMS video picture of Nap-of-the-Earth (NOE) operations at a battle area and transmit (downlink) it to a rear ground station or orbiting aircraft.

From there it could be transmitted (uplinked) to a satellite and transmitted real-time to any location on Earth. This would allow commanders in rear echelon areas or CONUS to view the combat area, with accompanying crew comments, and to make engagement decisions in critical areas.

With a real-time intelligence capability, the Kiowa Warrior can be

sent of to observe, confirm, or deny Battlefield Named Areas of Interest (NAIs), Target Areas of Interest (TAIs), and Decision Points (DPs). Also, the Kiowa Warrior can be sent to confirm or deny suspected enemy sightings by ground units or Moving Target Indicators (MTIs) at large standoff distances.

I've discussed battlefield intelligence availability with several DESERT STORM veterans and the overwhelming fact echoed repeatedly was the lack of real-time or near real-time intelligence received before beginning a mission. Several of these veterans, including one ground commander, said that most enemy intelligence either arrived too late or never arrived at all.

MG John D. Robinson stated in the 31 October 1993 ARMY AVIATION Magazine Branch Update that commanders must be provided critical information in a timely manner when and where they need it. He said that modern digital communication sensors, computing systems, and their software operating systems provide a technological advantage to meet this challenge.

Intelligence dissemination must be accurate and timely for Division, Brigade, or Squadron commanders to make critical battlefield decisions. Since OH-58D Kiowa Warriors are part of a Divisional Cavalry Squadron, the Squadron Headquarters coordinates and distributes intelli-

gence information to requesting units. Any intelligence information gathered by Kiowa Warrior aircraft is first passed to the Squadron Commander or S-2. The Squadron staff should distribute any required intelligence to higher headquarters.

Let's look at how we can employ the Kiowa Warrior in an intelligence gathering role. Most divisional cavalry squadrons will receive 16 Kiowa Warriors. Imagine placing sixteen UAV equivalents on the battlefield without the A²C² folks worrying about airspace coordination. These 16 Kiowa Warriors can provide commanders near real-time intelligence 24 hours a day.

How can this be done? For planning purposes, I used two troops worth of Kiowa Warriors — sixteen aircraft. I used an availability rate of six out of eight aircraft mission capable. This gives us 12 aircraft mission capable.

There are several ways one could organize these troops for this mission. Organization considerations depend on mission duration, distance, and threat level. One planning technique is to organize each troop into three Recon and Security teams (R&S). This gives us six R&S teams with two aircraft in each team (this idea mirrors the infantry patrol recon and security team idea). The weapons can be a mix of any two weapon systems (Hellfire, Stinger air-to-air missiles,

Because You Have To Be Ready For Anything Today,

©1994 Bell[®] Helicopter Textron Inc., all rights reserved.

It Better Be Bell.

The OH-58D Kiowa Warrior is the most versatile armed reconnaissance helicopter in the world. No other has the air transportability, survivability, weapons capability and marinization so neatly packaged into one multimission aircraft.

◆ A model of simplicity and sophistication, the Kiowa Warrior has the highest readiness rate in the U.S. Army fleet. It has the lowest IR signature of any Army helicopter, a low acoustic radar cross section. Its rock-steady turret supports TV and designator/rangefinder. Two armed OH-58Ds can be ready to a C-130. ◆ Potential Kiowa Warrior improvements include

signature and a significantly reduced thermal imaging sensors plus a laser fight 10 minutes after landing in a Night Pilotage System, extended

range to 500 nm, a 20% increase in engine performance and increased computer capacity. Operational experience has shown the need for these technical improvements to the Kiowa Warrior, the bridge to the future. For the combat power and versatility needed in today's regional conflicts, It Better Be Bell.

Bell Helicopter **TEXTRON**

24 HOUR MISSION SCHEDULE

Team	Time	Day/NVG Crew	Approx. (Flt Time)
1 & 2	0200—1000	NVG/Day	** (8) five hours are maximum crew endurance for mix
3 & 4	1000—1800	Day	* (8) Day only
5 & 6	1800—0200	Day/NVG	** (8) five hours are maximum crew endurance for mix

* Team 3 & 4 mission times may be extended to allow teams 1/2 & 5/6 reduced NVG mission times. The Kiowa Warrior is best suited for night operations. Day intelligence gathering operations should be kept to a minimum.

** Continuous twenty-four hour operations may require sending less than two aircraft out at a time.

Figure 1

2.75" rockets, or .50 cal.) depending on the threat level.

Once we break these teams down and assign mission times (Figure 1), Squadron or Troop commanders should also keep in mind Forward Area Refuel/Rearm Point (FARP) rotations and crew endurance.

Within each R&S team, each aircraft must have specific mission responsibilities. One aircraft must be designated the recon or VTR aircraft and one aircraft designated the security or protection aircraft. The primary responsibility of the VTR aircraft is to record video footage of the specific or general terrain area of concern. This video footage is combined with the pilot's voice threat interpretation (the VTR re-

ords all cockpit communications in the record mode). The primary responsibility of the security aircraft is to protect the VTR aircraft from enemy fire and to act as a backup VTR aircraft.

The R&S team relief-on-station must occur at designated points. The relieving aircraft must receive a full intelligence briefing from the current on-station R&S team. Pilots accomplish this intelligence exchange by sending digital messages using the Airborne Target Handover System (ATHS).

As each aircraft rotates through the FARP, the armament or fuel personnel replace the aircraft VTR 8mm tape with a new tape. This tape is then sent by air transport

Fly First Class For Half Price.

Now, TEAC makes first class, ruggedized commercial video recording affordable. Our new V-80 Hi-8mm airborne video recorder is small, lightweight, and delivers superior resolution and 120 minutes of recording time. It incorporates a built-in 28 VDC power supply and automatic internal heater. And we'll guarantee production and logistics support for the life of your program.

All at less than half the price of other military airborne recorders.

Designed for new applications or retrofit, the V-80 meets or exceeds most military requirements. Yet you can use it with inexpensive consumer ground playback units and videocassettes.

Our V-80 carries on the tradition of proven quality and unequalled performance that has made TEAC the world standard. TEAC recorders are used on the Space Shuttle, RPVs, ground vehicles and over 80% of the free world's military aircraft.

The V-80 is in full production in support of a variety of military programs, including Cobra and Blackhawk retrofits, and has already been flight proven on the Apache.

TEAC's V-80 — the first class choice for Apache, Cobra, Blackhawk and Comanche!

TEAC®

INDUSTRIAL VIDEO PRODUCTS DIVISION

(OH-58A, UH-1, or UH-60) to the Division, Brigade, or Squadron Main Command Post (CP) for the commander or intelligence officer's analysis or review. Again, any intelligence information received is first passed through the Squadron headquarters.

It is not necessary for the Kiowa Warrior pilot to physically debrief this tape to an intelligence officer because the Warrior pilots debrief everything they see through the MMS before the FARP tape exchange. This tape debrief is the pilot's recorded mission conversion outlining the important intelligence information. This process will give the commander near real-time enemy intelligence updates approximately every two hours.

Kiowa Warriors must be employed early in the battle to allow sufficient time for intelligence gathering and reporting. The Kiowa Warrior's advanced optics can see the enemy at great distances. The aeroscout employment methods must change to take maximum benefit of this new battlefield intelligence multiplier.

There is no substitute for "eyes on the target". As we move into the 21st Century, the cavalry scout remains the "eyes and ears" of the ground commander. With the

changes in the Army's reconnaissance inventory, the Kiowa Warrior becomes the leading edge of divisional intelligence assets.

The air cavalry scout Kiowa Warrior has the advanced technology to provide the Division, Brigade, or Squadron commander with real-time information of location/disposition of enemy forces. This real-time information can narrow the battlefield intelligence gap which may prevent soldiers from being killed.

***"As we move
into the
21st Century,
the cavalry scout
remains the
'eyes and ears'
of the ground
commander."***

The Divisional Cavalry Squadron will perform security missions that will put it at the forefront of the battle. Intelligence assets should capitalize on the "eyes" of the Kiowa Warrior by using the VTR tapes I spoke of earlier.

The new FM 100-5 (dated 14 June 1993) states that units may have to operate in areas where few intelligence-gathering capabilities exist. I believe that if commanders employ the Kiowa Warrior aircraft properly, a big part of this intelligence gap would not exist.

WE'RE KEEPING YOU UP AT NIGHT.

Robertson Aviation's combat-proven auxiliary fuel systems can double, even triple your range or endurance.

When the mission is critical, there's no substitute for the Night Stalkers. And there's no substitute for Robertson's auxiliary fuel systems. Our combat proven readiness, NVG compatibility, and total commitment to quality means Night Stalkers don't have to give the reliability or survivability of Robertson systems a second thought. Just fly the mission.

Robertson auxiliary fuel systems exceed the most demanding U.S. Army crashworthy and functional requirements. Tanks with self-sealing bladders have passed .50 cal., 14.5mm and 20mm gunfire tests. They've even

survived the 65 ft. drop test — *without leakage.*

Robertson 28.5 to 800 gal. auxiliary fuel systems are designed to maximize mission capability in minimum space. Once installed, each tank can be removed or reinstalled in about 5 minutes or less — *without tools.*

The **ROBERTSON FARE[®]** (Forward Area Refueling Equipment) kit includes a self-priming 120 gpm pump and all the hardware needed to use the high-capacity **GUARDIAN[®]** tanks to simultaneously refuel two aircraft, or other combat equipment, 200 feet away from the pump.

"Night Stalkers don't quit" — and Robertson's systems don't either. For more information call (602) 967-5185. Fax (602) 968-3019 anytime. Or write P.O. Box 968, Tempe, AZ 85280.

AIRCRAFT SEATING UPGRADES? THINK SIMULA GOVERNMENT PRODUCTS.

For 20 years, Simula has provided high quality, energy-absorbing seating systems for military aircraft worldwide. Examples of our products include armored cockpit seats for the AH-64 Apache, H-60 Hawk helicopter family, RAH-66 Comanche and troop seats for the C-17 - Globemaster.

In addition to designing and manufacturing seats for new aircraft programs, Simula is also experienced in retrofitting aircraft with energy-absorbing seats.

Seating systems reflecting the latest technology are available for cockpit or cabin areas in veteran aircraft such as the CH-47 or UH-1 series.

*Call Jack Cress today at
(602) 893-6245 to find
out what Simula can
do for your aircraft
modernization program.*

Mean Machine

Air-to-Air Stinger (ATAS) provides the Apache-Scout a combat proven, lightweight, fire-and-forget solution for helicopter air combat.

In operation with Kiowa Warrior and SOF Aviation, ATAS is being modified to fit the Hellfire launch rail for optimal weapons mix on Apache and Comanche. Technology insertion is under way in Stinger to defeat the evolving threat well into the next century.

Apache-Scout plus Air-to-Air Stinger, a mean machine with a lethal sting.

HELICOPTER WARFARE IN AFRICA

By AL J. VENTER

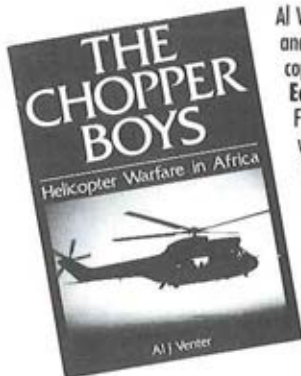

Al Venter, Africa correspondent for *International Defense Review*, London, and specialist in insurgency warfare has written the definitive book on helicopter operations in Africa. He was with US forces in Somalia. Also covers US Ops Eastern Exit and Sharp Edge (Liberia).

Features include France's war in Algeria (first helo's in combat), Portugal's wars in Angola/Mocambique, (1961-1974) the Rhodesian war, South Africans in Angola against Cubans/Russians and East Germans. **First comprehensive details of helo-ops in Third World countries which are likely to become a feature in the next decade.** This is the definitive work on ground-air liaison in counterinsurgency. The book includes day and night bush ops procedures. Also: Women in the Air.

Hardcover: 240 pages, 379 pix (colour and black & white); 20 maps and diagrams.

Send \$39.95 to Ashanti Publishing, P.O. Box 332, Chinook WA 98614.

PRICE \$ 39.95 including postage, packing and insurance

HELICOPTER

HEALTH MONITORING

- Designed for integration with Flight Data Recording systems.
- Expandable for all vibration diagnostics.
- Fully supported with ground based systems.
- Cost justified for any helicopter.

Know What's Shaking.

Rotor Dynamics Americas, Inc. has monitored over 13,000 hours of data on the OH-58D. We're keeping shakes, rattles and rolls under control with our Airborne Vibration Monitoring System, which offers:

- Vibration trend monitoring
- Continuous "health" monitoring
- Usage life — "on board stress"
- "On board" track and balance

For information on how we can help you, contact **RDA** at **817/284-9515**.

AMERICA RELIES ON THEM. THEY RELY ON LOCKHEED.

Whether it be the active Army or the Reserves, when Army Aviation has a maintenance, modification or other support mission, it calls Lockheed Support Systems.

Why? Because we know what it takes to keep Army Aviation units combat ready. And we've proved it year after year.

Since 1986, the Army has relied on our prompt, safe, cost effective support to keep the Combat Aviation Training Brigade at optimal readiness. Our Ft. Hood contingent is one of the largest groups of aviation mechanics anywhere

in the Army. That's customer confidence.

What's more, our AVIM Teams have realized a cost avoidance of \$25 million through local component repair programs. That's cost effective performance.

Our Army of 5,500 skilled personnel at over 100 locations worldwide stand ready to deploy when and where they're needed. That's responsiveness.

Put over 10 years of Army air support to work for you. Contact Lockheed Support Systems, Inc. at the address below.

ERA'S
ENHANCED
EXTERNAL
AUXILIARY
FUEL
SYSTEM

Manufactured by:

Era Aviation, Inc.

Era Aviation Services
P.O. Box 6550/ Lake Charles, LA 70606
318-478-6131 / FAX 318-474-3918

FEATURES:

- 145 gallons of additional fuel extends endurance by approximately 1.5 hours.
- Improved flight characteristics
- Full utilization of cabin space
- Meets FAR 29.952 NPRM crashworthiness, using fuel cell bladders
- Optional MIL-T-27422 - self sealing fuel cell.
- Fuel shut-off valve to isolate external fuel system.
- Inertia switch (8 Gs) to remove all electrical power to system.
- Frangible, quick disconnect fittings.
- Independent control system mounted on glare shield or in center pedestal.
- Night vision compatible instrumentation.

- FAA Approved
- U.S. Patent No. 4,860,972

HALL OF FAME CANDIDATES SELECTED

The Board of Trustees of the Army Aviation Hall of Fame, chaired by LTG Robert R. Williams, Ret., has selected 18 candidates from 70 nominees for inclusion on the ballot for the 1995 Hall of Fame induction. Some 10,000 AAAA members having two or more years of consecutive AAAA membership will be mailed ballots which contain the candidates' photos and biographical sketches later this Fall. The elected candidates will be inducted into the Hall of Fame in Ceremonies to be held Thursday, 30 March 1995, at the AAAA Annual Convention in Atlanta, GA.

The 18 candidates who are being considered for the 1995 induction are: COL Clark A. Burnett, Ret.; BG Charles E. Canedy, Ret.; COL Robert F. Cassidy, Ret.; COL Robert R. Corey, Ret.; CW4 Raymond A. Frank (deceased); MSG Gary I. Gordon (deceased); COL Robert M. Hamilton (deceased); Mr. William P. Jones (deceased); Mr. Bartram Kelley; MG Richard D. Kenyon, Ret.; LTC Donald L. Luce, Ret.; MG Delk M. Oden, Ret.; MG Rudolph Ostovich III, Ret.; LTG Ellis D. Parker, Ret.; MG John D. Robinson, Ret.; SFC Randall D. Shughart (deceased); MG Richard E. Stephenson, Ret.; CW4 Clifton P. Wolcott (deceased).

The Army Aviation Hall of Fame honors those who have made outstanding contributions to Army Aviation and records the excellence of their achievements for posterity. The actual Hall of Fame is located at the U.S. Army Aviation Museum at Ft. Rucker, AL.

\$141,500 to Benefit Members

MG Richard E. Stephenson, Ret.
President, AAAA Scholarship Foundation, Inc.

"Such scholarships provide an easy answer to the young officers and soldiers who ask, 'What can AAAA do for me?'"

This remark from one of our 1994 winners hits the nail right on the head. The AAAA Scholarship Program is one of the major benefits of AAAA membership. This year awards went to more enlisted soldiers, junior officers, and spouses of AAAA members and their children than ever before.

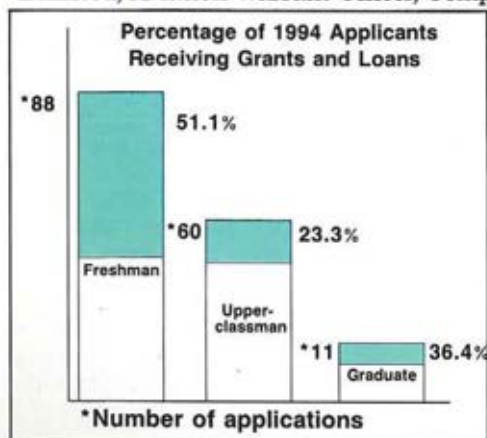

The next few pages contain the winners of the 63 AAAA Scholarship Foundation grants and loans for 1994. There were 159 applicants this year among the three separately competed categories of Freshmen, Upperclassmen and Graduate students. Although the number of upperclassmen and graduate applicants remained virtually the same as last year, the number of awards and thus the percentage of successful candidates in these categories grew substantially. As you can see in the chart below, 51.1% of the freshmen, 23.3% of the upperclassmen and 36.4% of the graduate applicants were successful this year. These are very attractive odds in the competitive scholarship world.

Like last year, and all years for that matter, academic excellence is the standard of the award process. An Order of Merit (OML) was established by the Scholarship Selection Committee whose confidential membership includes representatives from all facets of the Army Aviation Community such as Enlisted, Aviation Warrant Officer, Company Grade and Field Grade Officers,

DACs, active duty, Reserve Component, retired, and industry personnel. Scholarships and loans were awarded in descending dollar amount by OML.

To give you an idea of the level of excellence we are talking about among our 1994 winners, the average Grade Point Average (GPA) of our 45 freshmen winners was 3.9 out of 4.00. The upperclassmen and graduates were just as competitive.

We are definitely making pro-
(continued on page 119)

North Texas Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Amanda K. Acreeback, daughter of COL James R. Acreeback, Ret., Arlington, TX — Baylor University.

AAAA Enlisted Member Scholarship — \$1,000 (\$1,000 for one year) SFC David J. Banner, Glenwood Springs, CO — Colorado State University.

Aviation Center Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Joni A. Bartosch, daughter of MAJ Peter M. Bartosch, Ret., Enterprise, AL — Savannah College of Art and Design.

AAAA Scholarship Interest Free Loan — \$4,000 (\$1,000 a year for four years) Steven A. Biocco, son of Mr. Gene A. Biocco, Fort Eustis, VA — College of William and Mary.

AAAA National Scholarship — \$12,000 (\$3,000 a year for four years) Lindsay K. Brenner, daughter of Mr. Lawrence J. Brenner, San Diego, CA — Stanford University.

AAAA Warrant Officer Member Scholarship — \$1,000 (\$1,000 for one year) CW2 Jarrett R. Brewer, Louisville, KY — Jefferson Community College.

CW3 Stephen A. Hanson Memorial Scholarship — \$1,000 (\$1,000 for one year) David W. Butts, son of CW4 Gerald W. Butts, Elizabethtown, KY — University of Kentucky.

AAAA Warrant Officer Member Scholarship — \$1,000 (\$1,000 for one year) CW2 Charles T. Byrd, Daytona Beach, FL — Embry Riddle Aeronautical University.

Washington D.C. Chapter Matching Scholarship — \$2,000 (\$1,000 a year for two years) Jason Callen, son of COL Jan E. Callen, Woodbridge, VA — Washington and Lee University.

Monmouth Chapter B. Howard Dean/Ken K. Kelly Memorial Matching Scholarship — \$3,000 (\$1,500 a year for two years) Sharla K. Cook, daughter of MAJ Jack A. Cook, Ret., Ozark, AL — Auburn University.

AAAA Scholarship Interest Free Loan — \$4,000 (\$1,000 a year for four years) Matthew W. Dakey, son of CW4 Thomas C. Dakey, Ret., Findlay, OH — Wright State University.

Aviation Center Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Marcus S. Daly, son of CW4 Peter M. Daly, Ret., Corpus Christi, TX — Texas A & M University.

AAAA National Scholarship (Aeronautical) — \$4,000 (\$1,000 a year for four years) Tracy K. Dobson, daughter of LTC Ronald W. Dobson, USAF, Ret., Derby, CT — Auburn University.

AAAA Central Florida Chapter Matching Scholarship — \$3,000 (\$1,000 a year for two years) April L. Ferson, daughter of Mr. Kenneth E. Ferson, Melbourne, FL — Stetson University.

Aviation Center Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Brian T. Fentis, son of MAJ Daniel J. Fentis, Ret., St. Charles, MO — New Mexico Institute of Mining and Technology.

Savannah Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Tina R. Fox, wife of CPT Dennis A. K. Fox, Savannah, GA — Georgia Southern University.

Monmouth Chapter MAJ R. Kahl-Winter Memorial Matching Scholarship — \$2,000 (\$1,000 a year for two years) Brian C. Goess, son of Mr. Alan E. Goess, Owego, NY — University of Notre Dame.

AAAA Enlisted Member Scholarship — \$1,000 (\$1,000 for one year) PFC John H. Green, Linwood, MO — Western Maryland College.

Bryce Wilson Memorial Scholarship — \$5,000 (\$1,250 a year for four years) Jaime L. Groom, daughter of Gary L. Groom, Canton, GA — Transylvania University.

Monmouth Chapter (Perpetual Matching Scholarship — \$4,000 (\$1,000 a year for four years) Laura J. Haymann, daughter of Francois B. Haymann, Verona, NJ — Cornell University.

Jane & Wayne Philips Memorial Scholarship — \$1,000 (\$1,000 for one year) Marie R. Hoffman, daughter of MAJ Floyd I. Hoffman, Ft., O'Fallon, MO — Olivet Nazarene University.

Monmouth Chapter Matching Scholarship — \$2,000 (\$1,000 a year for two years) Melissa K. Hogan, daughter of CW4 Gary M. Hogan, Copperas Cove, TX — University of Texas at Austin.

AAAA Civilian Member Scholarship — \$1,000 (\$1,000 for one year) April K. Hunt, St. Louis, MO — Columbia College.

Savannah Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Erin E. Jones, daughter of COL Anthony R. Jones, Saannah, GA — Indiana University.

Iron Mike Chapter Matching Scholarship — \$2,000 (\$1,000 a year for two years) Shari P. Jumper, wife of CPT Charles A. Jumper, Fayetteville, NC — North Carolina State University.

Air Assault Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Robert J. Kelley, son of MAJ John M. Kelley, Fort Campbell, KY — Northeast Missouri State University.

Aviation Center Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Catherine M. Kennedy, daughter of Mr. Robert V. Kennedy, Florissant, MO — California State University at Northridge.

GEN Frank S. Besson, Jr. Memorial Scholarship — \$12,000 (\$3,000 a year for four years) Steven H. Kerchner, son of Mr. Robert M. Kerchner, Arlington, VA — Princeton University.

Lindbergh Chapter Colleen Hipp Memorial Matching Scholarship — \$2,500 (\$1,250 a year for two years) Mitchell A. Kirik, son of Mr. Ralph R. Kirik, St. Louis, MO — Rhodes College.

Rhine Valley Chapter Matching Scholarship — \$1,000 (\$1,000 for one year) Erin E. Leach, daughter of LTC Richard F. Leach, APO AE — Grove City College.

(continued from page 114)

gress on meeting the needs of our membership both in terms of dollar amount awarded and percentage of successful candidates. However, there is always more to do.

We want more candidates, particularly among the enlisted ranks and of course, we want more money to keep the program growing.

What can you do? First, send money. Next, as an AAAA Chapter member, request that your chapter start a AAAA Matching Fund Scholarship. Consider making a donation via your Last Will and Testament, or in the memory of a friend or loved one. Then contact your company if you are civilian and ask about corporate matching fund availability or a direct corporate underwrite of an AAAA scholarship.

Congratulations to all our 1994 awardees. Let's all do our part to make the 1995 program an even bigger benefit to our members. ■■■■

AAAA Scholarship Foundation

The AAAA Scholarship Foundation, Inc. is a non-profit, tax-exempt corporation established to render financial assistance for college level education to selected members of the Army Aviation Association of America, Inc. (AAAA), and the selected spouses, unmarried siblings, and unmarried children of current and deceased AAAA members.

Since the inception of the program in 1963, the AAAA Scholarship Foundation has provided over \$853,475 to 603 qualified applicants.

The Foundation has pursued an award philosophy where national scholarships are awarded on the basis of academic merit and personal achievement.

There are no paid full or part-time Foundation staff members. 100% of all donations goes directly to scholarship funds because the AAAA underwrites all direct expenses.

CAREER TRACK

If you'd like to take advantage of the Career Track employment referral service, but you're not yet a member of AAAA, the solution is simple: Fill out a membership form and send it in along with your request for a Career Track application. Your ad will run in the next available issue.

Active AAAA members may have a 30-word classified employment ad published in two consecutive issues of ARMY AVIATION MAGAZINE free of charge. Write to the AAAA National Office, 49 Richmondville Avenue, Westport, CT 06880-2000, or call (203) 226-8184 for Career Track applications. Inquiring organizations contact the National Office.

Experienced Program/Product Manager seeks challenging aerospace management/flight test position. Ten years aviation RDT&E experience including four years in flight test. MSAE, Navy TPS, DSMC. Army aviator with 3000+ hours. 94-07-01

NOMINATIONS OPEN

1994 AAAA Air/Sea Rescue Award

BACKGROUND

Sponsored by Lucas Aerospace, this AAAA National Award will be presented "to the crew or crew member who have performed a rescue using a personnel rescue hoist that saved the life or eased the suffering of an individual or individuals during the awards period encompassing September 1, 1993 through August 31, 1994."

ELIGIBILITY

A candidate must be U.S. Army, Active or Reserve Component, and must have had an active role in an air rescue effort using a personnel rescue hoist.

Membership in the AAAA is not a requirement for consideration.

The contribution of the nominee should have been initiated and completed during the awards period encompassing September 1, 1993 through August 31, 1994.

DOCUMENTATION

The official nomination form should be used and is attainable from the AAAA National Office,

49 Richmondville Ave., Westport, CT 06880-2000; Telephone: (203) 226-8184.

The official nomination form may be reproduced locally. The receipt of each nomination form will be acknowledged directly by the National Office of the Army Aviation Association of America (AAAA).

SUSPENSE DATE

The nomination(s) should be mailed so as to arrive at the AAAA National Office not later than **September 30**.

SELECTION

The "Army Aviation Air/Sea Rescue Award" nominations will be reviewed at a mid-October meeting by the members of the AAAA Awards Committee appointed by the President of the Aviation Center Chapter.

PRESENTATION

The AAAA's "Army Aviation Air/Sea Rescue Award" will be presented at an AAAA Awards Banquet sponsored by the Aviation Center Chapter.

1994 AAAA Trainer of the Year Award

BACKGROUND

Sponsored by the CAE-Link Corporation, this AAAA National Award will be presented "to the trainer who has made an outstanding individual contribution to Army Aviation during the awards period encompassing September 1, 1993 through August 31, 1994."

ELIGIBILITY

A candidate for this AAAA National Award may be a military or a civilian nominee and must be actively involved in Army Aviation training.

Membership in the AAAA is not a requirement for consideration.

The individual contribution of the nominee should have been initiated and completed during the awards period encompassing September 1, 1993 through August 31, 1994.

DOCUMENTATION

The official nomination form should be used and is attainable from the AAAA National Office, 49 Richmondville Ave., Westport, CT 06880-2000 (203) 226-8184.

The official nomination form may be reproduced locally. The receipt of each nomination form will be acknowledged directly by the National Office of the Army Aviation Association of America (AAAA).

SUSPENSE DATE

The nomination(s) should be mailed so as to arrive at the AAAA National Office not later than **September 30**.

SELECTION

The "Aviation Trainer of the Year Award" nominations will be reviewed at a mid-October meeting by the members of the AAAA Awards Committee appointed by the President of the Aviation Center Chapter.

PRESENTATION

The AAAA's "Aviation Trainer of the Year Award" will be presented at an AAAA Awards Banquet sponsored by the Aviation Center Chapter.

Lucas Aerospace

Through its sponsoring of the annual
AAAA Air/Sea Rescue Award,
Lucas salutes the men and women
of U.S. Army Aviation Crews around
the world who save the lives of others,
often at great personal risk.

BG James M. Link

Tennessee Valley Chapter

Obituaries

COL John Andrew Todd, Ret.

COL John Andrew Todd, 71, died of cancer on 6 August at his home in Springfield, VA. He had been an AAAA member since 1959.

COL Todd served in the U.S. Army for more than 32 years, including platoon and company commands in Korea and three tours in Vietnam as Battalion and Group commander. He also served as a general staff officer in the Pentagon prior to his retirement, and went on to work at Link Corporation in Buffalo, NY for more than ten years. He also served as an aviation consultant to many military and commercial organizations.

COL Todd is survived by his wife, Elfrieda Z. Todd; two sons, Gerald M. Todd and MAJ William E. Todd; their two wives; and two grandchildren.

Above: COL Robert J.H. Anderson (left), then Commander, 4th Aviation Brigade, 4th Infantry Division (Mechanized), Ft. Carson, CO, presents LTC William J. Partridge (right), Executive Officer, 4th Aviation Brigade with a Bronze Order of St. Michael Award. The presentation took place on post in March 1994.

Below: CSM Clifton P. O'Brien, II (left), Command Sergeant Major, 8th Squadron, 9th Cavalry, Wheeler Army Airfield HI, was awarded a Bronze Order of St. Michael Award by MG John D. Robinson, then Aviation Branch Chief and CG USAAVNC and Ft. Rucker, AL. The event was held at the Hilton Hawaiian Village on 12 May 1994.

Aviation Electronic Combat Symposium 7-9 November 1994

The upcoming AAAA AEC Symposium, to be held in Charlotte, NC, will feature presentations by a number of leading military and industry figures in the areas of Avionics and Aircraft Survivability Equipment. This year, presentations are NOT classified.

Monday, 7 November 1994

1800-2000 — Early Birds Reception and Registration

Tuesday, 8 November 1994

0730-0830 — Registration and Coffee

0830-0840 — Welcome, MG Stephenson, Ret.

0840-0855 — Opening Remarks, COL Oler

0855-0935 — Keynote Address, BG(P) Riggs

0935-1020 — Warfare of the Future, GEN Saint, Ret.

1020-1040 — Break

1040-1125 — Suite of Integrated IR Countermeasures

1125-1145 — 21st Century Lasers

1145-1300 — Luncheon

1300-1345 — Suite of Integrated RF Countermeasures

1345-1435 — Electronic Warfare Officer Update

1435-1445 — Field Assistance Support Team

1445-1505 — Break

1505-1535 — Electronic Warfare Course Update

1535-1605 — Electronic Warfare Officer Career Pattern

1605-1635 — Army Reprogramming Analysis Team

1800-1900 — Reception

1900-2200 — Awards Banquet, featuring the presentation of the AAAA Avionics Award and the AAAA ASE Award. Guest Speaker: MG Dewitt T. Irby, Jr., PEO Aviation.

Wednesday, 9 November 1994

0700-0800 — Registration and Coffee

0800-0900 — Army Digitization Update, MG Rigby

0900-0930 — Digitization from a Remote Pilot Associate Perspective, Mr. House

0930-1015 — Army Aviation Digitization

1015-1035 — Break

1035-1050 — Global Positioning Systems

1050-1100 — Improved Data Modem

1100-1120 — Aviation Mission Planning System

1120-1135 — Army Aviation Command and Control Sys.

1135-1145 — ARC-220 High Frequency Radio

1145-1215 — Digital Imagery

1215-1230 — Closing Remarks, COL Oler

1230-1330 — Luncheon

Order of St. Michael Changes

The Order of St. Michael program, the joint venture between the AAAA and the U.S. Army Aviation Center to recognize individuals who have contributed significantly to the promotion of Army Aviation is now more affordable to the local sponsoring AAAA chapter.

In an effort to further expand this popular program, the AAAA National Executive Board has instituted four options for Bronze level award packages.

Package A which includes the medallion with name engraved & certificate has been reduced \$20 to \$35.00. Other options not previously available are:

Package B which includes the medallion with name engraved but without certificate for \$28.00.

Package C includes Medallion without name engraved but with Certificate for \$22.00.

Package D includes Medallion without name engraved and without certificate for \$15.00.

There is no excuse now. Get your chapter's program off the ground today! Contact the AAAA National Office for more details.

AAAA CALENDAR

A listing of recent AAAA Chapter Events and upcoming National dates.

September, 1994

- ✓ **Sep. 22.** Connecticut Chapter Meeting, Radisson Hotel & Conference Center, Cromwell, CT.

✓ **Mar. 29-Apr. 2.** AAAA Annual Convention, Atlanta, GA.

NEVER LOSE TOUCH WITH THE ROCKWELL/HARRIS SOLUTION FOR ARMY NAP-OF-THE-EARTH COMMUNICATIONS.

ROCKWELL/HARRIS TEAM WINS
ARMY ARC-220 NOE COMM PROGRAM

Interoperable air and ground high-frequency communications are assured by Rockwell/Harris team experience. The two leading HF suppliers in the world have joined forces to combine their technical expertise to meet the Army's most important NOE COMM requirements through the ARC-220 pursuit. Separately, it has taken Rockwell (airborne HF) and Harris (ground HF) more than 10 years and significant individual investments to develop the key technologies to implement U.S. MIL-STD Automatic Link Establishment, Electronic Counter Countermeasure and data modem waveforms.* Not an easy task, yet accomplished through diligent engineering and innovation. Together, these two industry-leading companies offer complementary low-risk solutions for the full range of NOE COMM requirements, for air and ground. They have conquered the complexities of some of the toughest waveforms ever developed and made it all very easy to use. Rockwell and Harris have off-the-shelf production equipment available today to demonstrate that they can meet the stringent requirements of the U.S. Army's NOE COMM program. Communications are assured with the high-frequency systems from the Rockwell/Harris team -- the source for advanced HF products to meet tough requirements. The ARC-220 will be a quality solution from the experienced leaders in HF communications. For more information, contact the Rockwell/Harris NOE COMM Program Office at (319) 395-1600, fax to: (319) 395-5111, or write to: Rockwell/Harris, NOE COMM Team, Dept. 120-131, 350 Collins Road NE, Cedar Rapids, Iowa 52498.
